# SMOOTHER OPERATION

---

---

## *and SMOOTHER GREENS*

---

There are four reasons why the Ideal Greens-mower can out-perform any other mower of its type. It is lighter. It cuts smoothly. It pushes easily. It is simple to sharpen or service.

The side frames and rollers are aluminum. The 4-inch high speed reel has four blades. The bearings are the best procurable.

No detail has been overlooked to make this precision-built instrument flawless in operation. Better workmanship comes naturally. Send today for illustrated details. A demonstration can be arranged for your approval.
