A REAL GUIDE TO GOLFLAND

THE AUTHENTIC YEAR BOOK OF THE GAME IN AMERICA

This book is the only annual publication of its kind published in the United States. Cloth bound, over 600 pages, freely illustrated with portraits of leading amateur and professional golfers, making it an invaluable work of reference for every golfer.

It contains among many features:

FIRST—A directory of American golf clubs in every State and Territory, also Canadian golf clubs, giving names of officials, descriptions of courses, visitors' privileges, fees and other desired information.

SECOND—The results of important tournaments and championships from the beginning of the game in America.

THIRD—A general summary of Golf of the year in the United States and Canada by recognized authorities of the game.

FOURTH—The leading champions and their records.

FIFTH-List of national, sectional, state and district champions.

SIXTH—The leading professionals and clubs they are with.

SEVENTH-Trade Directory. Listing Manufacturers and Dealers in "Everything for the Golfer."

EIGHTH-The latest rules of the game.

Price \$3.00 postpaid

LEWIS GOLF BALL WASHERS

at every tee! Standard equipment for golf courses in the United States and Canada...The LEWIS GOLF BALL WASHERS has stood the test for five years and Mr. Golfer demands it at his club . . . But are you providing one at every tee; two at the first and tenth and two at the congested water holes?

It is economy for your members to properly distribute Lewis Washers . . . Play is speeded up as fewer white balls are lost . . . Have you seen the new pat-ented automatic brush adjustment? It also fits old WASHERS. Write for price list and literature.

Olympia's Colony Rules

(Continued from page 30)

Members of Terrace must empty all slop pails in service house.

A charge will be made for any special service rendered. Members are requested not to ask Club employes to perform any such service, but to file their requests with the Club manager. All employes have been instructed accordingly.

Any infringements of the above regulations will be acted upon according to the by-laws governing the conduct of members. Penalty for second offense will be the loss

of cottage privileges.

In the line of improvements, the Terrace is wired for electric lights and each cottage is permitted as many outlets as desired. This current serves to operate electric heaters in the early spring and late fall when the evenings are chilly. A master meter records the amount of electricity consumed during the season by the colony as a whole and each fall the cottage owners are billed for the cost on a pro-rata basis, with no attempt to equalize the amounts consumed by each individual cottage.

No running water is permitted in the cottages, but a pipe line runs through the center of the colony and convenient faucets and drinking fountains are located along its length. In the center of the colony are toilet rooms for the convenience of the residents; sewage flows through septic filters (which the club put in at an expense of \$3,500) and out in sanitary. odorless and colorless condition into the club creek which flows along one side of the area.

Automobiles are permitted to drive onto the Terrace, during the daytime only, for purposes of loading or unloading supplies.

JOHN H. VESTAL COMPANY 703 South La Salle Street - Chicago

Racks HANDICAP Cards

John Willy Handicap Racks and Cards are standard with practically all the leading American golf clubs. Write for booklet.

OHN WILLY, 443 South Dearborn Street,

At night the graveled pathways are illuminated by shaded light globes and may be used by pedestrians only. A watchman patrols the area and enforces, when necessary, the regulations.

Obviously the Terrace must be kept in apple-pie order at all times and must be maintained in harmony with the beautiful landscaping which prevails throughout Olympia's grounds. For this purpose, and also to serve as handy-men to make minor repairs to the cottages, a superintendent and two helpers are on constant duty throughout the season. They mow the grass, trim the shrubbery, water and cultivate the many flower beds which form an important part of the landscaping scheme, and perform such other work as is necessary to maintain the area.

There is harmony but no uniformity to the size or design of the cottages. There are small, unpretentious ones with a single 10x12-ft. room which cost not over \$500 to erect. At the other extreme, there are really palatial structures handsomely finished and furnished, of the maximum 368 sq. ft. of ground area, which cost their owners better than \$5,000 to complete. The great majority of the homes, however, run around \$1,500, for which figure it is possible to erect a very comfortable, homelike cottage containing two 10x12-ft. rooms, a clothes-closet, a small porch, and French windows all around.

Olympia could well afford to donate the sites for the erection of these cottages, but has never found this necessary. Members are perfectly willing to pay the small ground rent (now 35c per sq. ft) which even with the largest structure permitted. runs only \$128.00 per year, cheap enough rental for, if desired, seven months' residence in ideal surroundings for a summer home. As a matter of fact, the colony rentals amount to approximately \$9,000 yearly and the club's treasury is enriched over \$4,000 each season after expenses, which run around \$5,000, have been de-Just how much the club gains ducted. indirectly through increased departmental business cannot be computed.

better turf

Now is the time to carefully study your greens and fairway fertilizing requirements. Lay the foundation for better turf by using a grass food of tried and proven worth—

Premier Poultry Manure

is a natural grass food and stimulant that has proven its permanent value as a builder of thick, healthy golf turf.

On hundreds of courses, under widely varying soil and climatic conditions, Premier Poultry Manure has given highly satisfactory results for many years.

Best for turf because:

-It is a natural grass food and stimulant.

It is a balanced manure containing 6% Ammonia, 2.50% Phosphoric Acid and 1 to 2% Potash.

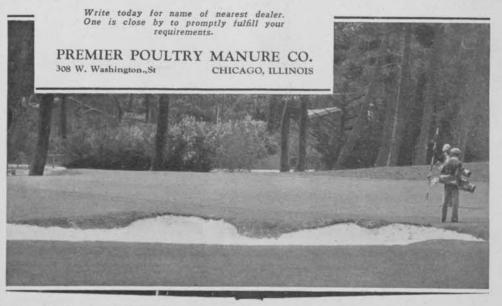

It contains no live weed seeds.

Being organic, it aids humus and aids bacterial action.

It can be applied with a minimum of labor and expense.

Being more soluble than other manures, it is more available.

Being finely pulverized, it is quickly absorbed into the soil.

PREMIER POULTRY MANURE
