

## This easy-running Fairway Quint has five easy-running units!

The five interchangeable mower units of the tractor-pulled PENNSYLVANIA "New" Fairway Quint insure maximum speed with minimum power because:—

The construction of the wheel-type unit is such that it can be made much lighter than the "forward cut" or roller type without sacrificing the strength which is indispensable at high speeds;

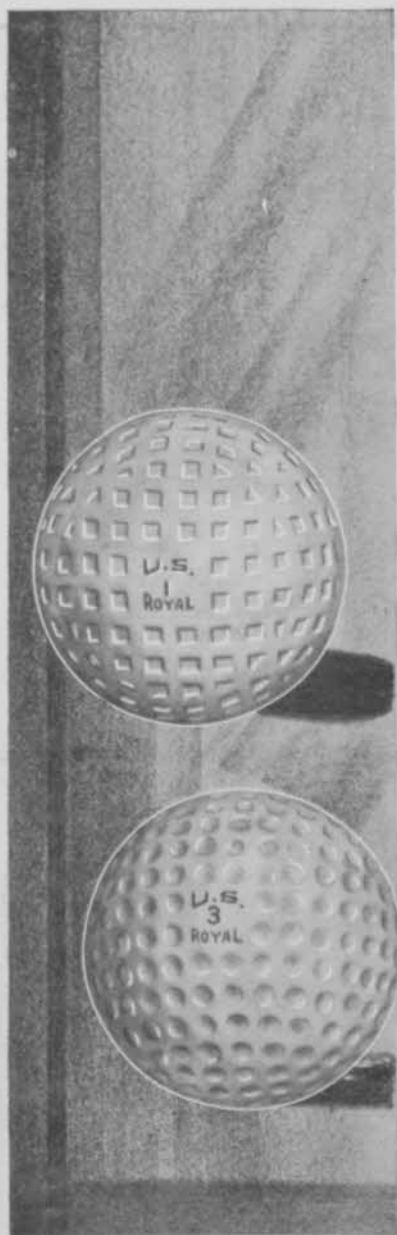

Every moving part is on roller or ball bearings except the ground rollers, which are on hardened steel bearings. Therefore, there is less strain on the tractor and more work done with a given amount of power;

All bearings and gears are in dirt-proof, oil-retaining housings;

The lubrication throughout is Alemite.

An attractive, new GOLF CATALOG, which is yours for the asking, pictures and describes the "New" Fairway Quint and Trio, the Super Roller and New Aristocrat greens mowers and all the other Pennsylvania Quality Mowers for Golf Courses.

**PENNSYLVANIA LAWN MOWER WORKS**  
1628 North 23rd Street, Philadelphia, Pa.

THE golfer who asks you to recommend a golf ball shows his confidence in your knowledge and judgment. Recommend the "U. S." Royal—a ball that will prove to him that his confidence is well placed.

The "U. S." Royal is more than a good golf ball. It is a *fine* ball—as fine a ball as can be produced. It is the truest putting golf ball made and as true in flight as on the green. Its cover and paint stand the gaff of round after round.

And as for distance, testing machines at our proving grounds establish the fact that the "U. S." Royal consistently out-drives any other make of golf ball.

When you sell a "U. S." Royal to a golfer you are introducing him to a ball in which he can have full confidence—one that will bring him home a winner.

## Matchless Golf-Course Power Ever Ready, the Year 'Round

The FAIRWAY delivers its ample power three ways—through drawbar, belt and power take-off. It is in itself a roller; wheels do not track, the weight being distributed to all 4 wheels. Has special flexible in-built 7-foot mower for the rough. With gang of mowers it cuts 75 to 100 acres a day. Pulls rollers, compact distributors, wagons. Ready for heavier jobs, plowing, disking, seeding, etc.; moves dirt, materials and all equipment.

YOUR canvass of the entire field will disclose nothing like the compact and nimble McCormick-Deering "Fairway," the golf-course tractor built, sold, and serviced by International Harvester.

This tractor, closely akin in power plant and general quality to the race of McCormick-Deering tractors, and expertly designed for its special job, demonstrates year-round utility of great range. Its rugged, vibration-free, 4-cylinder engine is economical in operation and supplies abundant, smooth, dependable power. Its exclusive square-turn design (turns in 8 ft. radius) makes for easy control, fast and clean work in tight corners, and it cuts hand labor to the minimum.

A demonstration, without obligation, is at your service. And, speaking of Service, our great Company-owned branch organization and dealers everywhere assure uninterrupted satisfaction from every "Fairway."

## For the Control of Brown-patch

**TURFCALOMEL** is the outcome of experiments to determine the most satisfactory, efficient, convenient, and safest fungicide for both large and small brown-patch. It contains both corrosive sublimate and very finely powdered calomel carefully adjusted in composition with mineral matter. This composition has distinct advantages. It prevents caking, gives bulk, and allows of a more even distribution of the active ingredients—thus reducing to the minimum any possibility of burning the turf. The same results cannot be obtained with the chemicals either alone or mixed with sand or compost.

## Every Club Professional

## should have a copy of this FREE BOOKLET

How to grow velvety, weedless greens; how to convert worn-out farm land into smooth, beautiful fairway; how to get rid of chickweed and white clover—these and other common greens committee questions are answered in our free booklet, "Arcadian Sulphate of Ammonia on the Golf Course."

This valuable booklet "speaks from experience." It quotes from the investigations of the Green Section of the U. S. Golf Association and gives helpful advice by leading golf engineers—written so you can understand it.

Every greens committee and club professional should have a copy. Mail the coupon for yours today.

## ARCADIAN Reg. U.S. Pat. Off. Sulphate of Ammonia

Sulphate of Ammonia is the standard turf fertilizer at hundreds of leading golf courses all over the country. It promotes a vigorous stand of grass and at the same time discourages the growth of weeds. It is easy to apply and makes no muss on the course—causes no inconvenience to the players.

Devereux Emmet writes as follows: "In our practice we strongly recommend and use Ammonium Sulphate (Sulphate of Ammonia) not only as a fertilizer on golf courses, but also as a means of making soil on putting greens sour enough to discourage the weeds, particularly white clover."

# *better* turf

FERTILIZE now, at the beginning of the growing season, and you'll get thick, healthy turf that will bring your course through the season in wonderful shape.

*Experienced greenkeepers use—*

## PREMIER POULTRY MANURE

*for fairways and greens*

Best for golf turf because:

—It is a natural grass food and stimulant.

It is a balanced manure containing 8% Ammonia, 2.50% Phosphoric Acid and 1 to 2% Potash.

It contains no live weed seeds.

Being organic, it aids humus and aids bacterial action.

It can be applied with a minimum of labor and expense.

Being more soluble than other manures, it is more available.

Being finely pulverized, it is quickly absorbed into the soil.

Write for literature describing Premier Brand Pulverized Poultry Manure and best methods of application.

A nearby dealer is ready to fulfill your requirements—write for his name.
