Just Add GERMS

14 How microbes could dramatically change the way you fertilize your golf course BY STACIE ZINN

22

Cherokee Nation

Native American history is deeply rooted on the grounds of Sequoyah National Golf Club — and in its superintendent.

By Steven Tingle

24

PCNB for You and Me?

The inexpensive snow mold control product returns, but will superintendents be able to get a hold of it this winter?

By Seth Jones

About the cover

Golfdom designer Carrie Parkhill Wallace gets us up close with germs with an image from iStock International Inc.

26

The Coolest Accessories

Several manufacturers have offered up their latest golf course products for your consideration.

By Ken Moun

departments

- 4 Off the Fringe
Good start at Green Start; assistant scores free greens mower; people in the news.
- 30 Clark Talks Turf
Clark Throssell, Ph.D., discusses snow mold control with Jim Kerns, Ph.D. of the University of Wisconsin.

Turfgrass Trends

This month, *Golfdom's* practical research digest studies wear tolerance in bentgrass; and macronutrient interactions on turf absorption and distribution. See pages 33-38.

Online Exclusive

Stop by www.golfdom.blogspot.com to see the RG3 robotic greens mower, featured on page 29, in action. Also, check in for daily updates from the Irrigation Show in San Diego and the *Golfdom* Summit at Pinehurst Resort.
