

PAR-TEE

TRADEMARK

THE 100% GOLF TEE

MADE OF PURE RED RUBBER — ONE LASTS YEARS

Club Strikes Ball —

Tee Turns on Rocker

PAR-TEE is the first and only scientifically designed Golf Tee (made of pure red rubber) constructed upon mechanical principles, whereby and because of the rocker action by which the tee turns over as soon as the club comes into contact with the ball, permitting the club to follow through without the least resistance,

IT CAN'T FLY!

PAR-TEE sets on any surface—sand, clay, mud, grass, snow. Ideal for indoor golf—does away with the usual mat.

NO ANCHORING REQUIRED!

Does away with the sand box. Does away with pushing or driving in wooden or metal tees, saving your fingers from bruises and your club from marring. Does not tear through clothing, being made of pure red rubber. Compact, convenient, sanitary. Only one needed to carry with you. It's always with you—one can't lose it. One lasts indefinitely. The only golf tee that enables you to start your game without a handicap—

AT PAR!

PAR-TEE is as perfect and dainty as a gem; worth its weight in gold, but only costs its weight in silver—25c!

If every member of your club used PAR-TEE, you would eliminate every objectionable feature resulting from the use of other types!
