

The International Fairway 12—the tractor that provides economical power for a great variety of work on golf courses, parks, etc.

From Maine Comes Praise for the International FAIRWAY Tractor

“WE ARE very, very well pleased with the International Fairway 12,” says F. H. Jackson, M. D., chairman of the green committee of the Houlton Country Club, Houlton, Maine. “It is most satisfactory and no club will make a mistake in buying this tractor. If we had to replace the Fairway, I would insist on another one.

“It is very economical. Our service on it has been little or nothing beyond the usual spring clean-up. We formerly had another make which was expensive and had a high cost for service and repairs. The man who runs the Fairway says it is the best machine he has ever

used. The local dealer looks it over occasionally and we like this service very much.”

The Fairway mows nine fairways in nine to twelve hours with a gang of five mowers that cut a swath nine feet wide for the Houlton Country Club. It is also used for rolling, distributing fertilizer and compost, running the compost mixer, and hauling wagons.

You will be well pleased, too, when the International Fairway works for you. Its capacity for work and adaptability to a wide variety of jobs, plus its remarkable economy, recommend it for all golf-course and park work. See the nearest Company-owned branch or dealer for a demonstration.

INTERNATIONAL HARVESTER

Worthington Mowers

SAVED \$2,000

A CLUB you all know well, needed \$2,000 to make certain improvements. The Board of Governors was perfectly willing to spend the money if it could somehow be saved. But they refused to add \$2,000 to the budget.

The Greenkeeper showed his Chairman that he could save the \$2,000 without in any way slighting the care of any part of the course. He showed him how one man with one Overgreen could save the cost of three men with three hand mowers. He proved to him that the Overgreen paid for itself with the money it saved.

It is a 27-hole course. They have three Overgreens and attachments for mowing tees and approaches. They detach the mowers and use the tractors for rolling, discing and harrowing. Saved \$2,000 in a year.

An Overgreen costs \$550. Pays for itself in a season in money it saves. The next season what it saves is **clear gain**. Just so much money available for other things.

The fact that Worthington equipment has been used on 80% of the tournament-played courses in the last 12 years tells its own story without our saying a word more. Send for catalog. Get the full facts. See for yourself.

"The Perfect Curtain of Water"

produced only by BUCKNER equipment, is one of the reasons why government specifications for sprinkling equipment read "BUCKNER or equal".

Over the past twenty-two years BUCKNER has pioneered in the introduction, or perfected the design of every important development in the irrigation field. Naturally BUCKNER sprinkling equipment and systems are the standard by which all others are judged. Always specify BUCKNER... Make reservations now for your copy of the new BUCKNER Catalogue.

"PLUS"

Mallinckrodt

CALO-CLOR

that looms large
IN BROWNPATCH CONTROL

CALO-CLOR was prepared years ago, tried, demonstrated and proved right. We have never found anything that could be done to improve its chemical properties and efficiency. But we did find a way to improve it physically—to keep it in better suspension in a spray solution. It is the same, dependable, CALO-CLOR that for years has saved one-half to two-thirds the cost frequently expended on fighting brown patch. It is the same CALO-CLOR, PLUS a means of insuring that every ounce of it will get where it will do the most good. For those who use the dry method of application, we still recommend regular Calo-Clor. If you use the spray method, ask for SUSPENSION Calo-Clor. Buy either from your dealer . . .

Mallinckrodt Chemical Works, St. Louis, Mo.

TORO

ALL OVER THE WORLD

F-L-E-X-I-B-I-L-I-T-Y

Up hill or down dale, around traps, bunkers, chocolate drops or what have you, the Toro Master Seven is the most highly f-l-e-x-i-b-l-e machine on the market. Full floating mowers is the answer. Every individual mower is engineered to follow the ground, regardless of whether it is rough, humpy, corrugated or smooth as a billiard table. The result is perfect cutting.

But that is not all. The Master Underslung arrangement gives you a greatly shortened over-all length—far less than any pull type machine on the market where the mowers are carried in a separate frame behind the drawbar. The Master Seven is **SIX FEET SHORTER** on the average than any other tractor mower of like capacity.

These are just a few of the able Superintendents will tell

many reasons why three out of four you to "Buy Toro."

THERE'S A REAL REASON WHY NEIGHBORS SELECT SKINNER . . .

They Know Its Value

In Florida the Hollywood Municipal Course installed Skinner System Fairway watering and in less than a year developed the best turf in Florida. Play gravitated to it.

This season Hollywood C. C. followed the example of its neighbor and is installing an exclusive Skinner System.

Ft. Lauderdale, only a few miles distant, has now installed Skinner System Sprinkling equipment for fairways and greens and the improvement is a matter of comment.

Skinner System is proud to know that the value and efficiency of its equipment is talked of amongst neighbors . . . can't we be of help to you in planning your watering?

•Scores of Golf Clubs have congratulated us on the complete and interesting information given in our New Golf Irrigation Manual.

A copy is yours for the asking. Use our planning service.

Lawns, Gardens

**Harmless to Humans,
Animals and Birds**

Red Arrow Garden Spray effectively controls ants and sod web worms, yet will not injure the turf or affect the fertility of the soil. Red Arrow is a concentrated pyrethrum extract combined with a special soap. Simply mix with water and apply with any type spraying apparatus. Red Arrow is safe to use—harmless to humans, animals and birds—and has no poisonous or irritating fumes. Also kills many varieties of sucking and chewing insects on flowers, vegetables and fruits. Ask your supply jobber or write for complete information.

Selected by America's Finest Clubs

—because it does finer work

The Ideal Power Greensmower has three outstanding features of superiority: It does perfect work. It saves labor. It is lightest in weight.

Most important of its good qualities is the fine, uniform job of cutting that it does. Putting greens mowed with an Ideal have the truest possible putting surface. That the Ideal is the accepted leader in its field is evidenced by the fact that Ideals are being selected by clubs that positively will not sacrifice quality merely to save on labor.

Following are a few of the hundreds of clubs throughout the country using one or more Ideal Power Greensmowers—many of them being leading clubs of their section.

"Stream-Flo" sprinklers cover evenly areas 100 to 225 feet in diameter.

"Stream-Flo" Valve

60 CUTS PER SECOND with ONE CUTTER

Whirling at a speed of 1800 r. p. m., the Whirlwind cutter makes short work of even the most rugged stand of grass or weeds. Its horizontal, scythe-action blade is designed to create a suction which draws stubborn vegetation and low-lying grasses directly into the path of the cutter. It not only cuts grass of any height TO any height (grass roots to 3 inches), but it chops the cuttings finely so they may sink into the roots and produce fertilizer of high value. This is but ONE feature—get the whole story—

STOP INSECT DAMAGE

to
GREENS, TEES AND FAIRWAYS
with

NuREXFORM
The Improved Arsenate of Lead

The damage wrought by grubs, earthworms and webworms to greens, tees and fairways, if these pests are permitted to feed unmolested on the roots of the fine textured grass, is an eyesore to the golfer and vexatious to the greenkeeper and the greens committee. And isn't it aggravating to putt on earthworm infested greens? The numerous tiny mounds—the handiwork of the earthworms—surely don't improve one's putting game.

There is no need for such conditions to exist for it is possible to protect greens, tees and fairways against the ravages of these pests with NuRexform, the Improved Arsenate of Lead.

Grasselli Arsenate of Lead is also effective for this purpose.

LONG LASTING

OUTSTANDING is the fact that Milorganite releases its generous supply of plant foods gradually over long periods of time.

This serves three practical purposes: It insures a constant, steady and ample supply of grass food — when the grass needs it. ● It permits complete, all-year fertilization with only two applications per year — One in the Spring; One in the Fall. ● It saves time and attention and reduces labor.

Undoubtedly these are some reasons why Golf Clubs use more Milorganite than an other fertilizer.

THE SEWERAGE COMMISSION, Milwaukee, Wis.

MILORGANITE

SPRINKLING STOPS BROWN PATCH

LARGE brown patch—small brown patch—Diworma fights them both! Fortifies greens and lawns against these fungus diseases. Retards them if already started. Does not burn or brown the grass. Goes so far—costs so little in use! Also: Diworma eradicates worms—angle worms, night crawlers and even wire worms. They come up to the surface and die. You rake them up—that's all. Please write.
