

Why Mr. Schupkagel

selected Nitrophoska

THE reasons why Conrad Schupkagel, builder and greenkeeper of the Royal Pine Golf and Country Club, Pinewald, New Jersey, has chosen Nitrophoska to fertilize his fairways will be of interest to every other greenkeeper and greens committee chairman.

This winter, Mr. Schupkagel took the short course for greenkeepers at New Jersey State Agricultural College. He learned there that there are three important points to consider in choosing fertilizer for fairways: (1) high-analysis fertilizer is most economical, (2) water-soluble fertilizer is most effective, (3) good mechanical condition insures even distribution and ease of application.

When Mr. Schupkagel put these measuring sticks up against different fertilizers he found that Nitrophoska filled every requirement. Nitrophoska 15-30-15 is a high-analysis complete fertilizer which supplies plant-food at low acre-cost. It is water-soluble and, therefore, it feeds the grass quickly, thickens up the sod and maintains a good turf. It is granular, free-flowing—easily distributed.

These reasons why Mr. Schupkagel has chosen Nitrophoska are exactly the same reasons why you should choose it for your fairways. A spring application of 200 pounds per acre is sufficient. Early application produces best results. It is time now to order Nitrophoska from your supply dealer or direct from us. Synthetic Nitrogen Products Corp., 285 Madison Avenue, New York.

UREA

Urea is recommended by the Greens Section of the U. S. Golf Association. It contains 46% nitrogen and is easily soluble in water. It furnishes soluble organic nitrogen in the same form as the nitrogen in liquid manure, and is long-lasting in its effect.

LEUNAPHOS

Contains 20% nitrogen and 20% phosphoric acid—a concentrated fertilizer, excellent for use where a fertilizer without potash is preferred. Use at the rate of 100 to 200 pounds per acre.

SYNTHETIC

SULPHATE OF AMMONIA

A high quality product—pure, clean and dry. Practically acid-free. White in color. Packed in 100-pound bags.
