

Far Cheaper *per* Mowing Mile

Greenkeepers for many of the country's leading golf courses have learned through experience this important fact:—

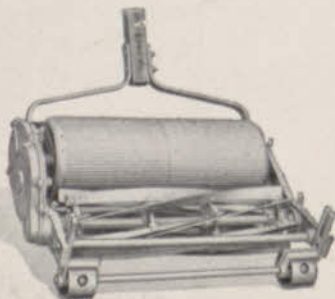

that both the tractor-pulled PENNSYLVANIA "New" Fairway Quint or Trio (pictured above) and the Super Roller Greens Mower (shown below) will not only give a greater *mileage* of efficient mowing but will cost far less *per mowing mile* for labor, maintenance and repairs.

These two mowers, as well as the New Aristocrat greens mower and all the other PENNSYLVANIA mowers for golf courses, are pictured and described in our attractive new GOLF CATALOG, which will be sent promptly on request.

The Most Skillfully Made Golf Ball in the World

This is the Laboratory of the United States Rubber Company at Providence, R. I. — no golf balls are made in this building.

SCIENCE—not guesswork builds the "U. S." Royal

IN this great Laboratory a staff of technical men is constantly testing materials and methods, constantly checking the actual production of "U. S." Royals.

The "U. S." Royal is a *scientifically developed* ball. Its tremendous distance, its resistance to cutting, its remarkable accuracy are the result of knowledge—not chance. Thousands upon thousands of dollars, countless hours of effort have been put into making it the ball it is today.

It is a better ball because it is *better made, of better materials, by better methods.*

United States  Rubber Company

Manufacturers also of "U. S." ROYAL TIRES, "U. S." ROYAL HOSE for golf courses, "U. S." SPORT SOLES, "U. S." TIGER and FAIRWAY GOLF BALLS

"U.S." ROYAL GOLF BALLS

THE SLOW ROTARY

IRRIGATION SERVICE

FOR MANY YEARS TO COME

1929 — 1930 — 1935 — 1940 —

The SLOW ROTARY was carefully designed and slowly developed under all conditions of Golf Course service.

It is built of high grade, non-corrosive metals (Phosphor Bronze, Brass and Monel) and successful long running tests (1000 hours) insure its long life and durability.

Every demonstration is an advertisement of its outstanding features—SLOW TURNING—EVEN DISTRIBUTION—WIDE COVERAGE—LOW PROJECTION.

When may we place a SLOW ROTARY at your disposal for trial? Please state the flowing water pressure and size of hose coupling.

Inquiries solicited, descriptive circular furnished upon request.

BEAN GOLF SPRAYERS

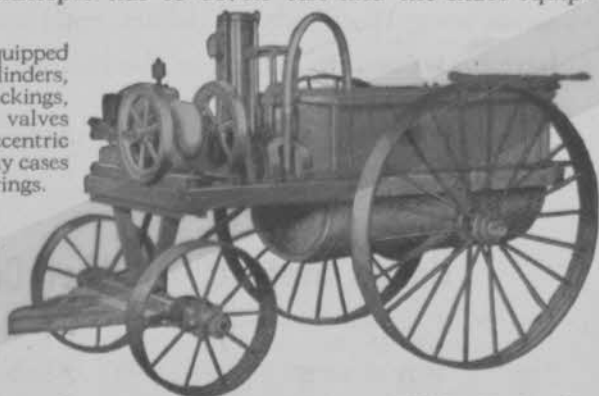

In handling materials for combating Brown Patch, and for the spraying of liquid fertilizers, Bean Golf Sprayers offer you the utmost in efficiency and economy.

The Bean line of Sprayers and Dusters, nozzles, hose and accessories, is so complete and so designed, that regardless of the amount or kind of work that the greenkeeper has to do, he can find the exact equipment he needs.

Bean Golf Sprayers are equipped with Porcelain lined cylinders, combination plunger packings, clamp style of threadless valves with reversible seats, eccentric drive, and in a great many cases with Timken Roller Bearings.

We can furnish these machines with divided tanks and gauge glasses. All Bean Golf Sprayers have wide tires.

We suggest you ask your jobber for complete information or write to us

Company-owned from coast to coast, the International Harvester Branches stand by the McCormick-Deering "FAIRWAY"

The FAIRWAY delivers its ample power three ways—through drawbar, belt and power take-off. It is in itself a roller; wheels do not track, the weight being distributed to all 4 wheels. Has special flexible in-built 7-foot mower for the rough. With gang of mowers it cuts 75 to 100 acres a day. Pulls rollers, compact distributors, wagons. Ready for heavier jobs, plowing, disking, seeding etc.; moves dirt, materials and all equipment.

OVER and above the inspiration in design, the mechanical perfection, and the utility of this new golf-course tractor, we call attention to the value of International Harvester service.

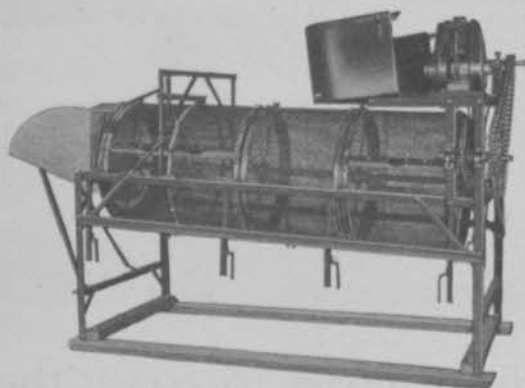

The world's finest mechanical product is finer when service is always quickly available for it. That is a fundamental principle with this Company, and our truck and tractor customers by the scores of thousands warmly attest its cash value to them. With the versatility of the McCormick-Deering "Fairway" each owner acquires also service *unexcelled*.

Solve your all-year power problem for country club, park, or estate by putting the "Fairway" on the job. But ask for a demonstration first. Wanting the tractor or not, after seeing, is strictly up to you. Catalog sent on request.

Economical and Efficient Golf Course Drainage!

"POROSWALL" Rapid Drain Pipe is more quickly and more economically placed, as the result of its tight joints. No time is lost getting alignment because the concave-end of one length fits automatically into the convex-end of the next.

Laying is economical, too, because coarse, sandy, bank-run gravel may be used as backfill which is readily available nearly everywhere. Crushed stone, which is not only expensive but difficult to obtain near at hand, is not necessary for this purpose.

With Pyrofax

Every Country Club can have GENUINE GAS and a genuine gas range for cooking

AND with such perfect cooking service you will always find a satisfied, and most satisfactory, chef. For Pyrofax cuts cooking time in half, adds great convenience and makes any menu possible. It's real gas that fries and broils and roasts to perfection—quickly! Excellent for a la carte service.

Pyrofax Gas is the ideal fuel for every club, institution or home beyond the reach of city gas mains. It is delivered in steel cylinders which hold an ample supply of gas and which are kept in a neat steel cabinet outside the building. A nationally organized delivery service assures Pyrofax users of prompt, dependable attention.

Pyrofax is not another liquid fuel. It is real gas, like city gas. Hot! Quick! Clean!

You can have this perfect cooking service installed without inconvenience or delay. Any genuine gas range can be used. Choose whatever type is most suitable. A real gas range makes a marvelous difference in a club's kitchen and in dining service. Talk to a Pyrofax dealer about it.

A small down payment—as little as \$37.50—enables you to start cooking with gas at once. Spread balance over a full year, if you like. Pyrofax equipment, including gas range of your choice and complete installation, is surprisingly low priced. Return the coupon.

THE SENSIBLE HOSE

for Golf Clubs

Green is the sensible color for golf club hose. No longer need you lay unsightly piping on your greens and fairways. Green hose blends with backgrounds, modestly hides itself, does not obtrude.

Goodyear "Emerald Cord" Hose—ask for it by name—is sensible in structure as well as in appearance. No money was spared to make it the finest hose for watering purposes anywhere obtainable. Its green color is indicative of the good sense characterizing every part of the hose, is surface token of inner excellence.

No other golf club hose is so well-fortified against wear and damage as this new Goodyear "Emerald Cord." Heavy length-wise ribs gird it round-about, ward off sharp

edges, defy all kinks. Kinks and kink-breaks simply cannot happen in this new hose—the heavy ribs resiliently writhe down obstructions, permit free water flow.

No other golf club hose has "double-double" cotton cords as body base. No other has such long-lived rubber to grip and hold season after season, such persistent serviceability. No other hose presents such a handsome appearance.

From every point of view Goodyear "Emerald Cord" Hose is the sensible hose for golf clubs. It is the right hose for you to specify this season for your playing grounds—a green hose for green grounds. Available in $\frac{5}{8}$ ", $\frac{3}{4}$ ", and 1" capacities and in lengths to 500 ft.

For specifications or other information about Goodyear Hose for Golf Clubs write Goodyear, Akron, O., or Los Angeles, California

When water
runs backward
in your drains---

stop it!
with Calco Automatic
Drainage Gates

FLOOD or tide water often turns drains into an actual menace. The drain may in fact flood the property it is supposed to protect. This danger can be avoided by the simple precaution of providing a drainage outlet of Armco Corrugated Iron Pipe with a Calco Automatic Drainage Gate. The heavy cast iron Calco Gate is accurately balanced on heavy hinges to permit free drainage, but the moment the pressure is reversed, the gate closes tightly. There can be no backflow. Calco Automatic Drainage Gates can be furnished in sizes from 8 to 84 inches. Your name and address will bring a bulletin giving complete information.

Armco culverts and drains are manufactured from the Armco Ingot Iron of The American Rolling Mill Company and always bear its brand.
