BASF'S MILLER SAYS SUPERINTENDENTS SHOULD
CHANGE OUT NOZZLES FOR PARTICULAR PESTICIDES

Tis the season for ... spraying pesticides. With that in mind, we turn to Kyle Miller, senior technical specialist for BASF Turf & Ornamental, to garner a few tips for proper spraying.

Miller says many sprayers these days are fitted with nozzles that deliver a medium/coarse spray. "You can use these nozzles for different products. [They have] a coarser spray so if the wind kicks up the spray will stay uniform without a lot of drift."

But Miller stresses that superintendents should consider switching nozzles for each pesticide they're spraying, whether it's an herbicide, fungicide or insecticide. For instance, a nozzle that emits a coarse spray is not effective for a fungicide program.

"It may not be as important if you're spraying a soil insecticide to have real fine droplets hitting the soil," Miller says. "You can probably get away with a coarser spray. But in the case of a contact fungicide, you want to maximize that product on the leaf. So you want to have a nozzle that can do that for you. If we have a real coarse spray, then you're probably not going to do a very good job of getting it on the foliage because there are a lot of big particles that will roll off the leaf and fall down into the turf canopy. So they won't be effective."

Miller points out that nozzles are inexpensive. "You can buy a whole set for \$100," he adds.

Kyle Miller

what we've heard from many members. "Overall golf spending is rising a bit as the overall economy continues to improve," he said.

Private club rounds were flat for the year while public courses had slight increases. "Premium" public courses had the best showing with nearly a 2-percent gain, followed by "value" public with about a 1-percent increase.

The report is based on information reported by a

panel of nearly 2,600 golf facilities across the United States. Response rates to monthly surveys vary from 60 percent to 70 percent.

Including the 2004 openings, the total number of U.S. golf facilities stands at 16,057, thus breaking the 16,000 mark for the first time. Adjusting for 9-hole and 18-hole-plus facilities, there were 14,988 18-hole equivalents at year's end.

We're excited
about the news.
No we're ecstatic,
exuberant,
elated,
