

The International Fairway Tractor is doing an economical job of maintenance for the Dubuque Country Club, Dubuque, Ia. Note the rolling course over which it works.

“Fuel and Oil Consumption of the FAIRWAY Is Below Expectations”

“Our International Fairway Tractor uses $7\frac{1}{2}$ gallons of fuel a day,” reports Alfred F. Smith, superintendent of grounds at the Dubuque Country Club, Dubuque, Ia. “Its fuel and oil consumption is below expectations. We mow 45 acres a day with the Fairway and a gang of seven mowers, cutting a swath 16 feet wide. This tractor is very easy to handle and has a lot of power.”

The increasing ACCEPTANCE of the International Fairway Tractor is proof that it meets the requirements demanded for golf-course and park work. Users know that when RESULTS are needed, it is good business to put the Fairway on the job. Ask the nearby Company-owned branch, or dealer, for a demonstration.

INTERNATIONAL HARVESTER

CUTS WITHOUT CUTTING UP!

This year, put Good-years on your tractor and mowing machines right at the start.

Then you can cut the grass without cutting up the lawns, walks or fairways.

On these big rolling

cushions you will save time, money and temper. You can drive over walks, bridges, roads, lawns, fairways, gravel without damage.

Let the Goodyear dealer near you demonstrate.

THE GOODYEAR TIRE & RUBBER COMPANY, INC., AKRON, OHIO

GOOD YEAR

ALL-TRACTION TRACTOR TIRE

Sturdy Worthington Tractor easily pulling 7-gang mower uphill. This mower, the King of them all, cuts a width of 16 feet.

Worthington Gang Mowers beautify your course ...Save Time, Trouble and Money

SAVES MONEY: They give longer tire life, better traction and save the cost of reconditioning packed turf, because they are the lightest tractor of equal horse power on the market . . . and the weight is equally distributed on all four wheels. Fuel costs are minimum.

YEAR ROUND USE: When Worthington Tractors are not being used for mowing, the power take-off is used to run compost mixers, power sprayers, rotary brushes, pumps and saws, as well as the sickle bar attachment . . . think of the labor and money savings.

EASY TO BUY: Our new monthly time payment plan makes it easy to pay as you go for equipment that pays for itself in labor savings. Strong, powerful . . . beautifully designed . . . you'll be proud to own a Worthington Tractor.

Convenient Hand Adjustment and Simple Lubrication Method

- (1) Handle for simple hand adjustment screw.
- (2) Filler plug for grease.
- (3) Level plug for grease. Filler plug is removed and grease poured in up to level plug. Has to be done only twice a season.

Worthington Cutting Unit Saves Time, Trouble and Money

No tools are required to adjust the cutting unit. This makes it easy for the operator. He is saved many skinned knuckles. A long, hard, dirty job is made clean, easy and rapid. This time saving hand adjustment is an exclusive Worthington feature.

Send now for catalogue showing how to cut costs . . . and save time and trouble.

MORE SAVINGS: Close-up of power take-off showing convenient belt attached for use. A pulley is supplied as standard equipment to operate belt with four ranges of speed. Gear shift for power take-off is easily operated from driver's seat.

FACTS

buyers of turf
fertilizers found
wise to consider

While the storm brewed we were price conscious . . . not **VALUE** conscious. But now we view the matter of turf maintenance with a truer prospective. To get full value in a turf fertilizer, determine these points:

1. Will it supply plant food in early spring when your turf needs it most?
2. Does it encourage root growth as well as top growth?
3. Can you be certain the plant food won't be "locked-up" in the soil and then released in excess in mid-summer, causing lush growth?
4. Will it enable you to maintain a desirable soil balance?

The photograph above is revealing! The plot on the left was Vigoro fed; center plot was fed a product having the same guaranteed analysis as Vigoro; plot on the right was fed a product having more nitrogen but lacking sufficient quantities of minor elements. See the better results Vigoro, the complete plant food, gives.

We offer a special recommendation service to golf courses, based on a comprehensive survey and analysis of your soils. The many analyses and formula made by Swift make an impartial recommendation possible. Let us test your soil and tell you about

IT'S WHEELING STEEL

A Golf Special Tractor Trailer Hardie Sprayer

THIS Hardie sprayer is especially engineered for operating with golf and fairway tractors. It is a rugged, powerful outfit, but weight has been kept at the very minimum, providing extraordinary mobility, light draft and great ease in handling.

Built in 3 sizes, delivering from 9 to 15 gallons per minute at pressures from 300 to 600 pounds, this Hardie is available in sizes to meet every golf spraying task. The rubber tired wheels run on specially designed roller bearings. Weight and cost of engine are elimi-

nated as the tractor engine operates the sprayer by means of power take-off. This is only one of many specialized Hardie golf sprayers providing the most economical and efficient application of pest control solutions to greens, trees and shrubs, liquid fertilizers, tonic solutions and weed killers. Ask your equipment dealer or write for catalog. The Hardie Mfg. Company, Hudson, Michigan, Portland, Ore., Los Angeles, Calif., Kansas City, Mo., New York City, Brockport, N. Y., Jacksonville, Fla. PAR ON PERFORMANCE!

JOHNS-MANVILLE TRANSITE PIPE assures permanent effectiveness and economy on your irrigation system

GOLF COURSES in various parts of the country are providing for permanently high sprinkler coverage with J-M Transite Pipe. This durable water carrier is inexpensively installed and lastingly maintains its initial high delivery capacity.

(Installation at St. Albans Golf Club, N. Y. C.)

Johns-Manville
**TRANSITE
PRESSURE
PIPE**

The Modern Water
Pipe for Golf-Course
Irrigation Systems

PLANNING an irrigation system? Do you know that the carrying capacity of ordinary water pipe shows a marked decrease in five or ten years? And that your sprinkler coverage falls off accordingly?

Yet, there is a sure protection against this danger. Install Transite . . . the modern water pipe. An asbestos-cement product, it is permanently immune to tuberculation, the internal corrosion responsible for decreased carrying capacity in ordinary pipe. Transite maintains its high delivery capacity *indefinitely* . . . keeps pumping costs low! A statement proved by its record in thousands of miles of water service throughout the world.

And check these further advantages: Prompt deliveries. Fast, economical installa-

tion with unskilled labor—so that even if you start late in the spring, the course will be ready for the heavy playing season. Then, too, its high resistance to corrosive soils means virtual freedom from maintenance.

In every respect, therefore . . . Transite, which costs no more than ordinary water pipe, is your best assurance of lasting, trouble-free service on irrigation systems. Why not get full details? Send for our free brochure. Write Johns-Manville, 22 E. 40th St., N. Y. C.
