

The 6-cylinder PENNSYLVANIA Tractor pulling the PENNSYLVANIA Fairway Quint (quickly convertible).

## **W**orm drive a feature of this new **PENNSYLVANIA Tractor**

Silent, powerful and with a maximum speed of 24 miles an hour, the 1932 PENNSYLVANIA Tractor is unequalled in its field. It has worm drive on rear axle and the 60-horsepower engine delivers over 700 horsepower at rear wheels at full speed.

With first and second gears for heavy work and high gear for light work, this tractor is for all-around service. It comes with or without steel dump body of one cubic yard capacity.

The PENNSYLVANIA Tractor with PENNSYLVANIA Unbreakable Mower Units in gangs of 3, 5, 7 or 9, is unexcelled for cutting fairways and rough.

The PENNSYLVANIA Super Roller Greens Mower is now equipped with eight blades. The other PENNSYLVANIA greens mower, the Aristocrat, 7 blades, and the Tee mower, 6 blades, are now built of aluminum, which makes them much lighter in weight and easier pushing.

Advertisement for DOW Lead Arsenate, an insecticide for golf courses. The illustration shows a golf course with a green, a clubhouse, and a flagpole. The text is arranged around a central black box containing the pests being targeted.

*with*

**DOW LEAD ARSENATE**

**Y**OU can keep your greens and fairways free from grubs, beetles and earthworms with DOW Lead Arsenate. It is the most effective insecticide to use as proved by practical experience; and it is also the cheapest known means of protecting the turf.

DOW Lead Arsenate is manufactured by a special DOW process to insure maximum effective-

ness without harm to fine turf. In addition to eliminating the pests, it discourages the growth of chickweed, crabgrass, fennel and other obnoxious weeds.

Many golf courses owe their freedom from these pests to the use of DOW Lead Arsenate. Eliminate the pests that cause you work and worry. Use DOW Lead Arsenate.

## ON YOUR GREEN-CUTTING COSTS AND GET FINER GREENS?

*Here are facts:* A number of clubs that last year replaced hand mowers with Ideal Power Greensmowers have provided actual figures showing an average saving of \$313.55 per mower for the season. The above figures are three of many taken from actual cases.

The Ideal Power Greensmower is a pre-

cision-built machine. Seven-blade high speed reel turns faster to give smoother, waveless cutting.

So light and smooth running it can be operated with your little finger. Write for the names of clubs that saved money with this mower. Start now to save on *your* costs.

## use **IDEAL** power **GREENSMOWERS**

## THE IDEAL BULLDOG FAIRWAY MOWER IS BUILT FOR YEARS OF FAST GOING

Lighter, yet stronger than ever. Seven-blade Bulldog cutting units are pulled so that they hug the ground—cut smoothly into every hollow, over every hillock. Cutting is smoother, swifter.

Economy is greater. This new mower is so strongly built, and so simply designed, that years from today will see it still in operation—free from trouble and high repair costs. 3, 5, 7-gang sizes.

## Appearances Are Highly Important

The appearance of your course is the best salesman you've got.

With the **GRAVELLY MOWER** you cut everything. No tall weeds left standing to give that ragged effect.

With the **Swivel Action Cutter Bar** in front of the Single Wheel

Machine, you can mow the steepest hillsides or go into any corner. Quickly changed into a Rotary Mower pleasingly different from anything on the market.

Reduces mowing costs. Improve appearance of course. Mail coupon today for the proof.

**“We liked the Master Seven so well we bought two of them,”** says M. E. Farnham, Superintendent Philadelphia Country Club.

**T**HE Philadelphia Country Club ranks as one of the ten major Golf Properties in the United States.

The Superintendent, Marshall E. Farnham, is the progressive type who makes it his business to seek and study every important improvement in golf course maintenance.

It is no wonder, then, that when the Toro Master Seven was first announced, Mr. Farnham immediately wrote for complete detailed information.

The result of Mr. Farnham's investigation ended in the order of one machine, quickly followed by the second. His analysis tells the whole story when he said:

“We liked the Toro Master Seven so well that we bought two of them.”

You are making a big mistake if you buy an old fashioned pull type outfit without seeing the Toro Master perform. Write today for information.

## The TEE SPRINKLER

*priced to meet today's needs*

The famous LARK'S little brother . . . sturdy and dependable

The Tee sprinkler—far-throwing, smooth-running, sturdy, and dependable—is a fit companion for The LARK. It is ideal for sprinkling tees, practice greens, and other limited areas. Covers from 30 feet up to 100 feet as required. Distributes water in tiny-drop sprays **EVENLY** from center to outside circumference on any pressure. Arm spread 20". Roller 12" long.

And best of all, the Tee sprinkler costs only \$6.00. Send for a trial Tee. Test it for 10 days. If you aren't completely satisfied, return the sprinkler and get your money back.

The **SECRET** of the Tee Sprinkler's satisfactory operation on low pressures lies in the **VIBRATOR** nozzle. (Pat. No. 1,763,979). It breaks up the water into misty spray, and makes possible slow rotation of sprinkler head.

THE TESTED  
PYRETHRUM SPRAY  
FOR CONTROLLING

# SOD WEBWORMS

Mr. W. H. Noble, U. S. Dept. of Agr., investigating for U. S. Golf Asso. Green Section, said in January Bulletin, "when used 1 ounce to five gallons water gave practically 100 per cent kill."

Method of application is remarkably easy and gives an immediate kill. Simply mix 1 fluid ounce of Red Arrow with 5 gallons of water and apply with ordinary sprinkling can—1 gallon of solution to 1 square yard of turf. Within a few minutes insects are forced to the surface and quickly die. Complete control is assured, yet without the slightest danger of poisoning or injury to grass.

## • Pyrethrum in Its Most Economical Form

Because it is highly concentrated and scientifically combined with soap, Red Arrow is the most economical and effective of all Pyrethrum insecticides. At leading seed and hardware stores or write direct for complete information. Address Red Arrow Dept. G-1, McCormick & Co., Inc., Baltimore, Md.

## Shelter House

# WORTHINGTON

## THE OVERGREEN SCOUT

*"The Economic Wonder of the Age"*

Many hundreds of clubs in this country and Canada, having the highest standard of maintenance, have for several years reduced their daily cost of green mowing at least 60% by using the "Overgreen Scout".

One man with one Scout will mow nine greens in two and one-half hours complete time of operation.

The Scout Units are equipped with brushes eliminating entirely the separate operation of poling.

When the mowing and brushing operation has been completed the Scout units are detached in a moment's time, and a spike discer, compost distributor, bunker rake, or roller may be attached to the Overgreen Scout tractor so that these operations can also be done by power.

A newly invented attached "flip" carrier is used for transporting the units between the greens which dispenses with the inconvenient detached two-wheel truck or carrier heretofore in common use.

Its units are also fitted with means for simultaneously adjusting the height of cut on all three units alike in thirty seconds' time. No measurements or straight edges required.
