

The "BIRDIE" becomes an "EAGLE"  
 "Gives Most Satisfactory Cutting Job  
 That We Have Ever Had"

Say Greenskeepers Who Have Used--  
**GREENSKEEPER MOTO-MOWER** during 1934 season

The Greenskeeper Moto-Mower has performed so well for greenskeepers, according to their own enthusiastic reports that this model is now a regular part of the Moto-Mower line.

The Greenskeeper Moto-Mower is a powerful cutting greens mower of advanced design to meet the needs of the most exacting greenskeeper. Although still retaining sturdy construction and the desirable necessary features for satisfactory, easy operation, the Greenskeeper is built as lightly as possible. The weight is so perfectly distributed that the ground pressure on the greens is less than that of a golfer's foot.

 TRADE MARK

Write today for literature and prices.

4601 Woodward Ave. Detroit, Mich.

course fraternity, the company reports. The new machine seems to have many features that fit it into the golf club picture, including such attractions as four-speed transmission, top speed of 25 miles per hour, pneumatic tires, rugged construction, and surprising power for so small a tractor.

No important changes are planned for the company's Peerless mower-sharpener which has always performed satisfactorily in its present form.

Club officials interested in details of the Plymouth tractor or the Peerless mower sharpener are asked to write the company for literature.

### MARCH IRRIGATION WILL ADD TO LINE FOR 1935

Muskegon, Mich.—March Irrigation Co. reports it has experienced during the past year a marked increase in sales of its Rain-maker sprinkler for use around clubhouses. The efficiency and economy factors of the machine account for its increased popularity, the makers say.

A new low-priced high coverage sprinkler for clubs equipped with  $\frac{3}{4}$  in. hose is promised for 1935, and a few refinements are planned for the company's "Greenskeeper" model.

Literature and catalogs describing the entire March line are available on request.

### GIFT CONTAINERS GREAT WILSON CHRISTMAS DEAL

"There is a Santa Claus" says Wilson-Western in acquainting the pros with a Christmas gift Hol-Hi ball proposition that will make a lot of ball business for the professionals who snap into it.

The Wilson-Western deal supplies an attractive glass cocktail shaker and a genuine leather toilet case as containers for Hol-His in dozen lots. Both of these items are first class merchandise and by themselves are highly acceptable Christmas gifts. With the dozen Hol-His you can rest assured that it makes the sort of a Christmas present men will hail.

As containers for Hol-His in half-dozen lots Wilson-Western offers a Christmas package of a chrome-metal cigarette box, which is a nifty looking container with black composition base and lacquered Chinese red inside.

Both of the Wilson Hol-Hi Christmas package deals are made to the pro at no increase in price over the standard price of the balls. Pros who have seen these packages are more stirred up about the prospects for Christmas business than they ever have been before and already have been making some early solicitations of members' business.

The proposition figures out happily as a holiday gift selling stunt because in the

## **T** Beware Imitations!

Warning—genuine Tufhorse bags are being sold **ONLY** by our own representatives, direct to Pros.

# TUFHORSE

## GOLF BAGS

Wait for the new Tufhorse line; many new features; better deliveries; bigger profit possibilities to the Pro. Remember, wait for the accredited Tufhorse salesman.

Des Moines Glove & Mfg. Co., Des Moines, Ia.

past golf balls have only gone so-so for Christmas presents, because of the difficulty of working up any immediate use interest. With the cocktail shaker, toilet case and cigarette holder as ball containers, there is the element of prompt, frequent use of the gift and the lasting value of the Hol-Hi as the big value. The containers as a Christmas bonus should be the spark-plug that will set in motion a lot of pro sales.

All that the deal lacks to make a fine winter profit for pros is pro energy. Some boys will make ball sales about equal to a good summer month's business as a result of a few weeks' work on this Wilson Christmas proposition and others won't have the pep to put it over to the extent promised by the character of the deal.

One smart thing about such deals that has been observed by pros is that Christmas ball sales mean players coming out earlier and playing more. They itch to use the golf balls they got for Christmas.

### TORO PERFECTS NEW CRAB GRASS RAKE

Minneapolis, Minn.—Crab grass is perhaps the worst of all summer weeds. In recent years, due to the drouth and other factors, it has invaded practically all sections of the country, particularly in northern latitudes.

The elimination of crab grass by hand weeding is both tedious and expensive. Toro Manufacturing Co., Minneapolis, have recently developed a rake which may be attached to any hand or power mower and is fitted directly ahead of the revolving reel. Spring mounted tines are set ahead

so that they engage the tufts of crab grass and lift them up so the reel cuts them off and destroys the life by preventing it from going to seed. After one season's use the plants are so weakened that they die and the regular lawn turf is permitted to regain its vitality. Only a slight amount of draft is added to the mower.

# PERFECTION SPRINKLERS

## for FAIRWAYS

*In the less than three years that Perfections have been produced and sold, over 1,000 Greenkeepers have adopted them and are now enthusiastic boosters for Perfection Performance on both greens and fairways, greens in particular because they really do give large, even coverage and do not require that constant attention that is so common with sprinklers.*

**NOW, FOR 1935** —Seeing the ever-increasing need for sprinklers for Fairway Watering, we are pleased to announce that we have perfected two new Perfections (for greens or fairways) that will fully meet any requirements for fairways. One of these is for  $\frac{3}{4}$ " hose, to operate on pressures from 30 to 50 pounds, to cover from 95 to 110 ft. circle. The other is for 1" hose, to operate on pressures from 35 to 75 pounds, and will cover from 100 to 140 ft. circle.

**AND REMEMBER** —when you are considering the make of sprinkler to use, we guarantee either of these new Perfections to out-test and out-perform any other make of sprinkler, and we don't mean maybe. We invite competitive tests and we urge that you make these tests before you decide. You haven't seen nothing until you see these two new ones in action.

**FURTHERMORE** —the prices are right, only \$12.50 for the  $\frac{3}{4}$ " size and \$15.00 for the 1" size.

**FOR YOUR FAIRWAY WATERING** —Perfections will save you real money on your initial investment—lower your cost of operation and cut the maintenance, while the RESULTS will be much more SATISFACTORY.

*We will be pleased to have you write us about your problem so that we can tell you how to save with Perfections.*

Always pleased to send out sample sprinklers for trial.

Or ask your dealer, leading dealers everywhere are pushing the sale of Perfections.

**PERFECTION SPRINKLER CO.**

**PLYMOUTH, MICH.**

### IDEAL FORECASTS TREND TOWARD BETTER KEPT GOLF COURSES

Lansing, Mich.—The 21-inch cut Ideal power putting green mower put on the market by Ideal this season has proved very popular. The mower is reasonably priced, but the fact that it does such excellent work, says W. L. Austin, sales manager of Ideal, has had the greatest appeal to golf officials and accounts for the fine sales record made by the machine. In view of the success of the mower this season, Ideal will continue with it for 1935 with no particular change in design. However, for next season they do plan to have a new power transport cart for the machine that will transport the mower easily and which can also be used for other work.

Except for a few minor changes in design, the "Bulldog" fairway mowers in 3, 5, 7 and 9-Gang sizes for 1935 will be the same as produced this year.

About four years ago Ideal designed a special mower for cutting golf course rough—a mower selling at a fairly high price, but which does extra clean, smooth work and gives many years of service.

During past few years many clubs have sadly neglected the care of their roughs, but this year there has been tendency to keep roughs in better condition and this has resulted in renewed interest in mowers for the rough including many sales of the Ideal rough mower.

### CUREX, NEW IN FIELD, PROVES VALUE AGAINST BROWN-PATCH

New York City.—A new-comer in the golf supply field, W-B Chemical Co., of New York, manufactures Curex, which, the manufacturers claim, is a highly effective brown-patch remedy in which the active ingredient is an organic mercury compound consisting of 42 per cent Thiocarbamide-chloro Mercury. By combining the mercury in this particular form, the manufacturers state that the metallic mercury present (20%) is actually more than twice as effective on a weight basis as the inorganic mercuries. In developing the compound, they have also succeeded in removing from the mercury the power to burn or hurt turf.

Curex, since its introduction to greenkeepers during 1934, has given a highly

## THE BEST SPRINKLER FOR FAIRWAYS, PARKS, ESTATES, etc.

### RAIN KING

Model E

At any given pressure, will throw more water, throw it farther and spread it even through-out the entire circle watered than any other sprinkler we know of. Instantly set to turn at speed that is hardly perceptible or at any faster speed desired. Sturdily built, and will last and perform well for many a year. Available as shown and also with quick connection to snap into valve installed for the usual Fairway watering.

satisfactory account of itself. This is evidenced by the enthusiastic reports made by greenkeepers who began using it with considerable misgiving. Further proof that Curex is an unusual product is the fact that 1800 lbs were purchased by New York City for its municipal courses during 1934.

### NITROPHOSKA PRICE NOW INCREASES USAGE

New York City.—At prices now prevailing for low analysis fertilizers, the Synthetic Nitrogen Products Co., 285 Madison Ave., states Nitrophoska containing 15 per cent nitrogen, 30 per cent phosphoric acid and 15 per cent potash again becomes one of the most economical complete fertilizers on the market. Nitrophoska is usually applied to fairways and greens at the rate of 200 lbs. per acre and because of its low ton price is low in acre cost.

For applying Floranid (Urea), Nitrophoska or other complete fertilizers, grass seed or arsenate of lead, Nitrophoska spreaders are ideally designed and are extremely low in cost. They insure positive even distribution of any dry material. These products can be obtained from supply dealers or complete information about any of them may be had of Leonard Lipman, Synthetic Nitrogen Products Corporation.

### LEWIS BALL WASHER SALES UP 67 PER CENT

Watertown, Wis.—G. B. Lewis Co., who are makers of the Lewis golf ball washer, ended their fiscal year on September 30 with an increase in sales on this device as well as repair parts and other tee items of 67 per cent. These sales include tee stakes, tee data plates, waste containers and bag racks.

### MILWAUKEE SEWERAGE COMMISSION OFFERS EXPERT SERVICES

Milwaukee, Wis.—Continuing a plan inaugurated five or six years ago, the Milwaukee Sewerage Commission grass and soil technologists are available to golf clubs. These specialists devote their entire time to problems of turf culture and are qualified to give sensible assistance on all practices underlying the development and maintenance of turf. The Sewerage Commission maintains complete laboratories where any specific tests needed can be made.

For several years The Milwaukee Sewerage Commission has been advocating

consistent fertilization programs as the logical method of developing and maintaining turf of the quality demanded by good golfers. They have continually advanced the theory that healthy grass plants, just like healthy people, are less subject to disease and better able to stand extremes of cold, heat, moisture and drought.

Work has begun on an addition to the Sewerage Commission plant on Jones island, Milwaukee. This addition, when completed next spring, will increase capacity approximately 20 per cent and will provide the additional production needed to satisfy the increasing demand for Milorganite.

#### MacGREGOR ANNOUNCES RICKEY AS NEW SALES MANAGER

Dayton, Ohio.—Harry B. Canby, president of Crawford, McGregor & Canby Co., announces the appointment of Clarence H. Rickey as sales manager of the organization. For the past 10 years, Rickey has been vice-president of the R. H. Burhke Co., Chicago, in charge of sales and adver-

Clarence H. Rickey new sales manager for Crawford, McGregor & Canby Co.

tising. George Mattern, Sr., former McGregor sales manager, will continue as vice-president, assisting in product development and a general advisory capacity.

"No other changes in executive personnel are considered at this time," said Canby. "Edward Canby, Sr., will continue as first vice-president, Mr. Edward Canby, II, as vice-president in charge of advertising; Ira Braun as treasurer, and Mr. George Mattern, Jr., as general superintendent."

The organization is launching an aggressive merchandising program to promote fall sales, which is, according to Canby, a unique departure from the usual run of sales activities and will, he predicts, result in a marked increase in sales for all McGregor dealers. This new program, will be presented to the trade by the factory sales organization.

"The sale of the Tru-Whip line which we introduced this spring has resulted in a tremendous increase in sales," stated

## FINER GREENS at 30 to 50% Lower Cost with the IDEAL Power Putting Green Mower

This light, nimble mower is guaranteed to equal or surpass the finest hand cutting, and at the same time save 30 to 50% in mowing costs.

Power is applied direct to cutting reel. Guard prevents scalping over ridges. Patented clutch control. Quiet 4-cycle motor.

Two sizes—21" cut and 18" cut.

Pneumatic tired transport cart. Brush attachment.

And this is only one member of the big 1935 Ideal line of Golf Course mowing equipment. Write for details.

Canby. "With this foundation to build on, we are in a position to lay, and carry out, an unusually aggressive and ambitious selling program for the coming year."

## NELSON OFFERS HALF CIRCLE POP-UPS FOR GREENS

Peoria, Ill.—A new method of sprinkling greens without hose or portable sprinklers is being offered by the L. R. Nelson Mfg. Co., in connection with their half circle

pop-up sprinkler. A feed pipe is laid round the green and feeds the three, four or five pop-ups which are set in the ground just off the green, at locations where the half circle sprays will completely cover the green.

It is only necessary to turn a valve to give the entire green an even shower, L. R. Nelson reports. Where the water supply will permit the sprinkling of nine or more

greens at one time, the entire number can be sprinkled by merely turning a valve in the main supply line. The economy in this method of sprinkling is evident, since it eliminates the night man.

The cost of Pop-Up heads required for a green is about the same as the cost of a portable sprinkler and the 1-inch hose required for sprinkling this same green in the old way. The permanent pipe which is laid in a shallow trench around the green, can be laid in a few hours, without injury to the sod, if the sod is promptly replaced and wet down. The heads are set even with the surface of the sod so the mower will run right over them and they will not interfere in any way with balls or players.

The driving principle used on the half circle pop-up has been in constant use for two years with remarkable results. Rotation of the stream is accomplished by a stainless steel ring which simply refuses to wear out. When once set they never require further adjustment.

## DOLGE LINE FOR 1935 WILL HAVE NEW ITEMS

tained have been more than gratifying to the Dolge laboratory workers.

Dolge is perfecting a new ant killer, which in two years' careful laboratory work has proved most effective. In actual field work it has given the best of results. The use of Dolge weed killer for treating sand-traps has greatly increased and all clubs using it report one thorough application keeps the traps clear of weeds for the entire season, the makers report.

Dolge will also have its usual wide line of cleaners, disinfectants, athlete's foot preventives, deodorants for clubhouse maintenance and to these have been added a line of floor finishing materials, including Dolco Rock which maintains a fine finish and is not affected by water, alcohol or similar materials spilled on it. It has proven an especially fine product for use in locker rooms, rooms adjacent to showers and other places where excessive water gets on the floor or where alcohol is likely to be spilled.

## NEW HEDDON STEEL SHAFT IN HILLERICH & BRADSBY LINE

Dowagiac, Mich.—The new Heddon steel golf shaft, produced by the well known fishing tackle manufacturers, James Heddon's Sons, is to be first introduced at the Louisville Open tournament and will be found in the new pro line of Hillerich & Bradbsy under the trade name of "Pro-Flex." Each shaft is custom drawn and specially adapted to each individual club head in matched sets. It is produced from a special steel, heat treated by patented electrical methods and tapered by a new process, which gives a straight grain in the shaft structure. This shaft embodies a new principle in steel shaft construction.

## GOIT IS SOUTH-WESTERN AGENT FOR WORTHINGTON MOWERS

Stroudsburg, Pa.—Worthington Mower Co. has appointed Whitney Goit, Inc., 1230 W. 8th St., Kansas City, Mo., as southwestern distributor for the company's line of grass cutting machinery. This late move will put Worthington in very strong in the territory covered by Goit, since he has had

## First Cousin to ANY Budget

Mowing maintenance costs sharply drop once the Budd goes into action. Its four edges (you change the Budd in a jiffy, you know, just like a razor blade) mean always sharp cutting—both of grass and expenses. Be sure it's on your 1935 list of necessities! You'll never regret it.

● IMPORTANT — FILL OUT FORM ON REVERSE OF THIS PAGE ●

# "NO OFFICIAL . . . . .

. . . with grounds, clubhouse or pro-shop duties should be without GOLFDOM every month." So, in substance, read scores of letters in our files. And we thoroughly agree! GOLFDOM is sent FREE!

If any of the officials listed below are not getting GOLFDOM at your club, please send us their names by filling in this page, tearing it out and mailing to GOLFDOM, 14 East Jackson Blvd., Chicago.

This is especially important if YOUR club has recently held an election. We want the new officials to begin receiving GOLFDOM immediately!

Please PRINT plainly. Home or business addresses preferred.
