

## The New England Amateur, Too, on a PENNSYLVANIA-cut Course!

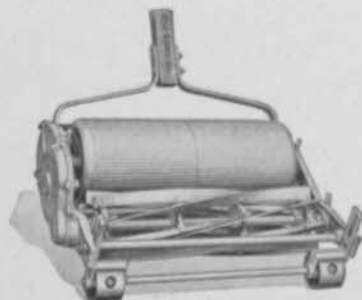

When the New England Amateur was played last month at Hartford, another addition was made to the long list of championship tournaments which have been contested on PENNSYLVANIA-cut courses. For 1929 alone, this list includes, among others, both the National Open at "Winged Foot" and the British Open at Muirfield, Scotland.

Write for your copy of attractive GOLF CATALOG containing full details on the "New" Fairway Mower shown above, the Super Roller Greens Mower shown below, the New Aristocrat greens mower and the other PENNSYLVANIA Quality Mowers for Golf Courses.

# **"U. S." Royal Guarantee**

## *to be Discontinued in 1930*

**A**T the start of the present golf season, we decided to meet a competitive situation by making a public announcement regarding the guarantee on our "U. S." Royal Golf Ball.

Our observation of the practical working out of this guarantee policy so far this season, has proven to us that it is most unfair to the golf professional. Therefore, we will make no further public announcement of this guarantee, and after this season is over, we shall adopt our former policy—namely, to stand back of our ball as strongly as it is possible for a manufacturer to stand behind his product, and leave it entirely to the professional as to whether any of our golf balls should be replaced to the golfer.

*The professional is our representative  
in this matter*

## Do your drains resist impact and frost v v year after year?

**SCHOOLS** require drainage systems that give service year after year. Construction, therefore, must be planned that will resist the elements and the most unusual conditions of use, so that grounds will be ready for play at all times, except during actual hours of storm.

Dependable drainage can be assured by the use of Armco Perforated Iron Pipe. Because it is flexible this pipe will withstand impact from trucks, rollers and other heavy equipment. Actually it can be frozen solid without the slightest damage.

Ground water enters the pipe through a number of small holes in the bottom of each corrugation and not through the joints. This permits the pipe to be connected into one continuous length with joints that cannot open up and block the pipe with soil deposits.

Complete information on Armco Perforated Pipe for school, athletic field and playground uses is available on request. Send for it today.

*Armco culverts and drains are manufactured from the Armco Ingot Iron of The American Rolling Mill Company and all to say bear its brand.*

## DOUBLE ROTARY SPRINKLER

Next Best to Rain

Makes  
Old Sol  
"Just a  
Dub"

Old Sol can't play his scorching game on your course with the Double Rotary Sprinkler assuring you hot-weather protection.

This efficient sprinkler covers a circular area from 15 to 80 feet in diameter, according to pressure. Sprinkles evenly and gently—does not wash or pack soil. Self-operating—saves cost of an attendant. Easily moved on skid base. Built of finest materials for years of service. Bronze and steel gears operate in oil bath. Standardized parts.

ORDER from this ad for 10-day trial. If not satisfactory, return sprinkler and money will be refunded. Descriptive literature on request.

# PERFECT GREENS

Those who have the responsibility of establishing and maintaining greens should make sure of success by using the best grass obtainable.

For the past seven years, my selection of "WASHINGTON" strain has been used on many of the finest courses in the United States and Canada and has proved, without exception, to be unsurpassed for its fine, smooth, velvety texture, without nap or grain, and its particular resistance to fungus. It makes a firm, uniform turf on which the ball runs true.

The grass in my nurseries is kept carefully true to type and free of objectionable growth. It is grown and prepared for planting under the personal supervision of trained men, familiar with turf requirements for golf greens.

The stolons I supply are from strong, vigorous year old plants only, shredded ready for planting; delivery in good condition guaranteed.

Will be glad to furnish names of satisfied customers from Wisconsin to New York and Winnipeg to Tennessee. Inquiries given prompt attention.

**"Just full of holes!"**

**Yet It Exceeds A. S. T. M. Requirements!**

One has but to hold a length of "Poroswall" Rapid Drain Pipe up around an electric light in a darkened room to appreciate the reason for its enormous porosity. It is just full of holes. Yet it has the strength and permanence of concrete. It is concrete! It easily exceeds the strength-requirements of the American Society for Testing Materials.

## Golfers are queer ginks!

THEY don't appreciate a mudhole hazard on the course. And they are the fellows you are trying to please—so if you have leaky pipe it's time to install Clow-National cast iron.

Made of cast iron that will not rust, this pipe will last for centuries—giving steady, dependable service day in and day out.

Clow National Two-Inch pipe is furnished with several types of joints and does not require skilled labor to assemble it. If you are interested in avoiding trouble you will investigate.

- 1 Quality....
- 2 Price .....
- 3 Convenience
- 4 Friendship..

## How do YOU figure your seed purchases?

**EVERY** purchase of golf seed involves some consideration of the above factors. In some, one factor may predominate. In others, more or all. But each factor is important in just the order stated, for Price, Convenience, or Friendship—no matter how intriguing they may appear—are poor substitutes for Quality.

Over a period of years, Scott's Seed has made a host of friends who have found it convenient to specify SCOTT'S but only on the basis of its downright superiority has it merited the continued favor of over 980 golf clubs who sow it year after year.

Fall Sowing time—just ahead.  
A quotation on Scott's Seed should be welcome. Write today.

## For the Control of Brown-patch

**TURFCALOMEL** is the outcome of experiments to determine the most satisfactory, efficient, convenient, and safest fungicide for both large and small brown-patch. It contains both corrosive sublimate and very finely powdered calomel carefully adjusted in composition with mineral matter. This composition has distinct advantages. It prevents caking, gives bulk, and allows of a more even distribution of the active ingredients—thus reducing to the minimum any possibility of burning the turf. The same results cannot be obtained with the chemicals either alone or mixed with sand or compost.

## ROYER COMPOST MACHINES

### Put a ROYER to Work on Your Fall Composting

Hundreds of Royers in operation over the past few years have proven they will save from 70% to 90% the cost of manual labor.

Lumps or sod, wet or dry, the Royer turns out a stream of thoroughly pulverized and mixed topsoil, as fast as four men can feed it the raw material.

Get your Royer now and  
speed up your fall work.

ROYER Compost Machines are effecting savings of 70% to 90% everywhere they're used. The most efficient compost machine made—their work is guaranteed.
