

This installation of two International Diesel Power Units will give you an idea of what is being done by these engines. These units replaced a 90-h.p. electric motor. They are operating a pump delivering 51 miner inches of water from a depth of 410 feet—with an additional lift of 32 feet through 1100 feet of pipe to a reservoir.

Here is the Low-Cost Power You Need for a Watering System International Diesel Power Unit

Power is an important part of a fairway watering system—and the International Diesel Power Unit is especially qualified to deliver the dependable, low-cost power that is needed. It burns Diesel fuel, which is low-priced, and it uses comparatively little fuel for the work it does. Compare the operating costs of the International Diesel with other forms of power and

you will readily see how much money this engine saves. And if you want to cut your light and other power costs, let the International Diesel drive a generator. Investigate this engine now and find out how your club can benefit by it. The nearest Company owned branch, or International industrial dealer, will go into details. Or write us for information.

INTERNATIONAL HARVESTER

The Perfect Putt --

may depend on

DOW LEAD ARSENATE

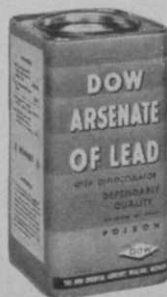

Click! The ball starts for the cup. Will it drop?

Or will defects caused by worms, grubs or beetles deflect its course, causing the loss of a stroke—and loss of temper?

Well kept courses are overcoming these natural hazards by the simple and inexpensive use of Dow Lead Arsenate. Not only are greens kept in perfect condition but the heavy costs of repair and replanting are avoided.

Apply Dow Lead Arsenate as recommended and you will have good cause to be proud of your greens. For, in addition to its effective control of worms, beetles and grubs, it also hinders the growth of chickweed, fennel, crabgrass and other troublesome weeds.

Order a supply of Dow Lead Arsenate now and start the season right.

THE NEW IDEAL BULLDOG

In the new Ideal Bulldog are found all the time-proved work-tested features that have made this gang mower the favorite on many hundreds of courses.

And now—the Bulldog is even better, even more economical. Drop forged steel ring gears—hardened cut steel pinions—triple pawl ratchet—steel roller mounted on roller bearings—double-lip bottom knife—special lugged wheels—and a drive mechanism that is the simplest and most dependable ever developed.

Here is a mower with all the features that assure smoother, more thoroughly-cut fairways—flat or hilly—longer life and lower cost—more work per day.

3 to 9 gang—interchangeable. Get details on the finest gang mower that Ideal ever built.

HALF Costs run about half the usual when this power greensmower is used. Feather-light, it won't scuff or burn the turf. Proved in service on some of the finest greens in the country. Write for details.

KILL *the* GRUBS

by Introducing
Grasselli

Arsenate of Lead
to your Greens, Fair-
ways and Lawns

Greenkeepers and other turf authorities know by experience that the use of lead arsenate is the most effective method of preventing and controlling the ravages of grubs, earthworms and webworms.

For years, thousands of acres of golf courses have been protected by treatment with lead arsenate for preventing impending grub attacks or for killing grubs and worms already present in the turf. But—the quality of the lead arsenate used is vital. GRASSELLI Arsenate of Lead assures success in controlling grubs and earthworms because of its superior strength, fineness of particles and uniformity.

Grasselli Arsenate of Lead may be secured in 100 pound drums and 4 pounds bags, 12 or 6 to a carton, 5 pound bags, 10 to a carton. Stocks are carried at our various warehouses. Write our nearest office listed below.

THE MOST ECONOMICAL HOSE

YOU CAN BUY

WE frankly admit that Good-year Emerald Cord Hose will cost you a little more than many brands. But when you consider that it often lasts *two to three* times longer, its economy is self-evident.

Users say it's the finest hose ever built — and with good reason! Its handsome tough green cover is compounded of special *non-oxidizing* rubber that does not check and crack under the hot summer sun like ordinary hose.

It is sturdily armored with broad flat ribs that protect it from abrasion against trees, walks, etc. And it is reinforced with a double carcass of heavy double-braided cord* that shoulders the dragging, yanking, "tow-rope" strains that are so hard on most hose.

Wash out the hose question for several years by ordering Goodyear Emerald Cord this spring. If your dealer doesn't handle, write Goodyear, Akron, Ohio, or Los Angeles, California.

Those who know the Chicago District

- know that it is the most compact of the nation's major golf centers;
- know that the business of supplying the 80,000 players in the immediate district, as well as thousands in outlying sections, is a *big business*;
- know that the vast majority of this business clears through the golf professionals of the district—

and if you don't know and want to find out where these Pros do their buying, just stand a short watch at the entrance of

The **LYTTON Building** **14 East Jackson Blvd.**

The LYTTON BUILDING is the Pro's buying headquarters. Their habit of coming here first is a long established one . . . and a profitable one for our golf tenants. Let us tell you all the advantages of this famous golf address.
