Even this Pest

Other golfers may swear—greenkeepers may tear their hair—but goofy golfers do have a right to live and you can't keep them off golf courses. Be nonchalant. You won't need to feel quite so concerned over the damage they do if your fairways are fed on a diet of Milorganite.

Milorganized turf is good turf. Better root development, sturdier leaf structure, less expense for seed. Milorganite is easy, safe, inexpensive to use. Nitrogen is released gradually, continuously, over long periods of time. Generous applications can be made without danger of burning. High organic nitrogen content—amazingly low cost per ton. No wonder Milorganite is used on more golf courses than any other fertilizer.

Free Bulletin "How to Use Milorganite on Fairways and Greens" mailed on request.
