

Total 2-year repair bill for Quint and two greens mowers-50c!

"The PENNSYLVANIA Quint we purchased two years ago," writes Mr. Wilbur Arnett, greenkeeper at the Bridgman Golf Club, Bridgman, Michigan, "has given wonderful satisfaction on fairways and rough. *The fairways improved greatly and we kept the rough at the right height all the time at a saving of more than half.* OUR TOTAL REPAIR BILL FOR THE TWO YEARS IS 50c!

"We also have two PENNSYLVANIA Super Roller greens mowers which have given *two years' satisfactory service with no expense.*

"After nine years as greenkeeper, I say, 'PENNSYLVANIA Mowers can't be beaten!'"

“Sure”, he said, “Every Worth-While Club Will Soon Have Watered Fairways”

One of the best informed golfers was recently asked if he believed it would really pay golf courses to install fairway irrigation systems. “Sure,” was his answer, “Every worthwhile club will soon have watered fairways.”

WATERED fairways do make a difference—a very great difference—smooth, green turf, the whole season through, perfect lies, easy walking, attractive landscape, satisfied members, a club outstanding in its community. Ask the members who play on watered fairways. They will tell you it means everything in the enjoyment of golf.

And just as watered fairways are best, there is one best way to do the irrigation work—that is to use the new MILLER ONE-MAN HOSELESS FAIRWAY IRRIGATION SYSTEM. It costs no more to install than dependable hose construction and it is the lowest-in-cost of all systems to operate.

Write today for full information. No obligation. Just say, “Send us the facts.”

Miller Rainfall System in Action. Note the even distribution of water.

CONSULTING ENGINEERS — SOIL TECHNOLOGISTS

Eastern Engineering Representatives . . . Buckner Manufacturing Company, Fresno, California

Castlewood Country Club, Pleasanton, California, showing the most modern irrigation system in the world—fairways, greens, tees, lawn area.

When You Buy SPRINKLERS

YOU have the right to demand the following advantages:

- 1 Definitely superior performance—with maximum efficiency and economy.
- 2 Positive slow speed control—with even distribution of water.
- 3 Satisfactory service over a long period of years—no gears, no delicate parts.
- 4 Greater areas covered—minimum of outlets necessary.
- 5 Sprinklers for every condition of golf course water supply and pressure.
- 6 Highest endorsement from users.

You can get all these advantages in Buckner equipment—and Buckner equipment alone can give them to you. That is why this equipment is used on more than 80% of the golf courses in California and on rapidly increasing numbers of courses East of the Rockies.

Write for catalog. No obligation.

Are your fairways thin and weedy?

IF SO, it's a pretty sure sign that there is not enough plant food available in the soil. A program of systematic feeding with Armour's Special Turf Fertilizer will help you develop the grasses you have into a vigorous green turf; will produce a deep, hardy root structure better able to withstand hard use and abuse. A thick, well-fed turf goes a long way toward controlling weeds.

Armour's Special Turf Fertilizer is complete and correctly balanced to *nourish* grass properly. Fairways fed with it take on new life. Greens stay velvety. And the whole course stands the heat and drought of summer better.

Well-developed turf on fairways and greens means satisfied golfers—more play—greater revenue.

We have prepared a booklet for you, "Solving The Turf Problem!" Write for it. It tells the value of a systematic feeding program.

Twenty-one conveniently located plants insure prompt delivery.

Ask for a Demonstration

McCormick-Deering Fairway Tractor mowing the fairway. Note the cutter bar of the 7-foot built-in power mower for cutting the rough. This can be quickly removed.

THIS is a good time to ask for a demonstration of the McCormick-Deering Fairway Tractor. Maintenance work is at its peak, giving you an opportunity to make every comparison between the Fairway and manual labor or other kinds of power you may be using. You can test its ability on your most important jobs. You can watch its performance closely, and you can check its consumption of fuel and oil.

Start the Fairway, get on the seat, drive it yourself. Drop the cutter bar of the built-in power mower in the rough and see how quickly this job can be done. Then hitch a gang of mowers to the Fairway and go up and down your fairways. Run up

close to shrubs and trees. Pick out the sharpest turn that has to be made on your course and see how the Fairway turns in an 8-foot radius. Drive it up hill and down for a test of its flexibility.

When you have driven the Fairway, measured its value, and made a fair comparison of it and the power you now use, we believe you will be convinced that the Fairway will save money for your club.

The nearest of 117 Company-owned branches in the United States and Canada, or a McCormick-Deering distributor or dealer will be glad to demonstrate it for you. And they will show you its many superior features. Write us for information.

SPIKE DISC

LAWN AND GREEN CULTIVATORS

Cultivate and Aerate
in One Operation

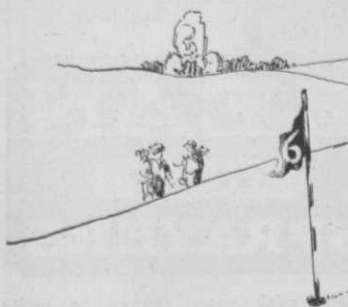

For Golf Courses, Lawns,
Parks, Athletic Fields, etc.

CUT SHOWS TRACTOR TYPE. MADE ALSO IN HORSE-DRAWN AND HAND MODELS

SPIKE DISC is the ideal implement for cultivating, reseeding, fertilizing, top dressing. Its steel teeth cultivate and aerate, preventing the surface of the ground from becoming hard-baked. This produces a moisture-retaining mulch. Seed and fertilizer settle in the perforations made by SPIKE DISC and are not blown or washed away. The thin teeth do not push back and harden the surrounding soil as do round or square spikes. For complete details and prices write to:

GRUBS
BETTER
WORMS

Copyright 1931 by Dow Chemical Company, Midland, Michigan

IF YOU USE
DOW LEAD ARSENATE

MANY golf clubs today owe their fine greens and fairways to a rigid policy of grub, beetle and earthworm control. Grubs, beetles and earthworms can be eliminated with Dow Lead Arsenate. An application of this specially prepared material will rid a heavily infested course of these ruinous pests. At the same time it will dis-

courage the growth of chickweed, crabgrass, fennel and other obnoxious weeds.

Dow Lead Arsenate is manufactured by a special Dow process to insure maximum effectiveness without harm to fine turf. Use it to put an end to grub infestation, worm casts and rough, weedy spots. Send your order in now—be prepared to keep your greens and fairways in condition every day of the season.

We will gladly send more detailed information

SPRINKLER

Next Best to Rain,

“Our members like the new Toro Tractor outfit” says *Thomas Dougherty, Supt. Springhaven Club, Philadelphia*

“FOR the first time in twelve years at Springhaven I have had a number of members voluntarily come and compliment me on selecting the Toro Junior Tractor and Trojan mowing outfit for use on our grounds. They like it, first because it looks and acts like a well built piece of machinery and second because it is absolutely quiet.

“The tractor is a wonder. My men use it for hauling sand, compost material, and general trucking around the course, in addition to all the mowing. It is powerful and fast and the dump box is the best thing we have ever used.

“The new Trojans are doing splendid work. They run light and hang to the ground better than any other mower we have ever used. The new adjustment is a peach—it is simple as A B C and stays locked.”

Mr. Dougherty's analysis of the Toro Junior Tractor and Trojan mowers should be given careful consideration by every progressive golf course Superintendent because it is a true expression from an actual user with years of practical experience behind him.

In these days of reduced budgets, machinery is playing a far more important part than it did a few years ago. The wise Superintendent today, instead of complaining over the loss of one or two men, is spending his time studying ways and means of making machinery do more and better work.

Toro stands ready to help you with the finest line of well built machinery offered in this country. Why not write today?

What They
Say about

SCOTT'S

TURF BUILDER

"We used Turf Builder on our greens last year and are using it again this year. Our experience has proved that Turf Builder is the ideal fertilizer for holding up color and developing healthy turf," writes Frank Balding, Greenkeeper at Sunnyside G. C., Decatur, Ill.

O. M. SCOTT & SONS CO.

Golf Course Seeds
Marysville, Ohio

Introduced last July "Come-Putts"

are already becoming standard equipment among golf clubs everywhere.

The country over, and in Europe, Hawaii, and the Philippines as well.

They fill a long-felt need for which nothing adequate has ever been offered before.

"Come-Putts," white special water-proofed composition rings of standard diameter, outline upper part of hole on golf green and make it plainly visible as much as forty feet away. Dress up greens, support turf around holes, make new holes needed less often. Non-resilient—bounce-proof—remove the "accidental hazard" of a misshapen or broken-down hole.

Golfers who have played courses that are "Come-Putts" equipped cannot help making comparisons if your course lacks this finishing touch.

 WILKES-BARRE, PA.

We Cut It Apart to
 Let You See How
 It Works

The new Roto Washer is simplicity itself. You drop your golf ball through the opening at the top. When you turn the crank, the wheel at the right rotates the ball. A V-shaped belt drives the brushes in the opposite direction, and the stiff brushes, of genuine Russian pig bristles dig into every recess and clean the ball in a jiffy.

Since the top is completely closed, except for an opening just large enough to admit the ball, it is impossible to splash your clothing or soil your hands.

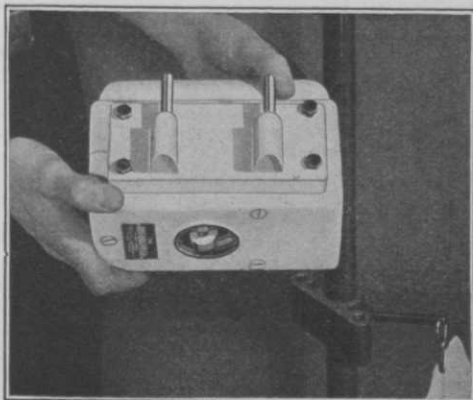

And when the ball has been cleaned you simply reverse the crank, and the ejector pushes the ball up through the opening right into your hand. To change water, the Roto Washer is simply lifted from its mounting as shown below.

The Roto Washer is guaranteed for two years. See your dealer, or write today for illustrated folder and price list.

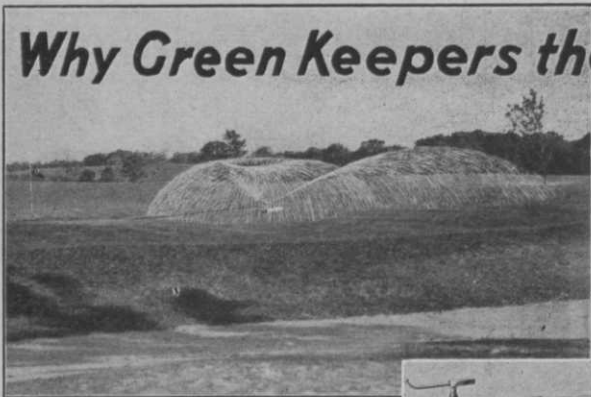

COGSDILL MANUFACTURING CO.

Detroit, Mich.

Why Green Keepers the World Over Prefer the LARK SPRINKLER

The above illustration shows the Lark in action. Note the wide area covered and the drenching spray that's "better than rain." The picture at the right is a close-up. Small arm whirls rapidly as entire sprinkler revolves. Made entirely of high grade bronze mounted on iron roller. Large arm has adjustable nozzle.

Price \$15 in the U. S. (Slightly higher in Canada and abroad.) Send at once for a trial sprinkler. You, too, will be delighted with the Lark!

GREENKEEPERS in the British Isles, Australia, Canada, and in every State in the Union use and recommend the Lark because—

1. It covers an area up to 150 feet in diameter.
2. Spreads water evenly at all pressures.
3. Gives the grass a thorough drenching. "Better than rain."
4. Made of long-lasting, non-corroding brass.
5. A scientifically designed sprinkler at low cost.

L.R. NELSON MFG. CO. INC. Peoria, Illinois

Strong Vigorous Bent Grass Stolons and Sod!

True Washington Strain

Unsurpassed for its fine velvety texture, without nap or grain, and particularly resistant to fungus. Developed under ideal nursery conditions, kept true to type and free from objectionable growth. Stolons are from strong, vigorous, year-old plants only and develop uniform turf, consistently "true to form." Shipped shredded, ready for planting. Delivery in good condition guaranteed.

A supply of sod, cut to putting green length, is now available for spring delivery.
