OMNIDUC

2

NOW AVAILABLE IN TWO STYLES!

1... The Omni
For greenskeepers who prefer an easy to install, inexpensive, single color post. Unlike short-lived ABS posts, Omni's every-weather polycarbonate posts are virtually indestructible in normal use. If thrown into water hazards, they even float. Omnis come in lengths of 12", 18" and 24" above ground and are available in any of the standard colors shown at left. Corrosion resistant alloy spike is molded into base section.

2... The Omni Elite
Provides the ultimate in flexibility, particularly for those courses that use non-standard post colors. What's more, Elites never need painting! Using the supplied connectors, these posts may be assembled to any length in any color combination. Post sections

TriWave™ 60 OVERSEEDER

NEW

The next wave in overseeding is here!

The patent-pending TriWave™ 60 overseeder is perfect for rejuvenating heavily-used golf fairways – allowing ongoing overseeding with minimal disruption to play. Here's how:

- Three independent floating heads seed both low and high spots.
- WaveBlade™ technology optimizes slit width for improved seed-to-soil contact with minimal turf disruption.
- Special seed delivery system puts seed directly into slit, increasing germination with reduced waste.
- Infinite depth adjustment allows tools-free on-course adjustments.
- 1-1/2" blade spacing increases germination with fewer passes.

**Experience the TriWave difference.
Call Turfco at 800-679-8201 today!**
