

Get Rid of the Worm Hazard

Always in the way...always spoiling the game of particular players...creating disgruntled, dissatisfied members...you couldn't find one all day if you wanted to go fishing, but your members can't avoid him, or the little mounds of dirt he makes.

DIWORMA gets rid of worms effectively, surely. Just sprinkle on your greens—no washing in, no rinsing, no burned grass. Investigate!

ANNUAL SALES CONVENTION L. A. YOUNG GOLF CO. HOLDS

Back row (left to right)—Stan Northrup, southeastern representative; Harold Catlin, order department; Gordon Goyette, north central representative; Russell Matter, New England representative; Larry Dow, manager, New York branch; Tom Robbins, manager, Chicago branch; Bruno Minkley, central eastern representative; Arnold Minkley, central representative; Jimmy McGonagill, southwestern representative; and Paul Sage, Pennsylvania representative.

Front row—Ed Forrest, cost accountant; E. LeRoy Pelletier, Jr., advertising manager; George J. Herrmann, secretary; Richard Link, factory manager; L. A. Young, president; E. E. Chapman, vice-president and general manager; Eddie Rankin, Michigan representative; and Wilbur W. Woods, south central representative.

Detroit, Mich.—The eighth annual sales convention sessions of the L. A. Young

Golf Co. were held in an ideal spot—an airy pavilion on the shores of Wing Lake,

where L. A. Young, president of the company, has his country estate.

Business sessions were under the chairmanship of E. E. Chapman, vice-pres. and gen. mgr. of the company.

Following two days of meetings, the convention came to a close with a golf tournament played at Red Run G. C. and a banquet in the evening at the same place.

All of the field men of the company attended the sessions with the exception of those on the Pacific Coast and some of the junior salesmen.

The new 1935 Hagen line was presented at the meeting and its salient points and the business policies of the company were set forth.

A novel feature of this convention was that the talks were not made only by the executives of the company, but each of the field men spoke on a subject pertaining to sales activities.

CHRIS GRUBEL APPOINTED AD MANAGER FOR SPALDING

New York City.—S. A. (Chris) Grubel for many years with the advertising department of A. G. Spalding & Bros. has been promoted to advertising manager of the company. Other executive duties of William Brown, formerly advertising manager of Spalding, have become so numerous that Chris has been beckoned from the bull-pen to go in and pitch.

He knows what the score is in the pro and all other phases of the golf business, and the pros will find him a bright and industrious teammate in pushing the Spalding policy of pro publicity conducted vigorously during the regime of Bill Brown as advertising manager.

ROTARY TURF CONDITIONER HAS HOLLOW SPIKES

Philadelphia, Pa.—Philadelphia Toro Co., 1528 Belfield avenue, is introducing a new rotary turf conditioner which is a roller type of machine and consists of two sections, each ten inches wide, equipped hollow spikes three inches long and one-half

inch in diameter, so constructed to pierce the turf and at the same time cut a plug therefrom, leaving a clean-cut hole three inches deep in the turf.

The hollow spike is so constructed that when it is made or set into the face of the machine it will not lift or tear the turf as it passes over it with a rolling action. The spike is so constructed that it may be quickly and easily replaced when necessary.

The machine with hollow spikes mounted in all or any part of its periphery, acts as a roller at the time it is piercing the turf, leaving a smooth surface ready for any treatment or work that it is necessary to perform.

It is so constructed that the weight may be quickly changed at the will of the operator that it be made heavier or lighter.

PHOENIX

RED TIP TRACTOR SPUDS

Extra Long Service

Made of a special analysis steel, hardened by the latest scientific heat treating methods. Sizes from $\frac{3}{8}$ in. to $\frac{3}{4}$ in. Also Mower Spuds. Inquiries invited.

SAVE for your club by purchasing acclimated, winter-hardy

BENT GRASS SEED

Direct from the farms where it is grown.

A. N. PECKHAM, Kingston, R. I.
15 Years' Satisfactory Service
Also Fairway Mixtures

It is so enclosed that the dirt and the plugs when cut from the turf are confined. When the piercing and rolling operation is completed the surface of the green is left free and clean from any dirt, ready for any work.

The machine also is equipped with a set of transportation wheels which will instantly shift into position to enable the operator to turn machine without tearing the turf.

This conditioner has been used for the past year at the Longacres CC, Lawrenceville, N. J., with great satisfaction. At this particular golf course the greens and tees are constructed of 70 per cent clay soil. By using this machine the club has been able to change the soil texture of these greens about 60 per cent at a minimum cost of labor.

J. OLIVER JOHNSON APPOINTS VAN LINDER MICHIGAN REP.

Chicago.—E. C. Van Linder has been named Michigan representative for J. Oliver Johnson, Inc. Van Linder, for the past six years, has been associated with the Ideal Power Lawn Mower Co. He will make his headquarters at 348 Patty avenue, Jackson, Mich., and cover Michigan on J. Oliver Johnson's complete line of maintenance supply and equipment for golf courses, parks and cemeteries.

HYDRAULIC CONSTRUCTION IN NEW TOMMY ARMOUR BALL

Elyria, O.—The new hydraulic golf ball with patented center recently announced by the Worthington Ball Co., known as the Tommy Armour Special, is designed and built especially for the hard hitters and low handicap players. The hydraulic features of the ball are obtained by the use of exclusive Worthington patents which permit uniformity in construction and performance, and a degree of compression which Worthington says has not been possible heretofore. The cover is a superfine grade of genuine balata and windings are applied under uniform and controlled tension. Careful tests and thorough inspections mark each stage in the manufacture of the ball.

HYDROLIZER IS NEW DEVICE FOR GREENKEEPING

Elmhurst, Ill.—The new Hydrolizer system combines sprinkling with fertilizing, fungiciding or insecticiding; it does the complete job in one operation and throws a colored water stream or spray that shows the strength of the solution being applied.

A. E. Urban, President of the Hydrolizer Corporation, is inventor of the new device and also the creator of a full line of chemical concentrates which are especially

BROWN PATCH STILL DANGEROUS

September's heat and frequent rains often help brown patch do its worst damage. Now, more than ever, greens need the protection of Semesan or Nu-Green! Semesan: 25 lbs., \$46.25; 100 lbs., \$180.00; 300 lbs., \$525.00. Nu-Green: 25 lbs., \$30.00; 100 lbs., \$115.00; 300 lbs., \$330.00. Order from your dealer or golf supply house.

processed to incorporate the color compound for precision release.

While the color feature of the chemical concentrates is altogether new and serves a very practical purpose, main interest centers on the Hydrolizer itself. The construction of this machine is simple; it is portable; no preliminary mixing is required; it can be charged with its chemical in one minute and delivers perfect automatic control in every sprinkling or spraying operation.

A short hose length is used to connect the Hydrolizer with the water supply and a regulation service hose is attached to the outlet. A turn of the screw yoke releases the cover, exposing the opening to the removable chemical chamber. Enough water to partially fill this chamber is run in and the desired chemical (in powder form) is added. When the cover is replaced and secured by the screw yoke, the Hydrolizer is ready for duty. The chemical control lever is set for the desired strength of solution—anywhere from extra lean to extra rich—and in an instant the color of the stream or spray tells that it is being delivered, while the water pressure gauge shows the force behind it.

The Hydrolizer is available in three sizes: The Professional; the Intermediate and the Domestic. The chemical concentrates are made for every purpose in every division of maintenance and control. They are: Hydrocide for fertilizing; Hydrolux for insecticide and Hydromel for fungicide.

DOW CHEMICAL CO. BOOK IS VALUABLE REFERENCE VOLUME

Midand, Mich.—A book on Dow chemicals giving details of their properties, specifications, uses, shipping classifications and packing, has recently been issued by the Dow Chemical Co.

Its subject matter includes Dow's insecticides and fungicides, industrial, pharmaceutical and aromatic chemicals, dyes, magnesium and dowmetal.

Although there are not many of the Dow products of use directly in the golf field, this book is of considerable interest and value to the greenkeeper who makes a point of having a helpful reference library. A copy of the book will be sent free on request.

Milorganite	Third Cover		

CONQUER

DROUTH

NEXT year's turf problems face you right now. The drouth has brought about a crisis—demands prompt action. Only a fall fertilizing program can assure playable turf next year.

Milorganite is the surest, safest fertilizer. Builds up existing sod. Less expensive than re-seeding.

Conquer drouth. Milorganize your turf early this fall. Milorganite will restore vitality to damaged root systems, help the spread of desirable grasses this fall and what is not consumed in the fall lies dormant during the winter to give the grass plants an early start next spring.

THE SEWERAGE COMMISSION, *Milwaukee, Wisconsin*

Golf Clubs Use More MILORGANITE Than Any Other Fertilizer

The New Deal in SCORE CARDS

VESTAL offers a new one for the "copy boys" in the

New Broadmoor One-Color

SCORE CARD

\$21.00 for 5000
f. o. b., Chicago

Printed in one color by a new process (by specialists who know how) on heavy stock of good grade, it is the fullest value obtainable.

Size is not small and form similar to our two-color Regular Broadmoor; very complete and includes women's par.

Two color cards (six varieties) are available at prices ranging from \$19.00 to \$33.00.

We are originators of most of the golf standardized printed matter which we sell such as:
