

**THE COUNTRY CLUB, Brookline, Mass.
... one of the fine courses piped
with CAST IRON**

When a golf course irrigation system is piped with cast iron it has a permanent and economical foundation. With cast iron pipe maintenance cost is almost literally zero. Cast iron pipe will last for the life of the course and then return a salvage value. It is the standard material for underground mains. Sizes from 1¼ inches. For list of clubs using cast iron pipe, write The Cast Iron Pipe Research Association, Thos. F. Wolfe, Research Engineer, Peoples Gas Building, Chicago, Ill.
