

Looking across the Rob Roy course while some of the sprinklers are operating.

Rob Roy Depends on INTERNATIONAL

"Our International Power Unit certainly helped us during the dry weather this summer," says R. B. Noren, pro-manager of the Rob Roy Golf Club, northwest of Chicago. "We figured that if we could get enough water on the greens, tees, and bunkers, we could pull them through. We had our International engine pumping 250 gallons of water a minute from our 485-foot well 14 to 16 hours a day and it did a swell job."

And the members agree with Mr. Noren. The Rob Roy club installed the International Model 300 Power Unit in 1932 and have had four years of successful service from it. According to Mr. Noren, this International uses 20 gallons of gasoline in 14 hours. Since the club buys fuel at the commercial rate, their cost is

comparatively low. Oil is changed every 80 hours.

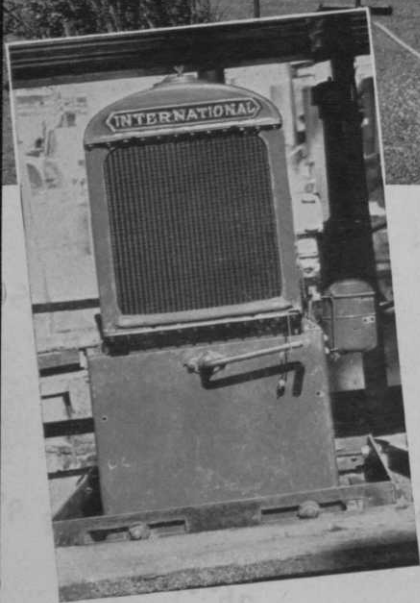

International Power is economical and dependable for the golf course with a watering system. Investigate it for your own club. Our nearby branch or dealer will give you complete information.

BUCKNER IRRIGATION SYSTEMS

Now ~ as Every Year

ADVANCED DESIGNS AND REFINEMENTS for 1937

Every year since 1913, Buckner has invented, introduced or pioneered in the design of every major development in the irrigation field.

This remarkable record is proof of the constant forward progress of our engineers in solving the watering problems of every one interested in maintaining scientifically correct turf conditions.

The superiority of design and high quality of Buckner equipment has made it the standard of the irrigation industry. Your watering systems cost no more when Buckner equipped. Insist on Buckner—it pays.

For 1937 Buckner brings you the latest developments in golf course irrigation. Savings in horse power, water consumption, man-hours of labor and lower operation cost are but a few of the unseen savings in using Buckner equipment with Buckner methods.

Plan Now For Next Year's Turf

Now is the ideal time to plan and install a new system—not for just the coming season, but for the many years ahead.

Bring your old systems up to date with modern Buckner designs and refinements.

Have your course ready for play with the first sign of spring. Have your irrigation system ready for the first sign of drought, and enjoy the kind of turf made possible with correct watering.

Our engineering staff is ready for all consultation and advisory work without obligation. Call on them now.

BUCKNER ALONE GIVES THE
PERFECT CURTAIN OF WATER

No. Y15—Perfection covering a 110 ft. circle on 35 lb. pressure, price only \$12.50.

For FAIRWAYS—GREENS or TEES, Perfections are much the BEST and CHEAPEST Sprinklers on the market.

ARRANGE YOUR BUDGET TO INCLUDE Perfections for 1937 and you will save on your investment from 20% on the smaller sizes to over 100% on the larger sizes, AND

Perfections will more than repay their cost in savings the very first season.

Ask any one of the more than 75 Leading Golf Course Equipment Dealers who sell and recommend Perfections, or send direct, for free 10-day trial.

A Trial will convince you that there is no sprinkler like the Perfection.

PERFECTION SPRINKLERS

Offer 10 Distinct Advantages

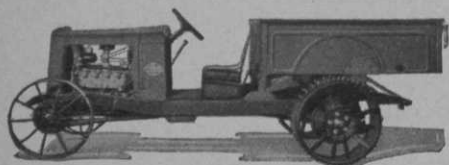

1. Perfections give Slow, Even Distribution over entire sprinkled area, by actual test (try testing one).
2. Perfections are exclusive users of the Patented Spray Disc Nozzle that has revolutionized irrigation.
3. Perfections give that slow, even, large coverage that is absolutely necessary for satisfactory results.
4. Perfections will never flood even if they are left running continuously day after day.
5. Perfections will keep right on turning in any wind or in any position without special adjustment.
6. Perfections will continue to operate perfectly without special adjustment on varying water pressure.
7. Perfections require less pressure than any other sprinkler and give the best results (try them yourself).
8. Perfections require no greasing and only one adjustment; they just keep right on going day after day.
9. Perfections give greatest coverage for any given pressure; we urge you to try them against any other make.
10. Perfections are mounted exclusively on the Perfection Disc Base, the most sensible and best sprinkler base ever devised.

SAVE DROUGHT GREENS DAMAGED GREENS with a Wichita Compost Grinder

**Four Models
Handle
Every
Compost
Need—
Dealers and
Agents
Wanted**

Golf Courses and Parks that have suffered the ravages of drought and summer heat need perfect compost and lots of it. THE WICHITA COMPOST GRINDER (Shredder and Mixer)

gives it to you at the lowest cost ever heard of. In one operation it grinds,

shreds and mixes any compost mixture, manure, chemicals, peat moss or stringy materials, sod, etc., to any degree of fineness desired. Handles wet or bulky material with ease. T. H. Riggs-

Miller of Kansas City says: "I have a Wichita here at Blue Hills and in the past few weeks have ground with it 75 tons of the finest compost I've ever handled. The Wichita is a wonder." Four models and sizes take care of every need. Also investigate our new High Speed Screen. Write for illustrated folder and low factory prices.

TORO

ALL OVER THE WORLD

Toro Parkmaster on Grounds of Ft. Worth Public Schools

Favored for Every Mowing Problem

IF, LIKE thousands of others, you are planning to visit the Texas Centennial this year, bring your clubs with you and play some of the fine golf courses they have all through that section.

While you're down there, if you inquire about mowing machinery, you will find that 90% of the prominent country clubs in Fort Worth, Dallas, Houston and San Antonio are users of Toro Tractors, Fairway Mowers and Putting Green Mowers.

It is no wonder then that the Fort Worth School Board, completing a \$4,000,000 program enlarging their buildings and Athletic grounds, decided that they would follow the choice of the Superintendents in that section and use Toro Machinery.

The Parkmaster, shown above, is one of a large order of modern Toro machines they purchased for maintaining all of their various play fields.

If you are planning on new machinery for now or next year, follow the recommendation of three out of every four able superintendents in this country and use Toro.

Non-rusting and easy to see and read. Shows hole number, yardage and par. Send score card when ordering. Price, \$1.50 each, plus 10% sales tax. In colors to match Lewis Washers, 10c each additional.

G. B. LEWIS COMPANY

DEPT. GD1036 WATERTOWN, WISC.

"always superior"

—says Tom Dawson, of Tamarack

Many well-known clubs use Agrico Country Club Fertilizers exclusively. Let Tom Dawson, of Tamarack Country Club, Portchester, N. Y., tell you why:

"We have used 'Country Club' Fertilizers exclusively for the past 8 years, both on fairways and putting greens, and the condition of the turf fully justifies our belief in these products. I have made comparative tests with other fertilizers—but 'Country Club' always proves superior. Its gradual, long-lasting effects are particularly noticeable."

A statement like that means something. Fertilize Fairways with AGRICO this Fall and see for yourself—or include it in your 1937 Budget. Three grades—specially formulated for Fairways, for Putting Greens, and for Lawns and Fairways—each with exactly the right amounts of Nitrogen, Phosphorus and Potash—carefully balanced between organic and inorganic Nitrogen—and extra plant foods needed to maintain healthy, vigorous growth. Agrico is sold in Metropolitan New York area by Arthur D. Peterson Co., Inc., 420 Lexington Ave., New York. Also sold by this Company's sales offices in principal cities.

**Agrico is Manufactured Only by
The AMERICAN AGRICULTURAL CHEMICAL Co.**

AGRINITE ALL-ORGANIC TURF FOOD

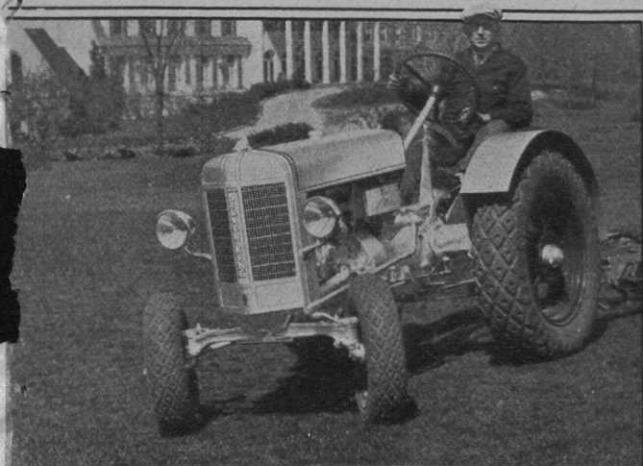

8 1/2% Organic Nitrogen Guaranteed
Agrinite is making new friends every day. From the HOB NOB HILL COURSE at Salisbury, Conn., the Architect and Turf Consultant reports: "This year we used Agrinite on our Fairways, and the results have been remarkable, far surpassing any previously obtained—more uniform growth and darker, richer color." When a complete fertilizer isn't desired, Agrinite is the most economical and effective plant food available. For details—address Arthur D. Peterson Co., Inc., 420 Lexington Ave., N. Y. C.

Stops
INSECT
DAMAGE

TO LAWNS, GREENS,
AND FAIRWAYS

When Planning Your Budget

● The damage wrought by grubs, earthworms and webworms to greens, tees and fairways, if these pests are permitted to feed unmolested on the roots of the fine textured grass, is an eyesore to the golfer and vexatious to the greenkeeper and the greens committee. And isn't it aggravating to putt on earthworm infested greens? The numerous tiny mounds—the handiwork of the earthworms—surely don't improve one's putting game. There is no need for such conditions to exist for it is possible to protect greens, tees and fairways against the ravages of these pests with NuRexform, the Improved Arsenate of Lead. Grasselli Arsenate of Lead is also effective for this purpose.

Put A Hardie SPRAYER In The Budget

NO other investment will return such dividends as a specialized Hardie golf course sprayer. It consistently saves money in the labor cost and expense of greens keeping. It assures the good condition and fine appearance of greens, fairways and grounds, so essential to successful management.

Uses of a Hardie golf sprayer are many and valuable. It is the most efficient equipment for application of liquid fertilizer, tonic solutions and weed killers. Keeps trees and

shrubby free from pests and parasites. Costs little to operate and practically nothing for up-keep. Ask your equipment dealer. Write for detailed data. The Hardie Mfg. Company, Hudson, Michigan, Portland, Ore., Los Angeles, Calif., Kansas City, Mo., New York City, Brockport, N. Y., Jacksonville, Fla. Export Dept., Detroit, Mich.

HARDIE DEPENDABLE SPRAYERS

PUT YOUR 1937 DOLLARS WHERE THEY'LL DO THE MOST GOOD

Power mowing is the key to better golf for less money. It keeps the grass in better playing condition and releases a large amount of time for other work essential to a well-groomed course and grounds.

The two types of Jacobsen power mowers shown here make all hand mowing—greens, tees, bunkers, aprons, edges of trap and greens—positively obsolete, an indefensible extravagance.

Jacobsen power mowers fit any maintenance budget. They pay for themselves from actual savings on one year's operation—a fact proved by more than 1000 golf clubs, both large and small. Send for complete details and specifications. Make your 1937 dollars do a bigger and better job.

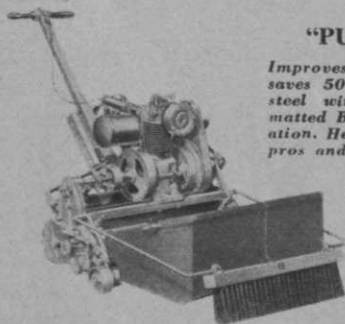

JACOBSEN MANUFACTURING CO.

734 Washington Ave., Racine, Wis.

Factory Branch—Dept. G—101 Park Ave., New York

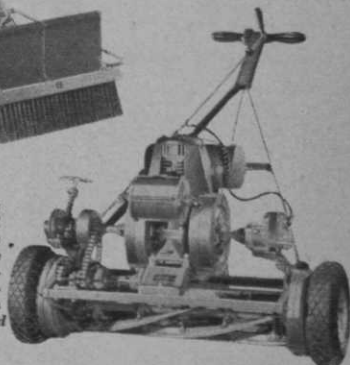

"PUTTING GREEN"

Improves the putting surface and saves 50% of cutting cost. With steel wire brush, it brushes up matted Bent and cuts in one operation. Heartily endorsed by leading pros and greenkeepers.

"STURDEX"

For mowing tees, aprons and cleaning up around traps, bunkers and edges of greens. Enables one man to keep these hard-to-get-at places well-groomed in a fraction of the time required with hand mowers.
