CLUB

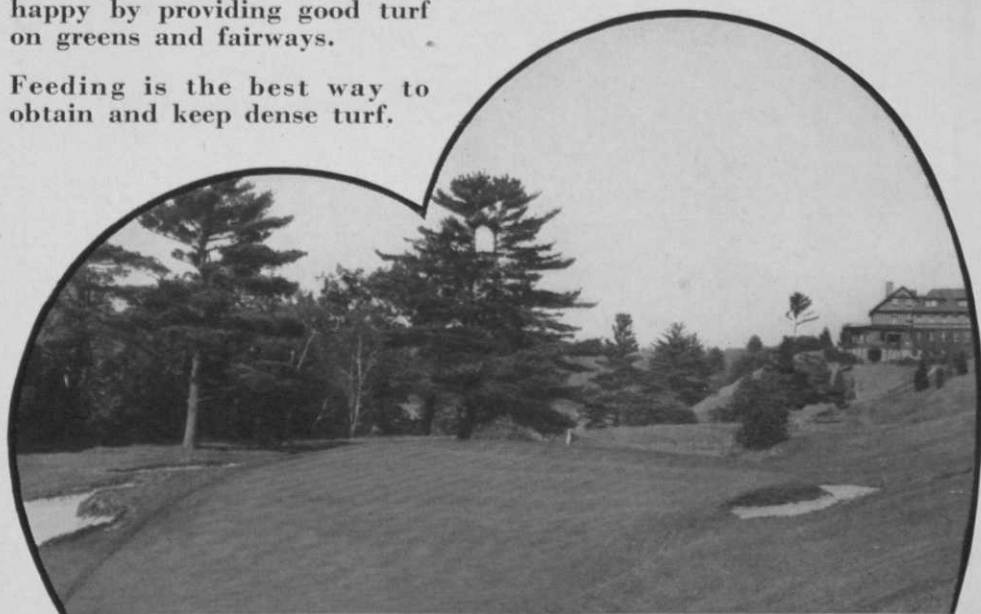

TOWN..... STATE.....

Have a Heart!

Hold members and keep them happy by providing good turf on greens and fairways.

Feeding is the best way to obtain and keep dense turf.

Now it's as economical as it is wise
to feed with

MILORGANITE

Prices are lower—analysis is higher!

Spring applications thicken the turf and insure growth all season.

The course is the heart of the club. Farsighted officials realize the need for fertilization to keep turf in top notch condition. They will select Milorganite for spring feeding because it is effective and economical. Our specialists will gladly help your club devise a sane feeding program.
