LANDSCAPE ENGINEERS

entomologists at a leading university, are now sponsoring a new insect repellent. As a 100% scientific product, it is a lotion that not only prevents insects from biting, but keeps them away from their victims—hence its name, Sta-Way.

Sta-Way is stainless and easy to apply, non-greasy, harmless to even sensitive skins, has a pleasant odor, and is effective against mosquitos, gnats, black flies, beach flies, sand flies, deer flies, and other types of pests. Its effectiveness is further confirmed by two years of sales testing, with phenomenal results.

Roseman Tractor Mower Co., Evanston, Ill., reports considerable enthusiasm over the latest development in the Roseman line of golf course tractors—the general utility Special Model 500. The new all-purpose model has a dump body, demount-

able side boards, Ford 4-cylinder engine, and a special rear axle gearing. Further information on the model pictured here, and complete information on all Roseman mowers and tractor models will be sent gladly upon request to the company.

Canvas Products Corp., 19-23 E. McWilliams St., Fond du Lac, Wis., has met with great success with its outstanding Personal Pro golf bag. It has full length utility pocket with full opening zipper, and a detachable hood that can be used for other purposes. The generous size shoe pocket opens on three sides and the ball pocket opens the full length. It contains all the well-known Caddy-Master golf bag features.

Clubheads automatically line up behind dividers

in yoke-shaped, graduated top. Weight is evenly distributed, regardless of number of clubs; clubs are selected quickly, easily. Concealed metal plate, conforming to shape of bag, is built-in, below handle layer. This prevents "buckling" and affords easy placement and removal of clubs. Rectangular bottom, placed at right angle to top, "fans" out club grips and prevents crossing and jamming. Tugging, scratching of shafts and grips is eliminated.

Another new note in appealing design is Canvas Products' new Fiddle Bags. They, too, contain the patented Caddy-Master features, plus hood concealed in full length "fiddle" pocket, with room to spare for sweater, jacket, rain cape or accessories.

A new booklet, Caddy-Masters on Parade, and special folders on the Personal Pro bag and Fiddle bag illustrate and describe these new lines. Copies will gladly be sent upon request to the company.

WANT ADS

Wanted—Active golf club, ball, or specialty salesman who contacts professionals to handle manufacturer's line of golf bags. Complete protection on territory. Good commissions. Address: Ad 514, % *Golfdom, Chicago.*

Professional—who gets results, 22 years with better private and resort clubs desires location with reliable club. Experienced greenkeeper. Finest testimonials as to capability, initiative, character. Address: Ad 501, % *Golfdom, Chicago.*

PELHAM COUNTRY CLUB — one of the fine courses piped with Cast Iron

*View of fairway looking
back from fifteenth green.*

*Photo courtesy Pelham
Country Club, Pelham
Manor, N. Y.*

A sound plan for golf course irrigation is based on a piping system whose first cost is the last cost. Install cast iron pipe and there will be no replacements and no maintenance expense. Cast iron pipe lasts for a century. It is the standard material for underground mains. Sizes from 1¼ inches. For list of installations, write The Cast Iron Pipe Research Association, Thomas F. Wolfe, Research Engineer, Peoples Gas Building, Chicago, Ill.
