OMNIDUG

2

NOW AVAILABLE IN TWO STYLES!

1... *The Omni*
For greenskeepers who prefer an easy to install, inexpensive, single color post. Unlike short-lived ABS posts, Omni's every-weather polycarbonate posts are virtually indestructible in normal use. If thrown into water hazards, they even float. Omnis come in lengths of 12", 18" and 24" above ground and are available in any of the standard colors shown at left. Corrosion resistant alloy spike is molded into base section.

2... *The Omni Elite*
Provides the ultimate in flexibility, particularly for those courses that use non-standard post colors. What's more, Elites never need painting! Using the supplied connectors, these posts may be assembled to any length in any color combination. Post sections

Posts are 100% Post Consumer Recycled Plastic

Good as gone.

EPA exempt, approved for use in all states.

An astonishing 99% reduction in mole activity, even 4 weeks after application.

Independent lab testing* proves it. All natural Liquid Fence® Mole & Vole Repellent gets rid of moles, saving your greens, fairways, tee boxes... and possibly... your bottom line!

Repeating the guaranteed-effective performance of America's #1 selling deer and rabbit repellent, The Liquid Fence Company is ready to solve your devastating mole problem - easily and economically!

*Based on results of efficacy testing performed by independent research laboratory Snell Scientifics, LLC.
