The Company Line

SNOW MOLD PRODUCTS

The following are products that can control snow mold:

Insignia

Featuring the proprietary active ingredient pyraclostrobin, Insignia fungicide from **BASF** is a foundational product for snow mold control. University research reports indicate that funaicide tank mixes for snow mold that include Insignia rate among the highest for control.

Teremec

Teremec Turf Fungicide from PBI/Gordon, available in wettable powder and flowable formulations, contains the active ingredient chloroneb. It has preventive and curative activity. As a contact fungicide, Teremec provides fast curative activity for snow mold with no known resistance.

FF III

The Andersons Golf Products offers FF III. a granular snow mold fungicide with fertilizer. FF III combines three active ingredients - PCNB, propiconazole and chlorothalonil. PCNB uses a contact mode of action and is a historic standard against gray snow mold, according to The Andersons.

Bayer Environmental Science offers Reserve fungicide. Reserve contains the active ingredients triticonazole and chlorothalonil, along with Bayer's StressGard formulation technology. University research trials show that Reserve controlled disease and improved turf density and quality.

Instrata

Instrata fungicide from Syngenta Professional **Products** combines the active ingredients chlorothalonil, fludioxonil and propiconazole in a proprietary formulation. The combination of active ingredients and their multiple modes of

action enable Instrata to control the numerous pathogens that cause snow mold.

Dovetail

Phoenix Environmental Care's Dovetail fungicide combines two proven active ingredients, iprodione and thiophanate-methyl, for effective control of pink snow mold and other diseases. Because Dovetail contains active ingredients with different modes of action, it provides a minimum 14-day control

and helps in resistance management.

Tourney

Valent Professional Products offers Tourney. For best performance on snow mold species, make one to two applications in combination with PCNB, chlorothalonil, iprodione or other fungicides active on snow mold in late fall before snow cover and, if possible, one application during a mid-winter thaw.

Iprodione E-Pro, TM + CTN E-Pro 66.6 WDG

Nufarm Americas offers two options for snow mold control: Iprodione E-Pro and TM + CTN E-Pro 66.6 WDG fungicides. Iprodione E-Pro provides dependable control. Its contact and residual activity give Iprodione E-Pro both preventive and curative power. TM + CTN E-Pro 66.6 WDG fungicide contains thiophanate-methyl and chlorothalonil to provide longlasting, broad-spectrum control. It offers two modes of action against the target fungus.

Ipro 2SE

Quali-Pro offers Ipro 2SE for pink and gray snow mold control as well as other diseases. A foliar-applied suspo-emulsion, Ipro 2SE fungicide provides preventive and curative iprodione disease control. It's a solid choice for tank mixing and a perfect partner when used in rotation for resistance management.

DISARM

DISARM and DISARM C fungicides from Arysta LifeScience provide snow mold control. The recommended use for both products is in tank-mixes with other nonstrobilurin fungicides.

Echo Ultimate

Echo Ultimate from SipcamAdvan turf and ornamental fungicide is packaged in an easy-to-use resealable 5-pound container.

The 82.5 percent spray-dried chlorothalonil fungicide readily disperses and resuspends in the spray tank. Echo Ultimate should be applied prior to snow cover to prevent gray snow mold, with repeat treatments at monthly intervals if snow is intermittent or lacking. For pink snow mold, Echo Ultimate is best applied with products containing iprodione.

Rhapsody

Agraquest offers Rhapsody, a microbial fungicide that's effective for turf diseases, including snow mold. Rhapsody is active on snow mold (gray and pink), and has also shown to enhance the performance of chemical fungicides used for snow mold. The active

ingredient in Rhapsody can also activate plant defenses and stimulate plant health.

GreenJacket Cover

GreenJacket's over-winter turf protection system can keep snow mold chemical applications from being washed away by rains or melting snow. The chemicals are retained on the turf for better performance come spring.

Fore Rainshield

Fore Rainshield from Dow AgroSciences is a broad-spectrum fungicide. Rainshield technology means the product resists wash-off and aids redistribution in wet weather. Fore Rainshield attacks fungi in a non-selective manner.

GOLFDOM (ISSN 1526-4270) is published monthly (12 issues per year) by Questex Media Group, Inc., 306 W Michigan Street, Suite 200, Duluth, MN 55802. Corporate office: 275 Grove St, Suite 2-130, Newton, MA 02466. Accounting, Advertising, Production and Circulation offices: 306 W. Michigan St, Suite 200 Duluth, NN 55802-1610. Subscription rates: One year \$43 (U.S. and possessions), \$65 (Canada and Mexico) and \$98 (all other countries). Air expedited service is available in countries outside the U.S. and Canada for an additional \$75 per year. Current issue single copies (prepaid only) \$5 (U.S. and possessions), \$7 (Canada and Mexico) and \$8 (all other countries), Back issues (if available, prepaid only) \$10 (U.S. and possessions), \$14 (Canada and Mexico) and \$16 (all other countries); add \$6.50 per order shipping and handling for both current and back issue purchases. Periodicals postage paid at Duluth MN 55806 and additional mailing offices.

Put the Gandy Dethatcher Overseeder to work on your course, and you'll be amazed at its performance. Here is unmatched

quality, precision and economy in one machine.

The Category 1, 3-pt self-leveling hitch model is PTO-

driven for tractors above 18 hp. The unit is 48 inches wide with 24 blades of 8-inch diameters to create slits on 2-inch centers. The overseeder has a stainless steel hopper bottom and slides and holds 100-125 lbs of seed. Material flows through a separate opening disc or shoe assembly for excellent seed-to-soil contact.

The Gandy Slice 'n Seed™ walk-behind Overseeder allows the operator to evenly and accurately place seed in smaller areas.

Talk to your Gandy dealer about how these Gandy Detatcher Overseeders can work for

you. Or call us.

This year, look to Gandy turf equipment to bring more performance to the job. Gandy has been a name you can trust for over 73 years.
