

Greenkeeping Short Courses Offered by Five Schools

THIS is the busy time of year for greenkeeping short courses. The one-week course at Rhode Island State College has just been successfully completed with a full enrollment in attendance. Massachusetts State College, at Amherst, has 24 students in its first year class and 14 in its advanced class; both classes began Jan. 3 and will continue for 11 weeks until March 15. Four greenkeepers, turned away from this season's course, have already enrolled for the 1934 class at Massachusetts.

Penn State's fourth annual Greenkeepers' Short Course, with enrollment limited to 30, began on Jan. 30 and will continue until Feb. 24. The last two days of this course will include the school's fifth annual Greenkeepers' Conference, to which all interested in turf are invited. The program for this conference was given in the last issue of GOLFDOM.

Two institutions, Iowa State and College of Agriculture, Rutgers, will shortly begin their 1933 courses. Details of these offerings will be found below.

Rutgers Offers Choice of Two Greens Courses

TWO FIVE-DAY short courses in greenkeeping are planned at Rutgers University, College of Agriculture, New Brunswick, according to J. G. Lipman, director. The first is for turf cultivators who have never attended a short course at Rutgers, and is scheduled for the period of Feb. 20-24. Enrollment will be limited to 20 persons who must be residents of the United States and able to read, write and speak English easily. They must be at least 18 years of age. Registration fee, \$10.00.

The second, an advanced course, planned for Feb. 27-Mar. 3, is open to persons who have attended the one-week course in Turf Management and will be split into two sections; for 2½ days the problems of plant growth will be considered, and for the remainder of the course the engineering aspects of turf cultivation will be studied. Registration fee for the advanced course is \$8.00.

Two-Day Short Course Feb. 27-28 at Iowa State College

IOWA STATE College (Ames, Ia.), in cooperation with the Iowa Greenkeepers' assn., will present a two-day short course open to all persons interested in the culti-

Club Managers' Association of America

ANNUAL CONVENTION

Hotel Sherman

Chicago, Illinois

February 27, 28, March 1, 2

All Club Managers invited to attend whether members or not of the Association.

Cut out the notification slip if you can be there.

◆

F. H. MURRAY, *Secretary*,
Club Managers' Assoc. of America,
5 So. Wabash Ave.,
Chicago, Ill.

I will attend the Club Managers' Convention in Chicago.

NAME

ADDRESS

CLUB

Some of the students and instructors of the 1933 turf short courses at Massachusetts State College, which are now in session.

vation of fine turf on Feb. 27 and 28, under the direction of the department of horticulture, Prof. P. S. Pickett, head. A registration fee of \$1.00 will be the only charge.

Lectures and discussions will occupy the class-room periods of the two days, with greenkeepers' luncheons each noon and a greenkeepers' banquet the evening of Feb. 27. At this banquet, P. H. Elwood, head of landscape architecture at Iowa State, will present an illustrated lecture on "Landscape Improvement on the Golf Course."

Program

February 27—

Soil Characteristics and Soil Testing, B. J. Firkins, Iowa State Dept. of Soils.

Fertilization of Fairways and Greens, O. J. Noer, Sewerage Commission, Milwaukee.

New Developments in Turf Management, John Montieth, Jr., USGA Green Section.

Simple Directions for Running Grade Levels, W. M. Dunagan, Iowa State Dept. Civil Engineering.

Turf Diseases and Their Control, John Montieth, Jr.

Weed Control and Seed Testing, R. H. Porter, Iowa State Dept. of Botany.

February 28—

The Grass Problem in Iowa, V. T. Stoutmeyer, Iowa State Dept. of Horticulture.

Turf Grasses and Their Adaptations, John Montieth, Jr.

Efficient Golf Course Management, Leo Feser, Woodhill C. C., Wayzata, Minn.

Sod Webworms, George C. Decker, Iowa State Entomology Section.

Insect Pests of the Golf Course, Carl J. Drake, Iowa State Entomology Section.

Moles and Gophers, J. E. Guthrie, Iowa State Dept. of Zoology.

Further information on the course may be obtained by writing to Professor B. S. Pickett, Iowa State College, Ames, Iowa.

Ken Welton, Green Section Expert, Gets Married

KENNETH WELTON of the Green Section, USGA, and Miss Heidi Roos of River Forest, Ill., were married Jan. 21. They will be at home after March 1 at 3511 Davenport avenue, N. W., Washington, D. C.

One look at the lovely Roos girl is ample explanation for Welton getting married despite reduction in the Green Section budget. Nothing seems to put love off the gold standard.

Says Members' Fear of Pros Is Costing Money and Jobs

APROMINENT New York golfer who plays scores of courses during the year asks us if we have noticed the assistants' popularity at so many of the clubs.

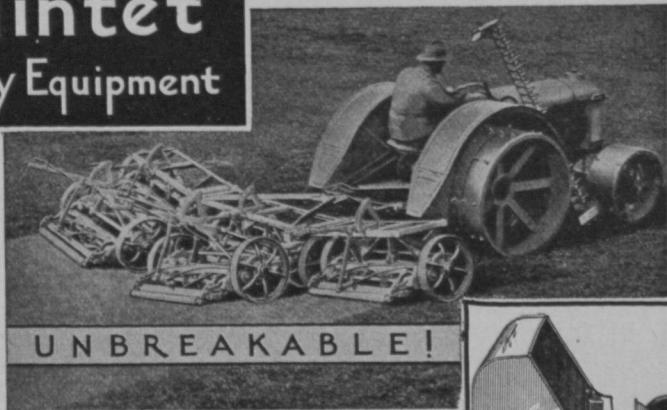

"Notice," says this man, "that members all visit with the assistants but they often seem to be afraid of the head pro. Maybe they have the idea that the pro is a sort of a superior being because he shoots in the low 70s; perhaps they think he doesn't want to be bothered with the dubs. Whatever the reason is, it must be costing the pros a lot of money and many times, their jobs."

The F. & N.

UNBREAKABLE

"Quintet"

Fairway Equipment

UNBREAKABLE!

FOR smoothest cutting—fastest, easy running—trouble free, most useful and longest service, the famous F. & N. UNBREAKABLE "QUINTET" Fairway Equipment stands alone.

F. & N. UNBREAKABLE TITAN Fairway Mowers used exclusively in this equipment are designed and built especially for this rugged service.

TITANS are the only mowers built that use the patented "Interlocking" frame and cutter bar construction which is so necessary to keep the mower in rigid and perfect alignment.

Gears have CUT teeth made from drop-forged STEEL, heat treated, and revolving on Timken Roller Bearings in a constant bath of oil.

SIX revolving blades of special analysis Chrome Vanadium steel individually hardened and tempered in oil.

TITAN Mowers are equipped with demountable revolving reels—easily disassembled and assembled for sharpening or replacing the cutting units.

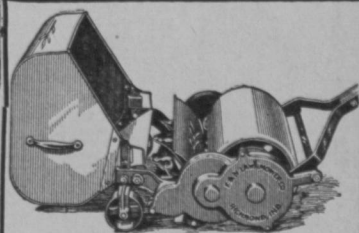

TITAN Mowers—Every part is machined to mathematical accuracy—precision fitted throughout.

TITAN Mowers are guaranteed positively UNBREAKABLE.

Best of all the TITANS are equipped with the Genuine Patented self-adjusting device which automatically takes up all wear in the bearings—another exclusive feature.

The new F. & N. ALL-STEEL frame is stronger, lighter, more flexible and more convenient. It handles TITAN Mowers in gangs of THREE or FIVE and FITS ANY TRACTOR.

Satisfaction fully guaranteed. Get full particulars and our special prices before you purchase equipment for 1933.

The F. & N. Putting Green Mower

On smoothest and most velvety greens everywhere you will find F. & N. Putting Green Mowers. Greenkeepers say it is the finest mower they have ever used. Self-Adjusting reel bearings with eight revolving blades—Alemite oiling, etc. Rubber-tired carriage for transporting. Write for particulars and special prices.

Smooth operation is permanently assured with F. & N. *Unbreakable All-Steel* TITAN Fairway Mowers and with F. & N. Putting Green Mowers—every one is equipped with the genuine, patented F. & N. Self-Adjusting Device in the revolving reel. No difficult hand adjusting or poor mowing with these.

Scotty Chisholm Shoots Some Sports Movies

D. SCOTT CHISHOLM, one of the best of the golf writers and a photographer who is a master with the trigger, has shot a number of reels of sport movies now being distributed by the Parry Film Co., 10100 West Pico Blvd., Los Angeles, Calif. Scotty shot 14 reels of the Olympic games at Los Angeles, getting some magnificent films of field, track, aquatic and equestrian sports.

Full details of these films, which are of the home motion picture projector size, may be had from the Parry Film Co.

Cutting Course Costs

(Continued from page 12)

invariably the greenkeeper works right on the course with his men, and his days are much too full to permit of anything more than day to day maintenance. Assuming that he has the ability, the experience and the inclination, it is not reasonable to expect him to work half the night and weekends on course economies, and attend to daily maintenance as well. And it is just as equally impossible for the average weekend green-chairman, no matter how interested and efficient. It is a specialist's job.

Part-Time Man Is the Answer.

Now above all times must waste be eliminated, efficiency intensified and sound economies introduced. The entire economic and physical structure should be analyzed, requirements ascertained, deficiencies remedied, present and future policy determined and every detail planned accordingly in advance.

The average small town club cannot afford a whole time expert agronomist and economist. It would, however, be possible for a group of clubs in a given locality to secure such services co-operatively. Thereby could be obtained, at small individual cost, specialized advice and savings in maintenance and in mass material and equipment purchases. The expert service contemplated (and surely such must be available in every locality) would not only analyze and suggest, but actually work with the chairman and greenkeeper in planning details of course routine along sound economic lines, giving as well regular and personal service at each course during the entire playing season.

WOOD CHARCOAL
Produced by Members of the Wood Charcoal Research Bureau
CONDITIONS GOLF GREENS

GIVES LIFE TO TURF

- Wood Charcoal properly applied to golf turf prevents sod from packing . . . absorbs moisture without swelling or breaking down and gives it off as needed.
- Easily applied with spreader, then rolled, it quickly works down into the turf, aerates the soil and aids in retarding the growth of fungus and harmful bacteria.
- Wood Charcoal does not rot, will not dust, cannot soil shoes or clothing.

Metropolitan PGA Schedules Greenkeeping Talks

METROPOLITAN PGA, with cooperation of Robert Arnott, chairman of the Metropolitan Golf Ass'n Green Section, has secured Mr. Taylor, agronomist of the USGA Green Section for a series of lectures on greenkeeping. These lectures will be given every other Monday at the MGA office, 295 Madison ave., New York city, during January, February and March. The first lecture was given January 23.

John Inglis, president of the Metropolitan PGA, advises that pro demand for this educational series plainly indicates an eagerness of the pros to increase the value of their services to their clubs.

VULCAN MAKES CURLEY-BATES PACIFIC COAST AGENTS

Portsmouth, O.—Curley-Bates Co., with head office in San Francisco and branch offices in Seattle and Los Angeles, has been appointed exclusive distributor for Vulcan golf clubs on the Pacific Coast, announces Don Bush, assistant manager of the Vulcan Golf Co., who has just returned from several months' contacting the golf trade on the West Coast.

Curley-Bates golf sales will be under the direction of Mike Shahan through the San Francisco office; Bob King, Seattle; and Nick Schaeffer, Los Angeles. These men have been identified with the golf industry for a number of years and are widely known in their respective territories.

ARPS GOLF TRACTOR PROVES UP UNDER COURSE TESTS

New Holstein, Wis.—Relatively a newcomer in the golf field, the Arps Corporation's "Black Hawk" golf tractor has been put to severe test during the past season or so and has delivered excellent results on many golf courses. This season, the Black Hawk will be distributed by a number of golf equipment houses throughout the U. S. and sales are expected to increase markedly as soon as greensmen have had the opportunity to see and test this tractor.

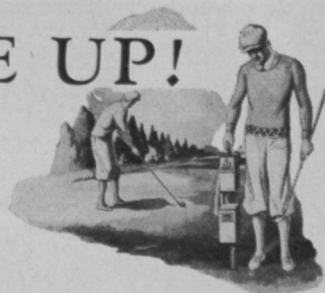

The equipment is made both for Ford model A and B cars and for Chevrolet chassis. Guarantee on the attachments extends for 18 months.

PERFECTION HAS DISC BASE ON NEW MODELS

Plymouth, Mich.—Perfection Sprinkler Co.'s latest models are now furnished with a disc base of cadmium-plated pressed steel which permits the sprinklers to be

prices are attractive. There are many new features incorporated in these bags.

McCLAIN BROTHERS OFFER SEVERAL NEW ITEMS

Canton, Ohio.—Several ingenious and practical items have been added to the McClain Brothers line of greenkeeping equipment for 1933, prominent among which is the new underground hose locker and the McClain Hydro-Mixer.

The hose locker is a permanent receptacle of heavy steel for hose, sunk to ground level near each green. Within is a revolving metal reel with one-inch hose capacity of 150 feet. Hose is always connected to the water supply. Sufficient length is unwound from the reel, a quick-acting valve is turned on, and after watering is completed, the valve is turned off, the hose reeled back and the self-locking cover of the hose locker closed. Manufacturers point out that hose is always out of sight, protected from the weather, theft and danger from tractors or mowers.

Another interesting addition to the McClain line is the Hydro-Mixer, which is expected to save greenkeepers many dollars in time and labor, in treatment of greens

with fungicides, fertilizers, etc. It is attached to a barrel pump, the hydrant and the hose leading to the green, as indicated in the cut. Chemical solutions are pumped

slowly into the Hydro-Mixer from the barrel and the water stream carries them through the hose to the green in diluted form. Ten to fifteen minutes, McClain says, is sufficient to treat a green with Hydro-Mixer.

The trade name of McClain Bros. brown-patch preventive *Fungo* has been changed slightly to *Fungol*.

The company has for free distribution to greenkeepers who will write to them, a set of application record cards to be hung in office, workshop or tool house for ready reference and guidance throughout the season. With this schedule applications of both fungicides and fertilizers can be accurately timed and a complete record kept at all times. Thus, greenkeepers know at the end of the season or any day of the year just where they stand on this expense item.

SCHAVOLITE REDUCES PRICES

Long Island City, N. Y.—No changes in the Schavolite line will be made in 1933, says W. J. Curtis, president of the Schavolite Golf Corp. List prices will remain the same but there are lower prices to the trade. New price lists and catalog will be mailed on request.

PEERLESS, JR., IS NEW LOW-PRICED MOWER SHARPENER

Plymouth, Ohio—The Fate-Root-Heath Co. has added a new, low-priced mower sharpener known as the Peerless Junior, to their otherwise complete line of Peerless and Ideal sharpeners. In spite of its lower price, the same high standards of material and workmanship inherent in all Peerless machines have been maintained.

The Peerless Jr. Sharpener grinds all makes of power mowers and tractor units with blades up to 36 inches wide without removing the mower wheels, as well as putting green and hand lawnmowers. It grinds the reel knives with the proper clearance or bevel, and also makes a per-
