fect contact with the straight blade even if the latter is bent or sprung.

On most mowers it is not necessary to grind the straight blade or cutter bar, but when it is badly worn and "wavy" or uneven there is only one way to sharpen it—on a grinding wheel. For this purpose the Peerless Jr. is equipped with a heavy attachment bar which holds the straight

blade so that both the face and the edge can be ground quickly and accurately in one setting by rotating the bar.

A special 8-inch grinding wheel on the end of the main shaft is also furnished for grinding grass and hedge shears, sickles, scythes and other edge tools.

"LISTEN TO THIS ONE" SAYS NEW U. S. BALL JOKE BOOK

Providence, R. I.—A collection of golf jests has been made by the golf ball department of the United States Rubber Co., and put into a booklet for free distribution at the pro shop.

The booklet contains the hale and hearty old golf gags that can be put into a book without someone having to serve time and makes a fine little job of golf shop sales promotion. Contributions of the jokes were made by some famous and some notorious golfers. Grant Rice, Socker Coe, Willie Ogg and Bill Richardson have the best scores in the book, according to this guesser.

Any of Eddie Conlin's bright young men of the United States Rubber staff will give any pro a bunch of these books free to pass out at the shop. The booklet makes a good enclosure for some of the spring letters the pros send around to all the faithful.

Just Try 'em and See!

Norman Haas, greenkeeper for Transit Valley Country Club at East Amherst, N. Y., tells us all of his mowers, excepting green mowers, are equipped with Budd Blades. One unit bought last February convinced him. They can save time and money for you, too.
