

An International Power Unit on a water pumping job—an example of how these units can be applied to golf-club requirements.

Solve Your Power Problems with International Power Units

International Power Units will show you something new in economy when it comes to pumping water for the fairway watering system, clubhouse, or swimming pool; for generating electricity; for miscellaneous work such as mixing compost; and for practically every stationary power job requiring up to 100 h.p. or more. Where peak loads require more than 100 h.p., multiple installations of two or more International Power Units can be made, effecting appreciable savings by operating

only the number of units that are needed at any one period of the day.

A survey of your power requirements and a comparison of the operating costs of International Power Units with your present power bills will gladly be made by the nearby Company-owned branch or dealer. This will show you how you can save money for your club by installing International Power. The line includes 4 and 6-cylinder engines, and a Diesel engine. Write us for catalogs.

INTERNATIONAL HARVESTER

*Keep greens
in the Pink of Condition*

with

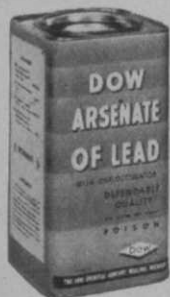

DOW LEAD ARSENATE

More and more clubs have found Dow Lead Arsenate the easy and inexpensive way to rid greens of worms, grubs and beetles.

Players are loud in their praise of the fine, velvety surface—and club budgets benefit by saving costly repairs and re-planting.

Plan to use Dow Lead Arsenate this season. It will actually do more than overcome worms and their companion pests—it will discourage chickweed, fennel, crabgrass and other annoying weeds, as well.

Order a supply of Dow Lead Arsenate now and watch your greens keep in the pink!

THE DOW CHEMICAL COMPANY, Midland, Michigan

One Man and One Overgreen Do The Work Of Four Men With Four Hand Mowers

1. Every six mowing minutes, one man with an Overgreen can mow a green. Allowing ample time going to and from the course, and from one green to another, one man can mow 18 greens in 5 hours.
2. The 8-blade reels can then be changed to four, and the approaches cut.
3. The 3 mowers can be dropped off, and a 30-inch Fairway Unit attached, and the grass about the Club house and other portions not practical for gang mowing, can be cut at the rate of an acre an hour.
4. The Overgreen Tractor can also be used for rolling, discing and harrowing.

An Overgreen pays for itself in one season with the money it saves.

Worthington Mowers

NON-SLIP

Dual-Wheeled Tractor

Without slipping it will pull anything anywhere, that is used on a golf course.

Tires are 7:50 x 16. Frames in both the single and dual wheeled Worthington Tractors have a

tensile strength of 63,000 lbs. per inch. Rear ends guaranteed against breakage. Now no matter how hilly your course is, you can use rubber wheeled tractors and have no slipping.

The dual-wheels give you ample traction in wet grass and up steepest hills. Overcome packing of steel wheels.

Although the Worthington weighs less than some, it is staunch and strong at every point. No needless weight. Bear in mind weight doesn't always mean strength. It is the kind of metal and how used that counts.

Dual-wheel automatic dump body tractor. Body capacity of 3,500 lbs. Equipped with Ford truck springs.

This automatic dumping body needs no tail board. Rectangular body holding full cubic yard, having automatic opening tail board furnished at same price.

United States Government specifications for sprinkling equipment read—"Buckner or equal." Behind that simple statement of a standard for quality and performance lies the nation-wide acceptance of the standards maintained by The Buckner Manufacturing Company, and the knowledge and skill of Buckner engineers.

Over the past twenty-two years Buckner has pioneered in the introduction, or perfected the design of every important development in the irrigation field. Naturally Buckner sprinkling equipment and systems are the standard by which all others are judged. Always specify Buckner.

FIRST CAME STEEL... THEN COP-R-LOY

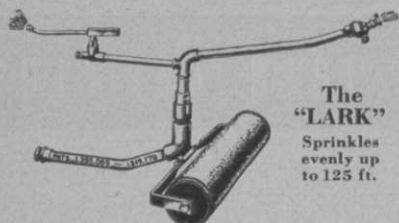

Turf as fresh as Spring, in July and August! That's the course with watered fairways. Costs so little, saves so much . . . an irrigation system for fairways and greens that can be operated by one man every evening. Such systems today are a sound investment for the future when the piping is COP-R-LOY. Green committees who would stretch out their expenditures over *more years* will find it worth while to select those leading engineers who use COP-R-LOY Pipe. (Names on request.)

Write the sole manufacturers of COP-R-LOY pipe . . .

KILLS ANTS, SOD WEB WORMS on Greens, Lawns, Gardens

Harmless to Humans,
Animals and Birds

Red Arrow Garden Spray effectively controls ants and sod web worms, yet will not injure the turf or affect the fertility of the soil. Red Arrow is a concentrated pyrethrum extract combined with a special soap. Simply mix with water and apply with any type spraying apparatus. Red Arrow is safe to use—harmless to humans, animals and birds—and has no poisonous or irritating fumes. Also kills many varieties of sucking and chewing insects on flowers, vegetables and fruits. Ask your supply jobber or write for complete information.

UNIFORMLY SUCCESSFUL

MILORGANITE is the fertilizer that has been uniformly successful over a ten-year period in establishing and maintaining healthy turf—in all climates, on all soils, with all types of seed and under all weather conditions. Milorganite releases its plant foods gradually, consistently, continuously.

These facts, explain why more Golf Clubs every year are depending on Milorganite to insure better fairways and greens. In fact, wherever turf maintenance is important, Milorganite eventually wins a key place in procedure.

TORO SUPER FAIRWAY MOWER

*F*ROM a QUALITY standpoint, there is absolutely no difference between the TORO Super and the TORO Trojan fairway mowers. There is, however, a distinct difference in design because the Super is built for standard speeds of four to six miles per hour, while the Trojan is designed for high speed.

The Super has been manufactured since 1923 . . . thousands of them are delivering faithful service in all parts of the civilized world. Mechanically perfect and will deliver the highest type of service under any soil or climatic conditions. It has a high frequency of cut and will do a clean smooth job at speeds as low as three miles per hour. Built with machine-cut steel gears running in oil-tight housings. Similar high grade construction throughout. The chrome vanadium steel bed knives are reversible, providing double service . . . also cadmium plated to protect against rust and corrosion.

It pays to get the best in mowing machinery. TORO has it. Write for Toro Tractor and Mower Catalog.

THE MOLE RIGHTS

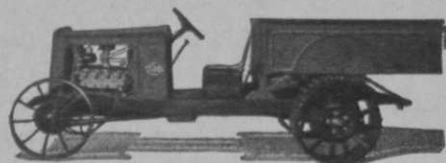

Greenkeepers from the old country tell us that the mole rights on a golf course are valuable there. A mole-catcher rids the course of the pests; for compensation gets the skins.

But American moles are not worth much as fur-bearers. So wise greenkeepers do the next thriftiest thing: use Nomole. This chemically-treated mole food is put into the mole runs. Moles devour it, vanish in 2 days. No traps, no messy disposal job. Write for details!

Send for 1936 Ground Maintenance Manual.
No charge.

THE C. B. DOLGE CO.
