

## LET IT SNOW

BY CURT HARLER // Contributing Editor

**WITH APOLOGIES TO ALL OUR READERS DOWN SOUTH**, it's time to talk snow (or "white gold" as the snow removal equipment companies like to call it). While at the recent GIE+Expo show in Louisville, we saw plenty of equipment designed with the operator in mind. If the course is already put to bed and you're working on getting your equipment geared up for next season, this equipment will get you back to finishing that task as quickly as possible.

### 1. F-90

Heavy-duty implement options for specialized applications on **KUBOTA'S** F-90 series include a snow blower as well as debris blower, front blade, grass catcher, mulching kit and rotary sweeper. The F3990, pictured, has the highest-ever horsepower among all Kubota front-mount mowers. Each model has a 16-gallon fuel tank and single speed pedal hydrostatic transmission for quick response and increased working speed, while the auto-assist 4WD forward and reverse ensures greater efficiency with appropriate traction.

### 2. Path-Pro

New for this snow season, the **ARIENS** Path-Pro is a single-stage snowthrower that is lightweight, compact and maneuverable. Although small in size, it is built to be durable enough for heavy-weight use by professional crews. Powered by either an Ariens AX 136cc or a 208cc motor, it has a 21-inch clearing width. It has a throwing distance of up to 35 feet. Chute rotation option allows snow to be tossed left or right. Commercial-duty housing cuts through packed snow and reinforced rubber augers move snow fast. Five model options include recoil or electric start models.

### 3. 9000 V-Plow

The new 9000 series VF trip-edge V-Plows from **HINIKER** feature deep-curl flared wings to toss deep snow farther and higher, while providing more scoop capacity than ever. Twelve laser-cut ribs are incorporated into the high-tensile steel superstructure of the plow, providing exceptional strength for heavy-duty applications. V-Plows come with super-bright quad halogen lights and double-acting hydraulic power. Also available in a conventional level-top configuration, VFs come in 8.5- and 9.5-foot widths. Pinch-free pivot point is located nine inches above ground level, for improved protection from higher obstacles such as curbs and

parking barriers.

### 4. XV2

The XV2 features extreme flared wings, **FISHER ENGINEERING'S** proven trip-edge design, super-fast hydraulics to quickly change blade positions and standard InstaLock double-acting cylinders to securely hold the wings in place for windrowing, back-dragging and straight blade operation. Optional bolt-on shoe kit protects plows where surfaces are rocky and/or abrasive. This extends the life of the cutting edge and/or base angle.

## Winter Problems? Get the IMPERMEABLE barrier!

Featuring  
the **NEW**  
Air Flow  
System!

Actual user photos — not retouched!

Minimizes temperature fluctuations  
Protects from ice damage, crown hydration and desiccation  
Lightweight and durable for years of easy installation & storage.

### 5. Polar Trac

When the snow starts piling up, the Groundsmaster 7200/7210 Polar Trac system from **THE TORO CO.** is a superintendent's best friend, the company says.

Heavy-duty rubber tracks and a heated hard top cab with roll-over protection ensure that not only will the job get done efficiently, but also in comfort. Equipped with a Kubota three-cylinder, liquid-cooled diesel engine, the 7200 makes quick work of tough jobs.

### 6. Prodigy

The Prodigy features a patented mechanical wing designed to automatically position the blade wings for maximum plowing efficiency. The multi-position blade is equally adept at straight-ahead scooping or angled windrowing and is as easy to operate as a straight-blade plow. The Prodigy,

from **WESTERN PLOWS**, is available for trucks and skid-steers. When the plowing angle changes, the unit's wings automatically transform to the most efficient plowing configuration.

### 7. Power Pusher

The **BLIZZARD** Power Pusher box plow is the company's newest unit. Built for skid-steers, wheel loaders and loader backhoes, it features fully welded construction, a reversible rubber cutting edge and abrasion-resistant high-strength wear shoes. The Power Pusher is available in seven size options ranging from eight feet to 16 feet.

# // GRINDERS

## 1. Anglemaster 4000

The Anglemaster 4000 from **BERNHARD AND CO.** grinds bedknives up to 40 inches long to tolerances within one thousandth of an inch. Grinder comes standard with the firm's new Super-Blue grindstone which are to grind the hardest bedknives longer, harder and cooler. The 4000's operator panel has color-coded function buttons. Along with the digital angle setting and read-out of current and desired angles with auto-cue, all make for simple, error-free operation.

## 2. 555 SRI

The 555 SRI grinder from **NEARY TECHNOLOGIES** allows for both automatic spin and relief grinding with one easy setup. The hands-free operation during the relief grind allows the operator to perform other tasks while the machine does the work. One-hp motors operate at 3450/2875 RPM. Multi-position brackets for supporting the reel by the frame, and "V" brackets for supporting the front roller during setup make reel placement easy and repetitious. Unit's control console is right out front where the operator has easy access to variable speed spin and traverse controls.

# TRANSFILM®

## IT'S KIND OF LIKE THAT.

**Winter sucks.** Literally. It sucks the water out of your turf, shrubs and ornamentals. It's called desiccation, and it can be brutal. But you can help stop it with TransFilm® Anti-Transpirant & Sticker from Gordon's®.

TransFilm reduces desiccation by coating grass, shrubs and ornamentals with a thin film that creates a water-impermeable layer. That protection helps plants start the spring healthier, with enhanced plant vigor and an earlier green-up.

Don't let winter suck the water – and life – out of your turf, ornamentals, and shrubs. **Protect them with TransFilm.**
