

# TURF CULTURE LESSON No. 1

The scientist will tell you Milorganite is rich in organic nitrogen; the greenkeeper will tell you it is easy to apply; the treasurer will say it is low in price—but, after all, the important thing about Milorganite is that regardless of soil or climatic conditions it GROWS GRASS.

That is the reason why in seven short years Milorganite has become Lesson No. 1 in turf culture the country over. Surely, it is interesting to know that it is non-burning and long-lasting, but the real answer to its popularity lies in this simple phrase—"Milorganite Grows Grass."

THE SEWERAGE COMMISSION, Milwaukee, Wis.
