

TORO MASTER MOWERS

The Master way is the modern way—correct in design, dependable in service, accurate in cutting—the most advanced method of cutting large areas of grass.

THE MASTER THREE Cutting Swath Seven Feet

Can be enlarged into a Master Five or Master Seven by merely adding extra mowers and extension frame. No holes to drill or alterations to make. Everything is ready. Steel or pneumatic wheels.

THE MASTER FIVE Cutting Swath Twelve Feet

Can be enlarged into a Master Seven by merely adding extra mowers and extension frame. No alterations. Steel or pneumatic wheels.

Will cut the average 18 hole golf course in 8 hours or less. Steel or pneumatic wheels.

THE MASTER SEVEN Cutting Swath Sixteen Feet

Will you feed THE WORMS

A luxuriant golf green is a banquet for worms, grubs and beetles. They will thrive on it and eat it down to the roots. They will make bigger and better worm casts to interfere with putts. They will cause replanting and other expense.

But when you use Dow Lead Arsenate properly, you will find that the worms die but the greens thrive. You avoid bare spots, holes and worm casts, and discourage growth of noxious weeds like chickweed, fennel and crabgrass. And you pay only a little to save a lot of expense.

Protect your greens with Dow Lead Arsenate. Get your supply now. We invite inquiry from responsible dealers in districts where we have open territory.

A **FLEXIBLE** FRAME MAKES THE IDEAL BULLDOG A SMOOTH OPERATOR ON HILLY OR ROLLING GROUND

Here's why the Ideal Bulldog cuts smoother: The frame is flexible, with every cutting unit operating independently. In addition, the famous 7-blade Bulldog cutting units are close-coupled in construction, so that they don't straddle hollows, and don't scalp ridges.

The result is that the Bulldog, with almost uncanny ability, cuts smoothly, no matter what type of fairway it is operating on. It "fits"

over sharp hillocks, adjusts itself to small hollows.

The frame is light in weight for easier drawing. The entire construction is extremely rugged for long, trouble-free service.

Available in 3, 5, 7 or 9-gang, with the units easy to put on or take off. And, best of all, the price is extremely reasonable on this widely used mower. *Write for the details.*

LIGHTEST AND MOST ECONOMICAL

Because it can double the amount of cutting per day over hand work and can do a perfect cutting job, the Ideal Power Greensmower is head of the list in value. Light as a feather. Can't burn or scuff turf. Used by hundreds of the finest clubs in all parts of the country. Two sizes: 21-inch and 18-inch. Write for prices.

NELSON "STREAM-FLO" Quick Coupling Valves and Sprinklers

For Fairway Sprinkling

"Stream-Flo" Valves are attached to pipes laid underground. Self-closing caps are flush with the surface.

To the Valve Key is attached a "Stream-Flo" Sprinkling Head. When Key is inserted into the top of the valve, water is released into the sprinkler head for maximum throw. Disconnecting the Key automatically shuts off the water. One man does the work of two or three with hose. Send for special folder.

"Stream-Flo" Valve

Key inserted in valve. Large "stream-lined" passages allow full flow without loss of pressure. When closed the pressure keeps it closed tight.

"Stream-Flo" sprinklers cover twenty areas 100 to 125 feet in diameter.

"Stream-Flo" Sprinklers are fool-proof, and sure turning. Short, sturdy arms make them easy to handle.

DETROIT MOTOR SCYTHE

- Here is the most economical and easily handled cutter on the market
- It goes anywhere, cuts anything, and enables one man to do the work of four or more with hand scythes.
- It has a 36-inch sickle driven by a powerful one-cylinder gasoline motor and is mounted on a free running 30-inch wheel, allowing it to be backed up, pivoted sharply, or tilted up or down slopes similar to a wheelbarrow.
- It is now produced by a recognized leader among mower manufacturers and during over four years of service, thousands of users have enthusiastically testified to its dependability.

NOT JUST "PROTECTED AGAINST BREAKAGE"
 NOT MERELY "BREAKPROOF"
 NOT ONLY "RUGGED AND TOUGH"

But guaranteed
UNBREAKABLE

FEATURES

1. Giant 36 in. Fairway saves time—gas—labor.
2. Giant works 20% faster with 20% wider cut with 20% less labor, yet costs only \$15 more than 30 in. unit.
3. Six Crucible Steel, extra wide, extra heavy blades.
4. Reversible chrome steel lower blade.
5. Three cut gears on *Both* sides, dust protected.
6. Adjustable Timken roller bearings on cylinder.
7. Alemite lubrication throughout.

It costs us three times as much for the *malleable iron* construction of the DeLuxe Pennsylvania Fairway, yet it costs *you no* more to enjoy its advantages. Why be satisfied with conventional cast iron machines when a genuine "Pennsylvania"—guaranteed against breakage—assures uninterrupted service and eliminates the waste of money and time caused by broken parts.

Here is one way to reduce your operating and maintenance expenses without even paying a premium for *extra value*.

And, by the way—this DeLuxe Fairway is as safe in the rough as in the open. One of many money saving features exclusive to Pennsylvania Quality Mowers. A catalog will tell you of the others.

NO CURE, BUT—

EXPERTS agree that there is no cure for brown patch, but this grass disease can be kept from attacking your greens — can be checked if already started — by sprinkling Diworma. In many localities, the only clubs free from brown patch last year were Diworma users. This chemical also kills worms—ends the cast nuisance. Details on request—without obligating you.

GREENER Summer Fairways

LOWER Summer Costs

Greener Fairways—because Florida Humus holds moisture; because it gradually releases stores of health-giving organic nitrogen; and because it encourages strong root growth.

Lower Costs — because Florida Humus means less water and fertilizing.

Florida Humus has been the find-of-the-year for many golf clubs. Ask your nearest distributor, listed below.

THE ANALYSIS of Florida Humus (Wiley & Co., Baltimore, No. 129117) shows

Nitrogen content (dry basis).....	3.25%
Water Holding Capacity.....	581.12%
Acidity pH	6.2*

*Very slightly acid. Will not sour the soil. 7 is neutral.

SPIKE DISC

LAWN & GREEN
CULTIVATORS
(Patented)

TURF AERATION IS A NECESSITY

And SPIKE DISCS are essential for opening the soil that turf may "breathe". But that is not all they accomplish, the knife-like blades permit moisture to seep in and help prevent seeds and top dressing from being blown or washed away. Leading greenkeepers everywhere advocate their use regularly throughout the season.

SKINNER SYSTEM OF IRRIGATION

"Our SKINNER SYSTEM Is Perfect"

An Authority Speaks

So says Don Boyd of the Portage Country Club, Akron, Ohio, when asked by us as to suggestions for possible improvement.

"Look at this turf," he added, "We are proud of it."

A Big Green Mat

No wonder—stretched out over the fairway lay a heavy mat of sturdy turf. The edges of the watered area were clearly defined, just as if you had rolled out a heavy tufted green mat, laying it on top of the ground.

No Bad Lies

Fairways that were nearly bare year before last, now are so heavily covered that a "Bad Lie" is almost an impossibility.

"These fairways were once as full of dandelions as you see the rough. Now you scarcely can find a weed."

Water Does It

Correct watering, fertilizing and seeding have done this. Without the proper watering the rest would have been impossible.

Experience Counts

For 25 years the company has met and solved every sort of watering problem the whole world over.

This has brought into the Golf Field a wealth of experience which builds into practical, durable, dependable equipment, correct watering principles, which distinguish the Skinner System of Irrigation from all others.

Use Our Service

Our service is at your command. Drop us a line, regardless of whether your problem is a big or little one.

OFF
YOUR
GREENS**

WITH FUNGOL

**FUNGOL SLASHES COSTS OF
BROWN PATCH AND SOIL VERMIN
CONTROL**

All over the country, the sales of high power FUNGOL are increasing --- for two good reasons. One is Greenkeepers want the most Brown Patch prevention for every dollar they spend.

Second, if they use FUNGOL, it is unnecessary to buy other chemicals for eradication, of Earthworms, Cutworms, Sod Webworms, Grubs, etc.

And the big covering capacity means real economy. A pound of FUNGOL treats 3,000 to 7,000 square feet of Green.

Learn more about FUNGOL by writing for free testing samples and our efficiency application schedule.
