

Good-bye old-fashioned, high wheels and high cutting costs!

Because the Ideal Bulldog Mower has low close-coupled wheels, the Bulldog drive can be strong, simple, *sure*. No complicated chain-of-gears is used on the Bulldog cutting unit. Just a simple pinion and pawl drive, that is quickly and cheaply repaired right on the job.

That means a lot when cutting costs are figured. For complicated drives can send up repair costs to a disastrous figure. Ideal Bulldogs drive from both wheels, further reducing wear.

And Bulldogs can travel faster than high wheel types. They mean a better cutting job in less time and at a lower cost. Get our book of mowers and golf course equipment. Send today.
