

PUSHES AT A FINGER TOUCH

Aluminum gives it lightness. Ball-bearings make it light running. Simplicity of design makes it easy to sharpen or service. A four-inch, seven-blade, high speed reel insures smooth work.

All these things, and more, make the Ideal Greensmower a sturdy, precision-built instrument, that can outperform any other in the field. For those who judge by actions . . . a demonstration can be arranged on your own greens.
