

GREENBRIER one of the fine courses piped with CAST IRON

*Eighth Green, Old White
course, during West Vir-
ginia State open.*

Many of the finest courses in
America are piped with cast iron,
their irrigation problems solved
forever, without recurrent ex-
pense for replacements or main-
tenance. A fine course deserves
the best—cast iron pipe—the
standard material for under-
ground mains. With cast iron
pipe the first cost is the last cost.
Sizes from 1¼ in. For list of clubs
using cast iron pipe, write The
Cast Iron Pipe Research Associa-
tion, Thos. F. Wolfe, Research
E'g'r, Peoples Gas Bldg., Chicago.
