

# “Your Tractor Has Paid For Itself in One Year’s Operation”

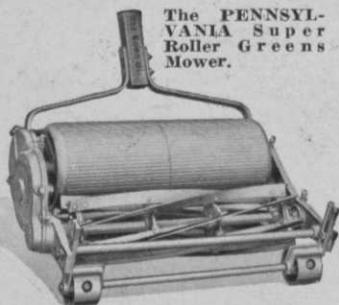

The 6-cylinder PENNSYLVANIA Tractor pulling the PENNSYLVANIA Fairway Quint (quickly convertible).

“By using one of your PENNSYLVANIA Tractors for the past year,” writes Mr. H. F. Jewson, Superintendent of the Roxborough Country Club, in suburban Philadelphia, “*we have saved over three hundred dollars in gas and oil.*”

“We also cut down our mowing time to just half that required with our old tractor. **WE FIGURE YOUR TRACTOR HAS PAID FOR ITSELF IN JUST ONE YEAR’S OPERATION.**”

The complete story of the 6-cylinder PENNSYLVANIA Tractor is contained in our attractive new GOLF CATALOG, which also pictures and describes all the PENNSYLVANIA Mowers for greens, fairways and tees. Write today for your copy.

# Have You Weighed All the Advantages of FAIRWAY IRRIGATION?

**W**HY should fairways be watered? Here's the answer. Because first of all, watered fairways bring greatly increased enjoyment to the players. Golf on smooth, green, cool, beautiful fairways is really golf. Club patronage increases—both men and women. There are more guests and guest fees. And over and above all these direct advantages to player-members, every operative department of the club benefits.

Clubs with watered fairways quickly get social standing. It is easy to arrange sports and pastimes. The membership committee finds its problems solving themselves. The finance committee finds far better revenues coming in. It's worth your time to consider these facts. First-class clubs tomorrow will all have irrigated fairways.

Remember, too, that hoseless irrigation—requiring only one man to operate—can now be installed at no greater expense than dependable hose construction. Operating costs are far less.

Why not have our experienced engineers tell you exactly what it would cost you to install and operate an irrigation system for your fairways? No guesswork.

*Write for full information. No obligation. Simply say, "Send me the latest facts about fairway irrigation."*

# DO IT NOW!

Prepare to Give Your  
Fairways

## REAL IRRIGATION

That's what counts. Irregular watering, unevenly distributed, cannot keep grass in its best condition through the hot, dry months. But there is a way to do it. Water your fairways with Buckner Sprinklers. They cost no more than the other hose sprinklers, and quickly save that cost through cutting down labor and water bills.

Players will thank the men responsible for the velvety, green fairways which will be theirs continually thereafter.

*Write for catalog. No obligation.*

*The most modern irrigation system in the world—the Buckner one-man system.*

### *There's Nothing Like It*

The Roto Washer is different from any other golf ball washer on the market. There is no wood or tin container—no fibre brushes. All integral parts are of bronze or aluminum—carefully designed and carefully built. The brushes are of genuine Russian pig bristles.

### *"Smart" and Handsome*

The Roto Washer is not only quick and efficient in operation, but is attractive and neat in appearance. It is finished in white enamel, with green stripes. When mounted on the Uni-T-Stand it adds prestige and is a much appreciated convenience.

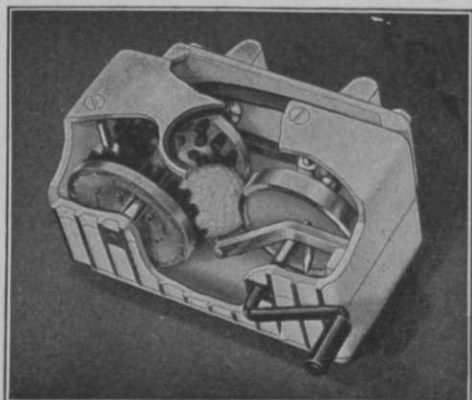

### *Two Year Guarantee*

The Roto Washer is guaranteed for two years, and many of the country's leading golf clubs have now standardized on this washer in conjunction with the well known Uni-T-Stand. Write today for descriptive literature, or see your dealer.

# The Fairway Will Solve Your Problems, Too

*The Port Jervis Country Club has many sidehills like this one but the Fairway Tractor mows the grass on them as easily as it does on the level.*

"**T**HE McCormick-Deering FAIRWAY Tractor has solved many of my problems," says Charles L. Hackett, professional at the Port Jervis, N. Y., Country Club, which bought a FAIRWAY Tractor this Spring. "We have a very heavy rough on our course and always had to hire a farmer to mow it for us. Some times he came but at other times he was too busy. The rough grew so high that the players were complaining about lost balls.

"Now all of that trouble is over. With the FAIRWAY Tractor we cut the rough ourselves whenever it is needed. I am being complimented by every one

for the fine condition of the course. The FAIRWAY Tractor can't be beat on the fairways as its wide wheels roll the turf and spike it also. Fred Bailey, chairman of the greens committee, is very much pleased with it."

Mr. Hackett's enthusiasm for this tractor is typical of FAIRWAY owners. The FAIRWAY eliminates maintenance worries wherever it works, and it saves money at every turn. The nearest of 113 Company-owned branches in the United States and Canada, or a McCormick-Deering distributor or dealer will be glad to demonstrate the FAIRWAY for you. Write us for information.

## Two Outstanding Bents

### Cocoos Creeping Bent

This is the Bent that has made California greens famous, now in use from Coast to Coast. While Cocoos is botanically known as *Agrostis maritima*, it should be borne in mind that all strains of *Agrostis maritima* are **not** Cocoos Bent. We offer the **true** Cocoos Bent, the finest of the *Agrostis maritima* grasses—over 99% pure.

1 lb. \$2.50, 10 lbs. \$22.50, 100 lbs. \$200.00

### Triple A Bent

This is a comparatively new strain of *Agrostis capillaris* that produces turf of the same beautiful color and texture as Velvet Bent. The seed we offer has been remachined for the elimination of weed seeds and has a purity of over 99%. It has been an outstanding plot at our trial grounds.

1 lb. \$2.25, 10 lbs. \$20.00, 100 lbs. \$185.00

### Other Turf Producing Grasses

## Grass Seed of Known Quality

**WEED-FREE  
KENTUCKY BLUE GRASS  
BEFORE STRIPPING**

## Why Scott's Seed Is Always Pure

Even the most thorough recleaning methods will not remove the last single weed seed. So careful selection is highly important. Above is part of a beautiful field of Kentucky Blue Grass, eight miles from Marysville, before our own men stripped it.

Whether Scott Seeds come from eight or eight thousand miles, the same vigilance in selection, the same insistence on purity is zealously maintained.

Pure seed is most economical. Less is required per acre, and the problem of weed control on the golf course is inexpensively solved. Scott's Seed takes you by the shortest cut to thick, velvety, weed-free turf, as 1,200 golf clubs can testify.

Our prices are very much lower this fall. *Now*--thicken fairway or stretch out the course. Write for prices.

*When you install your fairway irrigation system—sow Scott's Seed*

O. M. SCOTT & SONS

*Our latest booklet, "The Putting Green," will soon be ready.  
Ask for your copy.*

*your* **TURF**  
*will be as good next spring  
 as the feeding you give it  
 this fall!*

¶ It is a natural grass food and stimulant. ¶ It is a balanced manure containing 6% Ammonia, 2.50% Phosphoric Acid and 1 to 2% Potash. ¶ It contains no live weed seeds. ¶ Being organic, it aids humus and aids bacterial action. ¶ It can be applied with a minimum of labor and expense. ¶ Being more soluble than other manures, it is more available. ¶ Being finely pulverized, it is quickly absorbed into the soil.

**T**HE rigors of winter, the severe and sudden changes of spring, the dry, hot spells of summer . . . they're tough on turf . . . and so is the wear and tear of a season's play. It takes healthy, hardy grass to stand the gaff and still look and act the part of perfect greens and fairways.

Healthy green and fairway turf is not a mere matter of desire . . . it's the down-right determination to build-it-up by feeding. Feed your greens and fairways this fall and you'll have more, and healthier turf next spring, and weeks earlier, too.

## **Premier Poultry Manure**

—a natural grass food for greens and fairway turf; proven dependable by years of successful use on hundreds of courses throughout the United States.

# The TORO Del Monte Greens Rake

---

## Every Golf Club should have these Toro Tools as part of regular equipment

**F**OR removing the grain from creeping bent or Bermuda grass putting greens . . . also for raking up the matted grass so the mower can cut it properly . . . the Del Monte Greens Rake is an exceedingly handy tool. Thirty inches wide . . . a large green can be covered quickly. Spring steel teeth,  $\frac{1}{2}$  inch apart. Pressure can be regulated by operator. Use it regularly to prevent graining and maintain a true putting surface.

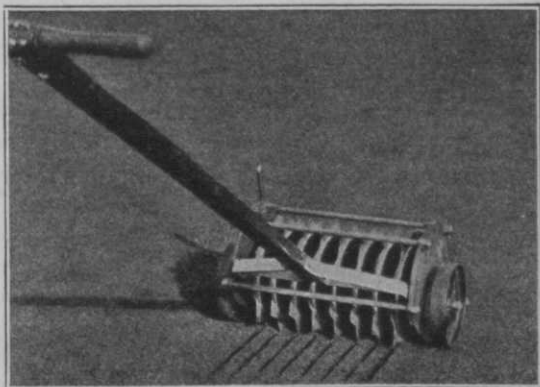

For cultivating putting greens without marring their beauty . . . to open the soil for light, air, water and top dressing and to prevent excessive souring . . . use the Toro Zenith Disker several times during the season. It cuts the running stooling grasses and weeds without injuring the turf.

*Write for complete catalog

# *Now..* **BARBAK 211**

## **TURF DISINFECTANT**

*sets a new, national record for sales!*

Already, the out-and-out demand for BARBAK 211 has far exceeded the volume set by its manufacturers as the 1931 sales quota for the entire country . . . and the season is hardly half over!

*And our volume has exceeded our total annual sales of all other preventives now on the market.*

**B**UT three months ago we said "BARBAK 211 sales are bound to make history in the golf field." We knew, from thorough investigation of this new and better product and from an intimate acquaintance with course maintenance men, that things would happen for the best when the two got together . . . they did!

Today, there is no doubt about the nation-wide adoption of BARBAK 211 as the most effective and economical Brown Patch preventive on the market.

No other turf disinfectant won such wide and such instant acceptance as did BARBAK 211.

"An ounce of prevention . . .", wire your BARBAK 211 order today at our expense, rather than a new green tomorrow.

Hardly had it made its bow when it was put to the supreme test by two of the most severe months on turf in the history of greenkeeping. During the past two months this new fungicide has saved and restored thousands of greens . . . and made hundreds of "bullet-proof" greenkeepers *BARBAK believers*, on the strength of results.

The nominal cost of BARBAK 211 and the extended period of thorough protection it affords means a decided saving of money, time and mind. Applied in solution or dry, mixed with top-dressing, sand or fertilizer and watered in.
