products with its regular guarantee to replace free of charge any part of the mower unit that breaks during service and to refund purchase price if purchaser is not satisfied of the mower's efficiency after a fair trial.

Greenkeepers and green-chairmen are invited to write for literature describing the F. & N. line in detail.

### U. S. RUBBER CO. TO MAKE LINE OF PGA BALLS

Providence, R. I.—United States Rubber Co. announces two new golf balls for sale only to members of the Professional Golfers' Association of America. Both the U. S.-PGA *Championship*, a distance ball for the better golfer, and the U. S.-PGA *Tough* for the good player who wants a tough ball with plenty of distance, will retail for 75c each, and will be made in recess marking only.

The two brands will be ready for delivery to PGA members January 25.

### WORTHINGTON IMPROVES MODELS FOR 1934

Stroudsburg, Pa.—Worthington Mower Co.'s "Overgreen" will be equipped in 1934 with a special brush, mounted in the front of the machine and designed to be used at the same time the greens are cut. It will have an over-all swath of 45 inches and pressure on the green surface will be regulated by a spring.

Putting green units of the "Overgreen" may be disconnected and in a few seconds, tee mowers, approach mowers, spikers, rollers, discers and rakes attached. This makes it possible to keep the machine actively employed and has led the manufacturers to guarantee that there is no eighteen hole course that cannot pay for this machine in one season's time out of savings alone.

A new style front roller has been perfected which combines in one both roller and casters with all the advantages and none of the disadvantages of either. This has been done by enlarging the ends of the front roller 1/4 in. in diameter. These enlarged ends will have all the advantages of the caster wheels' non-rolling feature, but if they sink too deeply into the surface of the ground, the center part takes up the weight and prevents scalping.

The Worthington Lawn Tractor, for 1934 will embody latest improvements of the Ford Motor Co. The 1934 motor is used and Ford's latest straddle mounted truck type differential. This gives a 40% increase in strength over last year; Worthington warrants the transmission of their tractor unconditionally. Pneumatic tires, 9x13, tried during 1933, have met with such success that they will be recommended

## WHEEL SPUDS

Quickest to put on and take off. Doubles traction. Durable and low priced.

All sizes for all purposes. Samples and circulars sent free on request. Advise make of tractor and purpose intended.

If your Ford or equipment dealer cannot supply, write direct.

Immediate shipment. Prices reduced.

Golf wheels and all Fordson parts on hand.

R. S. Horner, Geneva, O.  
**GOLF WHEELS**  
for FORDSONS

The R. H. Golf Wheels are stronger, rims do not bend, 50% better traction, easier steering, and rounded edges.

Many clubs are replacing old wheels with these stronger and better wheels.

Sold in singles, pairs or full sets. Immediate shipment. If your Ford or equipment dealer cannot supply, write direct.

Cut Your Maintenance Costs  
and Improve Your Course

A complete course inspection service with the specific object of pointing out cost-cutting maintenance practices... suggesting such changes as will make for improved course design, condition, economical upkeep.

This service is based on more than 30 years' experience in building and maintaining several of the finest courses in the South and North.

The nominal fee invariably has proved to be but a small portion of the amount I have been able to save clubs.

For further details address:

**JACK DARAY**

White Pines Golf Club, Bensonville, Ill.

in practically all service for the coming year. These tires eliminate shock and jar to the tractor itself and add very greatly to the comfort of the operator.

The standard Fairway unit has been changed in several respects in keeping pace with the increased speed and service which these depression times have put upon all machines of this class. The rear roller has been placed forward 1½ in. from its former position and a tie-rod is installed between the two housings in the rear of this roller. Knives of this machine are lifted by means of this rod when going from one fairway to another, and all possible strain from bed knife backing is thereby removed. The main axle has been increased in diameter and flanges at either end strengthened in proportion. The rear roller is equipped with hardened steel pins fitted in special bronze bushings and equipped with alemite lubrication fittings.

## GAIROARD NAMED CODE ADVISOR FOR SPORTS GOODS INDUSTRY

C. L. Gairoard, president of The Kroydon Co., Maplewood, N. J., has been selected by the sporting goods industry as its industrial advisor to the government under the code. Gairoard has been active in the Athletic Goods Manufacturers' Assn. and as chairman of the Cutlery and the Tool Manufacturers' associations had much to do with drafting the codes for those groups.

He has his hands full with business interests, being active as president of Kraeuter & Co., Inc., tool manufacturers; president of Kraeuter Drop Forge Co., and since 1898, sales manager of J. Wiss & Sons Co., cutlery makers, in addition to his association with Kroydon.

## MACGREGOR TO INTRODUCE NEW "SUPER-VALUE" GOLF CLUBS

Dayton, Ohio—Crawford, McGregor & Canby Co. will introduce in 1934 five new lines of popular priced woods and irons to sell at \$6 and \$5 respectively.

"Never before," says Ed. Canby II, of the MacGregor organization, "has it been possible for us to build so many features into clubs selling at anywhere near these figures. This means that golfers who are compelled to limit their expenditures for equipment can now get clubs they'll be proud to own."

According to Mr. Canby, both woods and irons will be equipped with the MacGregor "Neutralizer" that takes sting and vibration out of steel shafted clubs and gives them the "feel" of hickory. Irons will carry a selection of back designs—a flat back model, a flange sole model, and a back-weight-balanced model. Special face woods with patented "Scrucloc" inserts will be

## DIAMOND TRACTOR SPUD

Hard steel center keeps spud sharp—softer outer steel wears away faster. Will not harm turf—made of drop forged steel, can't break or chip.

Diamond Calk Horseshoe Co.  
4702 Grand Ave., Duluth, Minn.

available at \$6. Most of the models have True Temper shafts.

Dealers, pros and golfers who have seen these new lines are enthusiastic about them, according to the scores of letters that have been received at MacGregor headquarters in Dayton.

Enthusiasm at the factory over the new "Tru-Whip" woods and irons are being borne out by the pros and players who have tried these new clubs. MacGregor claims greater distance and accuracy for these clubs and points out the three features responsible to be (1) shafts graduated in amount of whip, short pitch clubs being the stiffest; (2) the "control sleeve" which fits over the shaft and under the grip, and is claimed to remove the usual whippy-shaft club "wobble" and put leverage where it belongs, and (3) the patented MacGregor "neutralizer," a section of hickory inside the shaft where it joins the club-head, intended to absorb shock and sting and make the club evenly flexible from grip to head.

#### TORO ADDS REFINEMENTS AND NEW MODELS

Minneapolis, Minn.—A number of worthwhile improvements and additions to the Toro Manufacturing Co. line of golf course maintenance machinery have been made for 1934, according to word received from K. E. Goit, Toro sales manager.

Chief among the new improvements are changes on the hand putting-green mower. A new, easily accessible finger tip adjusting gauge regulates the height of cut without the need of wrenches. With this gauge, the mower can be adjusted properly without a straight edge and on uneven ground. New automatic self-takeup ball bearings greatly increase the life of the reel bearings and provide positive alignment of the reel shaft. The bed knife bar and the roller drum spiders, formerly built of cast iron, are now constructed of special aluminum alloy, at no sacrifice in tensile strength. Greater use of aluminum reduces the gross weight of the mower over 5 pounds.

The Master tractors and fairway mowing outfits have been improved with a new, simplified steering gear, providing easy steering. Several structural changes have been made in the frame to increase flexibility, an important feature for hilly courses.

Two brand new mowers are offered: the "Parkway," a 2-wheeled rubber-tired sickle-bar mower for cutting rough, and the "Parkmaster," a 3-wheeled rubber-tired mower for high speed tee and approach cutting.

The company reports an increased volume of spring orders on file and are looking forward to greatly improved business for 1934.
