

NOW, a 9-gang PENNSYLVANIA Unbreakable Golf Mower! *cutting a swath of 21½ ft.*

This is the largest grass cutter made. Yet for all its great size it is completely flexible and can be quickly converted into 7, 5

and 3-gang outfits if desired. Malleable iron and steel construction — *positively unbreakable.*

A new Pennsylvania unit—36" cut—a move for economy

The most important gang mower improvement in years. The new Giant Quint cuts a swath of 14½ ft., only 2 feet less than the 30" 7-gang. It costs about \$200 less than

the 7-gang, is lower in upkeep and easier to handle. The new Giant Trio cuts a swath of 8½ ft. and costs only \$35 more than the 7-foot cut machine.

PRIMOS, DELAWARE COUNTY, PA.

Green-chairmen and Greenkeepers

here's how

you can solve the vital problem
of reduced maintenance budgets!

1932 will be a critical year for you who shoulder course maintenance responsibilities. For twenty years golf clubs in every part of U. S. have relied upon us to help with their maintenance problems. Now, for 1932, we're ready with a purchase-plan-of-the-times that will help you meet your budget.

Simply stated, here's the plan: make a list of your course maintenance requirements; make it complete and specific. Then, on the same day we receive your list a *flat cash quotation* will be on its way back to you . . . and that quotation will be cheerful news about economy. Here's a real opportunity to save—take advantage of it!

Make out and mail your list today . . . see what this plan will save you

"The Fairway is Far Superior to the Power We Used Before"

The McCormick-Deering Fairway Tractor working on the Rea Park Municipal Golf Course at Terre Haute, Ind.

WHEN you are considering your own golf course problems it may prove profitable to you to draw on the experience of others for a solution to your own. There are many golf courses that have turned to the McCormick-Deering Fairway Tractor as the most economical way to handle their maintenance. The City of Terre Haute, Ind., is one of these. Read what Frank Layer, caretaker, says:

"We have been using the Fairway Tractor on the Rea Park Municipal Golf Course for the past two seasons. We find that it is far superior to the power unit we used prior to the purchase of this Fairway, inasmuch as the Fairway is easier to start

and is faster on the course, enabling us to change from one piece of equipment to another in less time, which makes it possible for us to do more work.

"From our experience we can recommend the use of the Fairway on any golf course in any section of the country regardless of the kind of course."

This represents the opinion of every user of the McCormick-Deering Fairway. You can see it for yourself at the nearest Company-owned branch or at the showroom of a McCormick-Deering distributor or dealer. Write us for catalogs.

**MCCORMICK-DEERING
FAIRWAY**

START EARLY

Most parts of the country are experiencing a freak winter. There is very little frost in the ground. If your golf course is in such territory, now is a splendid time to begin the installation of an irrigation system that will save your fairways and greens

from the scorching sun and rainless days of midsummer.

Look the field over and you'll find no irrigating plant to compare

With the Modern **BUCKNER** One-Man Sprinkler System

It quickly saves its own cost through elimination of extra labor. It improves the course because it scientifically and efficiently does the work it is installed to do. There are more Buckner Sprinklers and valves in service on American golf courses than any other make. There's a real reason for their popularity. Let us give you the complete facts.

Write for catalog. No obligation.

Two of our Bents packed in 50 lb. tin canisters, enclosed in strong wooden boxes

Two Outstanding Bents

Triple A Bent—This is a comparatively new strain of *Agrostis capillaris* that produces turf of the same beautiful color and texture as Velvet Bent. The seed we offer has been remachined for the elimination of weed seeds and has a purity of over 99%. It has been an outstanding plot at our trial grounds.

1 lb. \$2.00, 10 lbs. \$17.50, 100 lbs. \$150.00

Seaside Bent (Coos Co. Strain)—This is a true strain of *Agrostis maritima* (now known as *Agrostis palustris*) that has produced some of the finest greens in America. It is a creeping, quick-growing grass, producing a closely matted turf of fine texture and beautiful color. As all Seaside Bents are not alike, plants showing considerable variation, it is necessary to obtain seed of known quality from a reliable source. Our personal representative in collecting areas passes on all seed supplied by us.

1 lb. \$2.00, 10 lbs. \$17.50, 100 lbs. \$150.00

GOLFDOM

BOOK DEPARTMENT

205 W. Wacker Drive CHICAGO

It's up to you, Mr. Greenkeeper!

YOU can economize on fertilizer, but too much economy may result in a patchy unattractive course, causing dissatisfied members and lost players. On the other hand, you can apply Armour's Special Turf Fertilizer and be repaid for it several times over through improved condition and greater appeal to players—those lovers of the game who are only satisfied with a course in the best of condition, and are willing to pay accordingly.

Put new life into your course with

Armour's Special Turf Fertilizer, the proven, high analysis, economical plant food for turf grasses. Give *your* grass the plant food it needs. Have a course that will attract more players, and continue to interest them. Apply

Armour's Special Turf Fertilizer early this spring. Start your course off right. Conveniently located factories insure prompt delivery.

~ ~ ~

Write our nearest office for free booklet on "Turf Maintenance." It will tell you how to improve your course.

This century-long test insures finer turf

The fact that Dreer's "Golf Links" and "Putting Green" grass seed mixtures are tested for purity and germination is important only because the Dreer organization itself has passed a century-long test for integrity and dependability.

"Golf Links" mixture is prepared from a special formula which was developed to produce a turf that will withstand the hard usage of the fairway. "Putting Green" mixture is composed only of fine-bladed, low-growing, hardy varieties which maintain their rich, green color throughout the season.

Other Dreer grass seed mixtures for athletic grounds, parks and private lawns. Write for complete descriptive literature with prices.

Tee maintenance e c o n o m y P A R A T E X T E E M A T S

Make this test

Install a Paratex at your tee that shows the hardest wear, or at your practice tee. Note how it stands up—provides firmer footing and altogether better playing conditions. See how you have put an end to tee maintenance expense and time.

Then, after you have sampled the benefits of this one Tee Mat, you'll have Paratex Tee Mats on every tee of your course.

with

A THICK, sturdy teeing surface that resists abuse and wear of spikes, scuffed shots and weather. Paratex Tees proved their practicability and economy in 1931... you'll find hundreds of courses turning to them in 1932. Use of patent tees provided for and every Paratex is guaranteed for one season's play.

Write for sizes and prices—Today

APPLETON RUBBER CO.
FRANKLIN, MASS.

Nothing else stimulates play and profitable club patronage as much as ***a course in fine condition!***

**Best for turf
because:**

—It is a natural grass food and stimulant ● A balanced manure containing 6% Ammonia, 2.50% Phosphoric Acid and 1 to 2% Potash. ● Contains no live weed seeds ● Being organic it aids humus and aids bacterial action ● It can be applied with a minimum of labor and expense ● Being more soluble than other manures, it is more available ● Being finely pulverized, it is quickly absorbed into the soil.

To get, and keep, your greens and fairways in top-notch condition use

PREMIER POULTRY MANURE

A NATURAL grass food and stimulant... a turf builder that has proven its value over a period of many years on hundreds of America's finest kept courses. Use PREMIER this year... it's the economical way to protect and increase membership patronage.
