

# IMPROVE YOUR GAME TOO, MR. GREENSKEEPER

**A**SK any greenskeeper who is using Goodyear Low-Pressure Tires. He'll tell you about them—how they've improved his game. You won't have to urge him either. He's enthusiastic.

He'll tell you they protect the turf. They don't dig in. They don't leave holes. He'll tell you he can do more work—faster, and do it better. He'll say Goodyears give him better traction—even on steep hills. He'll tell you they're economical. On his power machines he saves up to 25%

in fuel alone. And he likes them, too, because he can drive his tractors and mowing machines on roads, over lawns, on walks and across bridges as easily as on the fairways. They ride easily. They save his energy. They protect the machines.

Then let the Goodyear dealer near you demonstrate them at your club. He'll show you why all your rolling equipment should be on Goodyears. He'll prove Goodyear Low-Pressure Pneumatic Tires on the wheels at your club will be **MONEY SAVERS.**

*For Comfort,  
Speed, Convenience—  
the Beautiful Model C-1*

# INTERNATIONAL STATION WAGON

**I**N THIS station wagon the beauty of the International Model C-1 finds its truest expression. The sloping V-radiator, the sweeping valanced fenders, the graceful windshield, and other refinements of detail offer sharp contrast to the natural finish wood of the comfortable station-wagon body. The effect of smartness is produced by every curve and angle—yet

smartness is only one of the many attributes of this International.

The station wagon is a practical unit, powered by an efficient 6-cylinder engine of rugged International design and construction. It offers unusual acceleration and speed, guarded by husky brakes providing instant, easy control. Ask our nearest branch, or an International Truck dealer, for a demonstration.

# Worthington Mowers

First it pays for itself in the money it saves. Then it keeps right on saving that money, constantly cutting down cutting costs.

## PAYS FOR ITSELF IN CUTTING DOWN CUTTING COSTS

IF yours is an 18 hole course, isn't it so, that it takes *four men* the best part of half a day with hand mowers, to do the job right?

Suppose then, *one man* could do the same job in less time and do it better, would you be interested?

Easy enough to figure how that saving would cut down your cutting costs.

"But", you reply, "a Worthington Over-

green runs into money." Our reply to that is: What if it does run into money. It doesn't actually cost you any money, simply because it pays for itself in the money it saves.

Of course if saving money doesn't interest you—well then, send for the catalog just the same. Some of the other good things this Worthington Overgreen does may be of interest.

# Fairway Watering costs are Down!

Most clubs know the vital importance of adequate watering for improving and protecting their turf.

Few, it seems, know what a modern fairway watering system costs—they are guessing, and guessing altogether too high.

Today fairway watering costs are down. Let us give you accurate installation and operating cost information gained from experience with hundreds of installations.

## Save . . .

- Your investment in turf from disastrous results of drouth.
- Your membership roster from migrating to neighboring watered courses.
- The costs of experimenting with unproved equipment and faulty installation. Let the other fellow do the experimenting.

Ask your local **BUCKNER** dealer or

**A** Six Extra Heavy Curvilinear Steel Blades double riveted to five Sturdy Spiders. (Assure uninterrupted service.)

**B** Lower blade with two raised edges is reversible. (Reduces maintenance cost.)

**C** Absolutely dust-proof casings protect gears. (Reduce wear to minimum.)

**D** Three machine cut gears on both sides. (Assure even pull.)

**E** Timken Bearings on Cylinder with positive adjustment to take up wear. (Makes for smoother operation.)

**F** Dust-protected adjustable single Ball Bearing on ground roller. (Eliminates irritable spot common in other mowers.)

**G** Alomite Lubrication Throughout. (Means Longer life.)

**H** Adjustable ground roller. (Makes unit adaptable for use in rough.)

## NELSON "STREAM-FLO" Quick Coupling Valves and Sprinklers For Fairway Sprinkling

"Stream-Flo" Valves are attached to pipes laid underground. Self-closing caps are flush with the surface.

To the Valve Key is attached a "Stream-Flo" Sprinkling Head. When Key is inserted into the top of the valve, water is released into the sprinkler head for maximum throw. Disconnecting the Key automatically shuts off the water. One man does the work of two or three with hose. Send for special folder.

**L. R. NELSON MFG. CO.**  
Peoria, Ill.

"Stream-Flo"  
Valve

Key inserted in valve. Large "stream-lined" passages allow full flow without loss of pressure. When closed the pressure keeps it closed tight.

"Stream-Flo" sprinklers cover evenly areas 100 to 125 feet in diameter.

"Stream-Flo" Sprinklers are fool-proof, and sure turning. Short, sturdy arms make them easy to handle.

# Moto-Mower

**FOR 17 YEARS**  
THE PREFERENCE OF USERS  
OF POWER LAWN MOWERS

Light, sturdy and simple to operate. Clutch engaged or disengaged by raising or lowering handle bar; clutch permanently engaged or disengaged by clutch control lever, also automatically controlled speed of engine when turning. Weight is so perfectly distributed that the ground pressure on greens is no greater than a golfer's foot.

Transport cart with pneumatic tires at slight additional cost.

## Men Who Really Know Machinery... BUY TORO!

**G**O around to any section and ask the most prominent Superintendents just what machinery to buy. Three out of four will answer "Toro".

There is a reason for this, because for fifteen years the Toro name has been associated with progress in high quality construction and courtesy in dealing with users.

That is why today the vast majority of able Superintendents will answer your request in two simple words—"Buy Toro".

Shop around if you wish. You will find cheaper machinery, but if you follow the judgment of experienced men, your choice will be Toro.

# WAKE-UP!!

... give your members  
a course to crow about!

Wake up and build up your turf first, if you want to get your members crowing to their friends about the condition of the course. The surest way to get healthy, permanent turf is to feed with a *natural grass food*. That's why hundreds of America's finest courses use —

7  
reasons why:

1-It is a natural grass food and stimulant. 2-It is a balanced manure containing 6% Ammonia, 2.50% Phosphoric Acid and 1 to 2% Potash. 3-It contains no live weed seeds. 4-Being organic, it aids humus and aids bacterial action. 5-It can be applied with a minimum of labor and expense. 6-Being more soluble than other manures, it is more available. 7-Being finely pulverized, it is quickly absorbed into the soil.

# ARCO CAST-IRON PIPE

## FOR GOLF COURSE IRRIGATION SYSTEMS

(Above) Note the adaptability of the flexible coupled line to the contour of the ground.

ARCO CAST-IRON PIPE with special flexible couplings, offers the following advantages for Golf Course Irrigation Systems:—

- Permanency of cast-iron.
- Flexible joints that take up expansion and contraction in the line, and provide for soil strains and stresses.
- Low first cost.
- Quick and economical installation.
- Easy to remove and relay with 100% salvage.
- Uses standard stock fittings—no special fittings required.

**DETROIT MOTOR  
SCYTHE**

- Here is the most economical and easily handled cutter on the market
- It goes anywhere, cuts anything, and enables one man to do the work of four or more with hand scythes.
- It has a 36-inch sickle driven by a powerful one-cylinder gasoline motor and is mounted on a free running 30-inch wheel, allowing it to be backed up, pivoted sharply, or tilted up or down slopes similar to a wheelbarrow.
- It is now produced by a recognized leader among mower manufacturers and during over four years of service, thousands of users have enthusiastically testified to its dependability.
