and reel enables Lawn-Boy to trim 6 in. closer to shrubs, trees and walls than a hand mower, the makers claim.

Sales points include: weight, 195 lbs; cuts 18 in. swath; is only 25 in. wide; will mow up to 3 acres a day; fuel cost 20c; governor-controlled speed from 2 to 3½ miles per hour; four cutting heights, ½ in. to 1¾ in.

Lawn-Boy retails for \$110 (with rubber tires, \$120), sells on easy terms and carries the same guarantee as Evinrude Outboard Motors.

Darmil Corporation, 1416 Walnut St., Kansas City, Mo., is introducing to the equipment market its new precision Seeder, which measures and plants all kinds of grass seeds evenly at a uniform depth. Fourteen circular knives of saw-steel, 1¼" apart, cut narrow furrows into which the seed drop. Only half the usual

amount of seed is needed, the makers claim, since they are not scattered to the wind, but actually planted. On any medium sized to large seeding program the original price of the machine can be saved.

Mechanically built to last a lifetime, it is easy to manipulate and will turn at short angles. The Darmil seeder was created by T. H. Riggs Miller well known turf authority and developed by Eugene Darnell.

"QUICK, WATSON THE NEEDLE!"

To withstand the terrific punishment handed out to them, your fairways and greens need continuous vitality. You won't have to watch the strength of your turf ebb away just when it needs strength most, you won't need sudden tonics or restoratives if you use Milorganite.

Milorganite releases its rich plant foods gradually, persistently, continuously over long periods of time. That is why just one application in the Spring is all that is needed to give you healthy, luxuriant turf throughout the playing season. Another application in the Fall completes the program providing a balanced, year 'round diet. Simplicity, dependability, universally successful results, economy — four excellent reasons why more golf clubs each year specify Milorganite.
