

The first gang mower built to automotive standards

The 6-cylinder PENNSYLVANIA Tractor pulling the PENNSYLVANIA Fairway Quint (quickly convertible.)

Unbreakable malleable iron for the entire frame of each mower unit, as well as for the pull-frame! This feature makes the PENNSYLVANIA Fairway Quint or Trio the first gang mower built to automotive standards and insures long service with small upkeep cost.

Other Fairway features include three cut gears on both sides in dust-proof cases, hardened steel ball and socket bearing for the ground roller and a choice of either 5-blade or 6-blade mower units.

Golfers DEMAND Irrigated Fairways

Another New Miller One-Man Hoseless System at Oak Park Country Club, Chicago.

WHY do clubs like these—Albany Country Club, Bay-side Links, Queens Valley Golf Club, Women's National Golf and Tennis Club, Oak Park Country Club, Columbus Army Depot, South Bend Country Club, and others—have irrigated fairways? The answer is, golfers are more and more demanding irrigation. Golf isn't real golf until fairways are watered. It will not be long until all first class golf courses have irrigated fairways.

Irrigation Brings These Advantages

Golfers who play over irrigated fairways will tell you that irrigation makes a vast difference the whole season through—in golf enjoyment.

Hoseless fairway irrigation more than denotes no expendable hose construction.

Clubs with irrigated fairways today are decidedly popular and outstanding in their communities.

New Low-Cost Irrigation Systems Available

Yesterday fairway irrigation systems were costly and results uncertain. Today new equipment is available and engineering experience that insures quick, certain results and minimum costs. Hoseless irrigation—requiring only one man to operate—can be installed at no greater expense than dependable hose construction. Operating costs are far less. The clubs above mentioned are using this system, recognized as the most efficient, economical and durable system available.

Write for full information. No obligation. Simply say, "Send me the latest facts about fairway irrigation."

BENT GRASS

You'll Get Better Results from *True Washington Strain*

You can depend on True, Washington Strain BENT GRASS to produce the same high quality of turf, *wherever used*. It is consistently "true to type."

Turf is established quickly. The rapid "spreading" resulting from *stolon planting* (in preference to seeding) prevents the growth of weeds and produces that true velvety texture without nap or grain that has given the highest satisfaction on many of the finest courses throughout the country.

Shipped shredded, ready for planting. Delivery in good condition guaranteed. Ask for list of courses in your vicinity that have used my stolons!

Good Work on a New Course

This is the McCormick-Deering FAIRWAY Tractor putting a fairway in condition on the Waubensie Golf Course.

THE Waubensie Golf Course, a 36-hole project under construction at Aurora, Ill., is being rushed to completion with the aid of a McCormick-Deering FAIRWAY Tractor. Confronted with the task of cutting the grass crop on the 260-acre course, W. A. Ohlhaber, manager, turned to the FAIRWAY Tractor as the easiest and quickest way to handle this job. He equipped it with the 7-foot built-in power mower operated from the power take-off on the tractor, and with a five-gang push-type mower. The grass on most of the fairways was thick and heavy at the first cutting but the FAIRWAY waded into the job and trimmed the

course down in a short time. Mr. Ohlhaber liked the way it performed right from the start and he is letting the FAIRWAY carry the burden of maintenance.

Put this versatile, flexible power plant on your own course and see how it reduces maintenance costs. It enables one man to control a lot of work and to do it faster and better than ever. See the FAIRWAY and ask for a demonstration at the nearest of 117 Company-owned branches in the United States and Canada, or at the showroom of a McCormick-Deering distributor or dealer. Write us for catalogs.

GOLF COURSE COMMONSENSE

By G. A. FARLEY

A complete manual of greenkeeping . . .

The golf field has waited long for this valuable and practical guide to good greenkeeping. It presents, for the first time, full details of the methods of the country's foremost greenkeepers in simple, usable form. "Golf Course Commonsense" tells you what the most successful greenkeepers and the leading turf scientists do to put and maintain courses in the top-notch condition demanded by exacting players and club officials.

Each chapter of the book is rich in working instructions based on a careful study of the methods employed by leaders in the course

This is the business book that is essential to the library of every greenkeeper, green-chairman, professional, supply man and manager interested in course maintenance.

construction and maintenance field.

HAVE SMOOTH VELVETY TURF!

Free from
**GRUBS
BEETLES
WORMS**

ALL of your hard work in endeavoring to make your course the pride of members may be wasted effort if effective measures are not taken to control grubs, beetles and earthworms. These pests can be eliminated with Dow Lead Arsenate.

Dow Lead Arsenate has proved its effectiveness time and again. During the past several years large quantities of this product have been used on numerous courses with extremely gratifying results. It is manufactured by a special Dow process to insure maximum effectiveness without harm to fine turf. Its use also discourages the growth of chickweed, fennel and other obnoxious weeds.

Be sure to use Dow Lead Arsenate. Order your supply now! We will gladly furnish further information upon request.

DOW LEAD ARSENATE

THE DOW CHEMICAL COMPANY
MIDLAND MICHIGAN

IT'S FOLLY TO NURSE WEEDS

Yet that's what happens when you sow impure seed. One pound of improperly cleaned seed may contain 10,000 or more weed seeds—to do serious damage.

Don't take chances with impure seed. Sow Scott's—carefully selected, thoroughly cleaned. It goes farther, produces thicker turf, is freer from weeds. Yet it's economical.

Prices this fall will be lower than in years. Thicken your fairways or add that new nine. Write for quotations, and for our valuable free booklet, "The Putting Green."

All varieties of seed for the course. Creeping Bent Stolons from our own nursery. Scott's Turf Builder, the ideal grass food.

"The new Trojans make a perfect cut and are undoubtedly a fine improvement" says *Samuel Lyle, Superintendent North Hills - Advisor University City Course, St. Louis, Missouri.*

"I HAVE had satisfactory use of thirteen of your Super mowers, starting with them seven years ago at North Hills Country Club, and they are still working every day.

"The new Trojans at the University City Municipal Course are undoubtedly an improvement. I like the throwout, the new bed knife adjustment, and the larger roller with easy change for height of cut. They are cutting perfectly and I believe their maintenance will be very economical."

Toro stands ready to help you with the finest line of well built machinery offered in this country. Why not write today?

Samuel Lyle, General Superintendent of North Hills, and Architect and Advisor of the new University City Course at St. Louis, is another prominent executive who has put his stamp of approval on the new Toro Trojan mowers.

Like many other progressive golf course superintendents, Mr. Lyle is constantly seeking better maintenance and in seeking better maintenance, good machinery plays a prominent part.
