formation on these units, may be obtained from the manufacturers.

WANAMAKER'S wholesale golf have new Joyce Wethered iron clubs for 1936, the design of the heads being changed by Miss Wethered as a result of study made during her highly successful American tour last summer.

The new Wethered irons have a combination flange and center weight on the back of the head. Prior to her American

trip she was not in favor of flanged sole irons. The model she developed while in this country also is being made the model for her English irons.

STUMPP & WALTER CO., 132 Church St., New York, have published their 1936 seed annual which is a practically indispensable item for the greenkeepers' working and buying reference library. A copy will be sent free on request.

# *for the long, long pull*

UNQUESTIONABLY one of the big reasons why more golf clubs each year are using Milorganite is because it yields up its rich nourishment gradually, uniformly over long periods of time. Thus one feeding in the Spring gives the turf a healthful, continuous diet that insures vigorous turf throughout the entire summer. When Fall comes, one more feeding revitalizes the turf, carries it through the winter, enables it to "wake up smiling" in the Spring. A simple program, easy to follow — with universally successful results demonstrated on course after course...This year, use Milorganite on your fairways and greens.

ONE  
APPLICATION  
in the Spring  
then ONE  
in the Fall

**THE SEWERAGE COMMISSION**
