

simple, compact and maintenance-free geese deterrent for lakes and ponds. The patented device is a flashing light, charged by photo-cells and automatically activated with a light sensor for nighttime use. This LED light is mounted to an enclosed weatherproof float that is positioned in the center of the afflicted pond or lake. The light flashes once per second at night to discourage the geese from foraging and nesting.

The compact device is harmless to the environment and eco-system of the pond and is visually innocuous, measuring only 15 inches wide and 12 inches above the water line. A land-based unit is also available.

Fairway Stone holds the only patent in the industry on an **installation system for pylon tee signs** ⑤. The company sells pylon, pedestal, slant and in-ground tee signs. It

also sells tee yardage, tee, fairway, and driving range markers.

The company has produced granite tee signs and markers for more than 1,000 golf courses, parks, corporations and communities.

White Metal Golf is offering the **Tidy Whitey Revolution** ⑥, which the company says is an easy, fast and economical way to turn the soil above the cup bright white. The one-piece design requires no set up and no clean up, and it leaves no drips or over-spray.

White Metal Golf also offers the **BRASS White Metal golf cup**, a patented design featuring a solid brass base. The replaceable polycarbonate crown is pure white, so it never needs to be painted. It's also available in aluminum. ■
