

*They're
Self-
Adjusting!*

Smooth operation is permanently assured with F. & N. TITAN Fairway Mowers because they are equipped with the patented F. & N. Self-Adjusting Device in the revolving reel. It eliminates troublesome adjusting of these bearings.

The F. & N. Putting Green Mower

For producing those velvety smooth greens so essential today, greenskeepers say the F. & N. Putting Green Mower is the finest ever produced. Lighter and easier running than ever. It embodies self-adjusting SKF reel bearings, alomite oiling, etc. Rubber-tired carriage for transporting is furnished with it.

"We weed for You"

Weeds in a golf course are costly. The time to start cutting down on their cost is when you buy your seed. When you buy impure grass seeds for your greens or fairways, you begin right then to pay for weeds and you keep on paying for them in bills for labor, renovation, etc., for years to come.

It pays to know—definitely and exactly—the quality of the seed you buy.

That is why the Albert Dickinson Company maintains the finest commercial seed testing laboratories in America—so that they can definitely control, and can tell you the exact quality of every lot of seed.

Grass Seeds

Grass seeds of known quality, purity and vitality—refined and tested by Dickinson, are available at all times in season.

Kentucky Blue Grass	Wood Meadow Grass
Fancy Red Top	Rough-stalked
Chewing's Fescue	Meadow
South German	Meadow Fescue
Mixed Bent	Bermuda Grass
Colonial Bent	Pacey's Rye Grass
Sheep's Fescue	Italian Rye Grass
Crested Dogstail	Domestic Rye Grass

Specify genuine Dickinson Golf Quality seeds of your local dealer. For samples, seeding information, and other information, write

Golfers...

Enjoy the Protection of this Shelter House

When the sun is blazing, when an unexpected storm blows up or when golfers get just plain tired—those are the times when a Hartmann-Sanders Shelter House is invaluable.

Not only do they provide greatly increased comfort—they distinctly add to the beauty and dignity of the entire course. Each Shelter House is the finest of its kind. The materials are the best, the workmanship is the best. The designs are the product of highly trained men whose sole duty is to create for Hartmann-Sanders.

Each Hartmann-Sanders Shelter supported by columns uses the famous Koll Lock-Joint Column which cannot come apart.

All of our equipment comes painted ready to assemble. There is no chance to go wrong!

A BOOKLET OF
PERGOLAS AND GARDEN
HOUSES WILL BE SENT
UPON REQUEST

We have published a large, profusely illustrated book which offers countless suggestions to those who seek distinction in their home surroundings. It shows page after page of beautiful pergolas, garden houses, ornamental fences, garden entrances, seats, rose arbors, trellises, columns and garden accessories of all kinds. For the booklet, send 30 cents to

~~High Pressure~~ WATER "Makes or Breaks" the GOLF CLUB

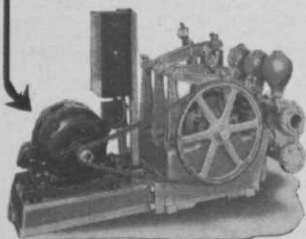

Velvety greens, thick, grass carpeted fairways—invigorating showers in the house—these make the golf club. And they all depend on *high pressure water*. High pressure water also means **real fire protection**.

A Kewanee System gives *all* the water needed, fresh and clear, *every place* that water is wanted.

KEWANEE HIGH PRESSURE WATER SYSTEMS

Many distinctive features make them run smoothly, with a minimum of power and without "breakdowns" or replacements. For instance: Every bearing point is bronze bushed, easily replaced: Every part is made for every other part, accurately machined, ground, fitted and tested before the outfit goes out.

200 Models and sizes — there's one just right for every club.

In our engineering department are engineers who have worked out the details for many of the finest clubs in the country. They are at your service. Merely write.

The Duffers do! Damage Enough!

Why pay good money to have the course dug up

Why have your golf course constantly dug up, laying new pipe—when it is unnecessary? Cast Iron Pipe does not rust or deteriorate, causing replacements. Once laid, it can be forgotten and the course kept in good condition.

Clow-National Two-Inch pipe is ideal for golf courses and is widely used. Equipped with several different type joints, it is easy to lay—by ordinary, unskilled labor.

Permanent Drainage Protects the Play

MANY unfair penalties in the score, as well as added maintenance, are caused by inadequate sub-drainage.

Drainage methods, and drain pipe materials that were tolerated a few years ago, do not meet the requirements of the modern game. There can be no interruptions in the play by the pick and shovel gang.

Today's game requires permanent drainage with Toncan Iron perforated drain pipe. It has several outstanding advantages that protect the play and lower maintenance costs.

It will last longer — for Toncan (alloy) Iron resists rusting and soil corrosion. Thousands of tests prove it to be the longest-lasting drain pipe material.

It is strong, and flexible — proof against the heaviest rollers, and freezing soils — and easily handled and installed.

Both structurally and because of its alloy composition, Toncan Iron drain pipe provides permanent drainage.

It Pushes at a Finger Touch
...this Precision Built
Greensmower

With the skill and knowledge of over ten years, building grass-cutting equipment, Ideal has designed and built their finest Greensmower.

Operators find it the lightest-running they ever used. Greenskeepers find it has a frequency of cut that leaves the grass, more even—with an absence of those tiny waves and ripples.

The reasons are: *ball-bearings of highest quality, aluminum frame and roller, keen-edged, seven-blade, high speed cutting reel.* Send today for the details on this outstanding mower.

IDEAL GOLF COURSE EQUIPMENT

The Simple Bulldog Drive

Insures Freedom From High Repair Bills

The low wheels on the Bulldog cutting unit permit a simple pinion-and-pawl drive. High wheeled mowers necessitate a chain-of-gears drive that can cost high when it goes wrong. Bulldog repairs can be made quickly, right on the job.

In addition the Bulldog drive cuts wear in half by driving from *both* wheels on each cutting unit. (Most mowers drive by just one wheel.)

That is just one of the five special reasons why Ideal Bulldogs mean smoother, healthier, fairways at lower cost per season. Send today for illustrated details.
