## Product Q&A

**Q:** Why should a superintendent visit your booth?

**A:** They will be able to see the 2008 Articulators that for the first time include a 100-in.-wide zero-turn mower that can be folded for transport to 78-in. wide.

**Q:** What makes your product unique?

**A:** LasteC's Articulators cut roughs more economically than any other brand without sacrificing cut quality or productivity by using smaller 21-in. diameter decks that offer greater accuracy and burn 30% less fuel than other makes.

# A Test Drive Could SAVE You \$25,000

4259  
at the  
GIS Show!

LasteC introduced articulating rotaries to the turf industry in 1990. Since then other manufacturers have followed our lead and offer articulating rotaries that are less efficient, less accurate, far less maneuverable, and far more expensive.

You owe it to yourself, your budget, and your players to test the best before you pay more for just a name. Besides, after the test drive, you'll likely agree that the best name...at any price... to meet your rotary needs is LasteC.

See what is NEW for 2008 at the GIS Show.
