

The Company Line

PRODUCTS

Turfco offers the new Walking TriWave Overseeder, which combines the features of Turfco's TriWave 60-inch Overseeder in a walking version. In addition to the patented WaveBlade technology, the Walking TriWave Overseeder offers new optional greens blades, new transport speed and patent-pending technology that keeps seed rate consistent regardless of ground speed. The new overseeder enables operators to handle all kinds of seed from bentgrass to a creeping red fescue.

Club Car's Guardian SVC (Satellite Vehicle Control) system brings an advanced level of protection to golf courses and their most valuable assets — their customers, course and golf cars — as part of an affordable GPS-based system, the company says. Guardian incorporates course-management features of GPS technology — including limiting vehicle access, controlling vehicle speed, reviewing the history of where a golf car has been driven, and monitoring and diagnosing vehicle performance — into a system that can be accessed from any computer with an Internet connection.

Vitalonil fungicide, from **Phoenix Environmental Care LLC**, is a proprietary combination of the company's Vital and Pegasus products. It offers control of a broad spectrum of diseases, including pythium, dollar spot, rhizoctonia diseases and anthracnose. Vitalonil is a combination of potassium phosphite and chlorothalonil, which makes it an excellent product for resistance management, according to the company.

Bayer Environmental Science offers Chipco Triton FLO, a new fungicide for flexible disease control. Not only does the new product control all the major turf diseases, it improves plant health, allowing turf plants to more effectively manage the stresses of golf course conditions. Chipco Triton FLO fungicide is a sterol biosynthesis inhibitor from the demethylation inhibitor (DMI) class of chemistry. It contains the active ingredient triticonazole, formulated with StressGard technology.

E-Z-GO offers the MPT 2000 Refresher, which allows golf courses and resorts to serve the needs of customers — and drive revenue from on-course food and beverage sales — longer without having to stop for lengthy and laborious refills. The MPT 2000 Refresher offers a total payload capacity of 2,000 pounds.

BASF Turf & Ornamentals says Drive XLR8 herbicide has received full state registration in California. Broad-spectrum Drive XLR8 herbicide features an innovative liquid formulation of quinclorac for postemergent control of the most prevalent weeds.

GOLFDOM (ISSN 1526-4270) is published monthly (12 issues per year) by Questex Media Group, Inc., 306 W Michigan Street, Suite 200, Duluth, MN 55802. Corporate office: 275 Grove St, Suite 2-130, Newton, MA 02466. Accounting, Advertising, Production and Circulation offices: 306 W. Michigan St, Suite 200 Duluth, MN 55802-1610. **Subscription rates:** One year \$43 (U.S. and possessions), \$65 (Canada and Mexico) and \$98 (all other countries).
