

FRANCE: The Tours Golf Club, Tours, France, uses the International Fairway Tractor to maintain the course and to do other work.

## Low-Cost Power for a Variety of Golf-Course Work

Gangs of seven or nine mowers, compost mixers and distributors, rollers, pumps, and wagons are only a few of the machines operated easily by the International Fairway Tractor. Its power can be applied so extensively that new uses are being found for it constantly. It delivers its power through draw-bar, belt, and power take-off.

For all the work it does, the Fairway Tractor is usually economical to operate. Pulling a seven or nine-gang mower, running a

compost mixer or a pump, or doing similar work, it uses less than a gallon of gasoline an hour.

The Fairway is the product of International Harvester—largest tractor builder in the world. It is designed especially for golf-course work, and has years of service built into it. See the nearest Company-owned branch, or International industrial dealer, for complete information on the Fairway Tractor. Or write us.

**GREEN MAINTENANCE**  
*with*  
**DOW LEAD ARSENATE**

Finer greens for less money is, obviously, the objective of every club.

Dow Lead Arsenate is doing much to achieve this result for it is the easy and inexpensive way to rid greens of worms, grubs and beetles.

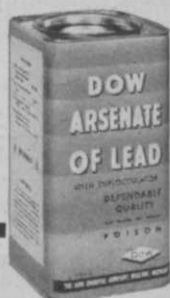

Properly applied it keeps greens in perfect condition and saves the high costs of repairs and replanting.

Moreover, it cuts down the growth of troublesome weeds such as chickweed, fennel and crabgrass.

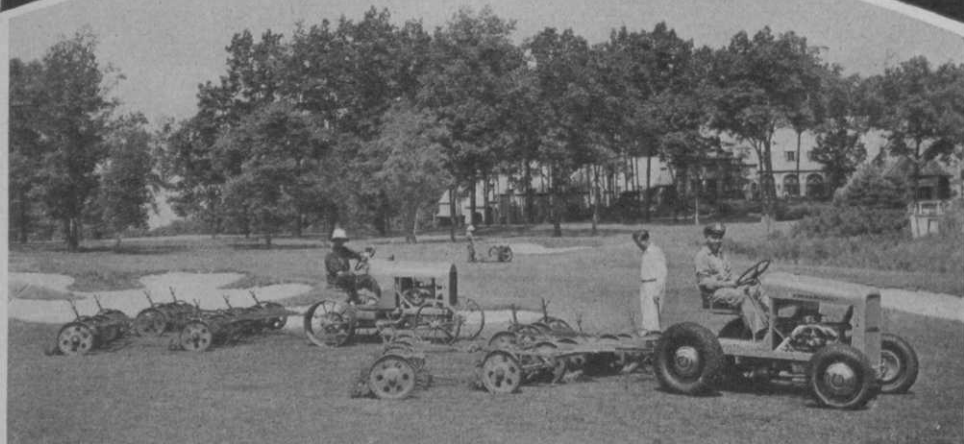

Use Dow Lead Arsenate this season and see, by actual experience, how it does an excellent job at little cost.

<b>100%</b>	<b>83%</b>	<b>75%</b>	<b>58%</b>

The truth of the matter is, there are more Worthington Mowers in use in all the countries of the world, than all other makes combined.

Such could not be so if it were not for Worthington's sturdy equipment and precision of workmanship. The consistent way that year after year they have cut down cutting costs.

# Worthington Mowers

## Convertible Frames Bobbing Prevented

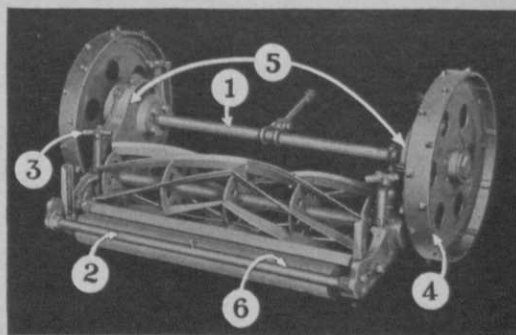

All frames are convertible from a three gang to a five gang, to a seven gang. Any Worthington cutting unit ever made will fit in any Worthington frame ever made. Worthington frames are provided with a spring as illustrated below which applies a firm but yielding down-

ward pressure on the rear of the unit to prevent bobbing in any kind of grass, long or short, no matter how tough. Other mowers depend upon dead weight to eliminate bobbing which increases not only the weight of the machine but the tractor cost of hauling the gang mower.

### Superior Points of Mower Units

V or spiral reels optional. All reels made of special alloy steel spot welded. Hand adjustment of bed knife. Lubrication but twice a season. Rigid box-braced construction. Smooth operating high frequency cutting units for fairways, approaches and rough. Demountable rims costing but \$1, instead of \$6 for new wheel.

- (1) Over-size axle. Strong. Rigid.
- (2) Tie-brace rod giving box construction rigidity.
- (3) Hand knife adjuster. No wrenches needed.
- (4) Demountable rims cost only \$1.

- (5) Each wheel driven by separate gear. Weight even on both sides of mower.
- (6) Ample space between rollers and tie-brace preventing any collection of grass.

IT'S WHEELING STEEL

# NELSON POP-UP

## Sprinklers for Golf Tees

Nelson Pop-Ups do away with hose and portable sprinklers. Just turn a valve. The sprinkler head pops up and revolves slowly. When the water is turned off the sprinkler drops back and in no way interferes with players or the mower.

The Nelson Pop-Up No. 2 sprinkles up to 60 ft. in diameter using 4 to 9 gallons per minute on 20 to 50 pounds pressure.

The Nelson Pop-Up No. 3 sprinkles up to 80 ft. in diameter using 6 to 14 gallons per minute on 25 to 60 pounds pressure.

To install simply dig a shallow trench to the center of the tee, lay a  $\frac{3}{4}$  in. or 1 in. pipe and connect the Pop-Up head.

Send for new folder describing the Nelson line of sprinklers and valves for golf greens and fairways.

# HERE'S A HOSE YOU WON'T HAVE TO REPLACE FOR YEARS!

—built to resist abuse and abrasion

**T**HE economy of buying the best hose is amply demonstrated by the records of four-five-six years' service many clubs report obtaining with Goodyear Emerald Cord—the finest hose built. It owes its exceptionally long life to three unique features. To its tough heavy cover of special non-oxidizing rubber that long resists the "cooking" effect of the sun's heat which causes ordinary hose to check and crack. To its flat sturdy ribs that armor it against

abrasion from trees, rocks, walks, etc. And lastly, to its double carcass of heavy double-braided cotton cord\* that reinforces and protects the rubber against dragging, yanking strains that otherwise would soon weaken it.

\*LOOK FOR THIS SEAL  
—the guarantee of  
finest construction,  
longest life

MADE BY THE MAKERS  
OF GOODYEAR TIRES

Give the budget a break for the next few years by buying this longer-wearing, money-saving hose whose first cost is only a trifle more. If your supply house doesn't have it, write Goodyear, Akron, Ohio, or Los Angeles, California.

THE GREATEST NAME IN RUBBER

You save time and money by depending on GOLFDOM advertisers

## O.K.—INSTALL IRRIGATION IN JUST ONE OR TWO FAIRWAYS BUT...

### Begin with a Complete Plan For Them All

No matter what your finances may be, if your plans are properly made you can plan a complete watering installation and then actually install only those fairways and greens which you can afford.

Skinner Engineers, with years of practical watering experience, are in a position to extend any service from preliminary plans and estimates to the actual handling of complete installations. All or any part of Skinner service is available to interested clubs . . . we recommend that you let us lay out a complete plan and then install as you can afford.

We invite correspondence and your request for a copy of our manual.

# KILLS ANTS, SOD WEB WORMS

on Greens,  
Lawns, Gardens

Harmless to Humans,  
Animals and Birds

Red Arrow Garden Spray effectively controls ants and sod web worms, yet will not injure the turf or affect the fertility of the soil. Red Arrow is a concentrated pyrethrum extract combined with a special soap. Simply mix with water and apply with any type spraying apparatus. Red Arrow is safe to use—harmless to humans, animals and birds—and has no poisonous or irritating fumes. Also kills many varieties of sucking and chewing insects on flowers, vegetables and fruits. Ask your supply jobber or write for complete information.

# TORO

## ALL OVER THE WORLD

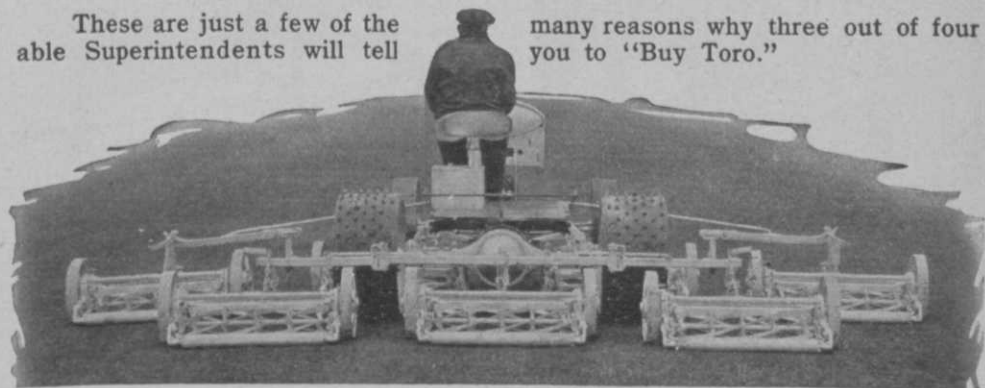

## F-L-E-X-I-B-I-L-I-T-Y

Up hill or down dale, around traps, bunkers, chocolate drops or what have you, the Toro Master Seven is the most highly f-l-e-x-i-b-l-e machine on the market. Full floating mowers is the answer. Every individual mower is engineered to follow the ground, regardless of whether it is rough, humpy, corrugated or smooth as a billiard table. The result is perfect cutting.

But that is not all. The Master Underslung arrangement gives you a greatly shortened over-all length—far less than any pull type machine on the market where the mowers are carried in a separate frame behind the drawbar. The Master Seven is **SIX FEET SHORTER** on the average than any other tractor mower of like capacity.

These are just a few of the able Superintendents will tell

many reasons why three out of four you to "Buy Toro."
