**ACUSHNET**  
*GOLF BALLS*

SOLD ONLY THROUGH PRO SHOPS

**IT'S A FACT!**

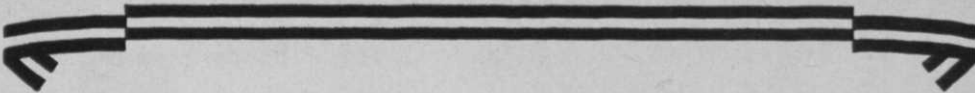

The two sunshine states may have differences of opinion on some points — but they seem to see eye-to-eye on golf balls. For through the winter season the popular vote in the pro shops of both states has been for Acushnets.

That's a good omen. Big sales on the winter-

resort circuit have always meant big sales all through the summer in the northern clubs... And just to bear that out — *this year's advance orders on Acushnets are the largest ever.*

So we suggest... get ready!... be prepared! ... stock up! We confidently expect the summer of 1941 to surpass the record-breaking seasons of '39 and '40... Acushnet Process Sales Company, New Bedford, Massachusetts.

## FLASHES FROM THE FIRING LINE

### Michigan and Border Cities G. Cse. Supts.

Most of the 'boys' here in Michigan are resting up—the aftermath of hard and long hours in preparing for the national greens convention in February. Herb Shave, the Oakland Hills veteran, passed up his usual Southern jaunt this winter, preferring duty before pleasure. Clarence Wolfrom, president, recently met with a very painful accident when struck by a crank while trying to start a club truck. Seven stitches had to be taken.

Many members have just returned from the Michigan State College two-day short course, where everything was conducted in fine style by Dr. James Tyson. While in East Lansing, a new green built by Ward Cornwell at Walnut Hills was inspected. Labor will be a problem in our section this year—most of the younger fellows being employed in factories. A good golf year certainly seems to be in the offing—everybody is working, and all munny courses hereabouts have raised rates by about 25c. *David C. Kennedy, Secy.*

### Minnesota Greenkeepers

At the annual meeting of the Minnesota Greenkeepers Ass'n Joe Rush, handsome turf expert at the CC of Minne-

apolis was re-elected president. Joe's aggressive leadership is what the boys from the Golden Gopher state like. Cliff Anderson, who keeps the Elmwood Park Club, Sioux Falls, So. Dak., spic and span, was drafted for the vice-presidency.

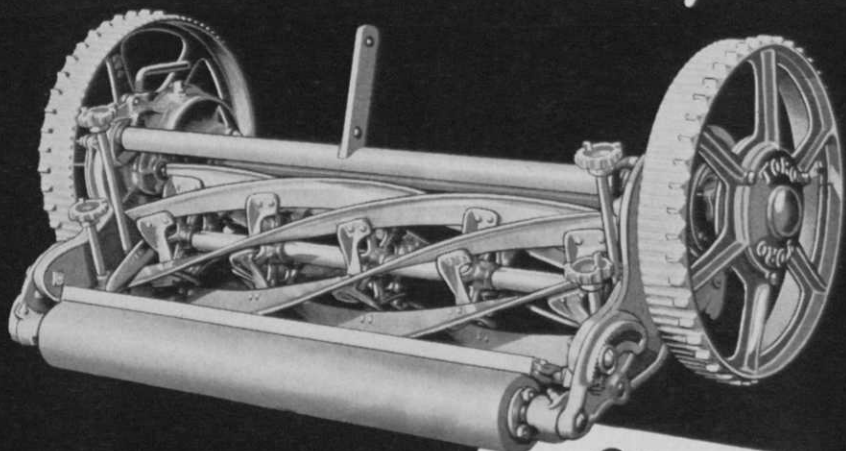

Vic Larson, the sage of the Minneapolis GC, will again stand guard over the money bag as treasurer. The association reports said bag is the fullest ever. Some wag from out of town suggested the gang get a little more of that dough together and buy a bus so the Twin City bunch can come out and visit the out-of-towners more often. Stan Graves of Hillcrest, St. Paul, was re-elected secretary. He reported the membership on a steady increase.

Any greenkeeper desirous of joining the ass'n must apply for regular membership—that is, take the exam for the GSA. Six of these exams are now being given to new applicants by the Minn. district examining board. August Hillmer of the Interlaken CC of Fairmont, Minn., is making his first start at the greenkeeping profession, so was voted in temporarily as an associate member.

Honorary members elected for 1941 were Dr. C. O. Rost, Dr. A. A. Granovsky and Prof. A. H. Larson of the Uni-

# IDEAL BULLDOG MOWERS

## STANDARD AND SPECIAL FRAMES for Big Capacity Mowing Jobs

### SPECIAL ROUGH CUTTING UNIT

The Bulldog Rough Mower is designed to mow golf course roughs, airports, etc. Available in 3, 5 and 7-gang sizes. Can be adjusted to cut as low as 1 15/16 inches and to a height of 3 1/6 inches. The Ideal Rough Mower will do much cleaner and faster work than a Sickle Bar Mower, and is better for high cutting than a fairway mower.

WHERE there are large areas to be mowed—Ideal Bulldog Mowers with standard or special frames are your assurance of mowing economy. The large illustration above illustrates the standard pull-type Ideal frame with tractor hitch. Here, the complete mower is hauled behind the tractor. Its cleaner, faster cutting has been proved with hundreds of users—and at lower operating costs.

The inset shows the special Ideal close-coupled frames in the seven-gang size. In this combination three units are attached beneath the tractor while four trail behind it. Easy transporting and especially clean cutting are numbered among its advantages.

If you want the facts about Ideal Bulldog economies, write us today for the free catalog. There is no obligation.

# IDEAL POWER LAWN MOWER CO.

Worthington Golf Chief and 7-Gang Mower at Druid Hills Golf Club, Atlanta, Ga., pulling up steep grade without slippage and without necessity for dual rear wheels.

## The Worthington Golf Chief and 7-Gang Mower keep your fairways in better shape with less time, trouble and money

Worthington Cutting Units with wider, harder blades subdue the toughest Bermuda grass and stand up under years of daily use on thousands of golf courses from Maine to California, say Greenkeeping Superintendents who pride themselves on giving their members the finest possible playing surfaces.

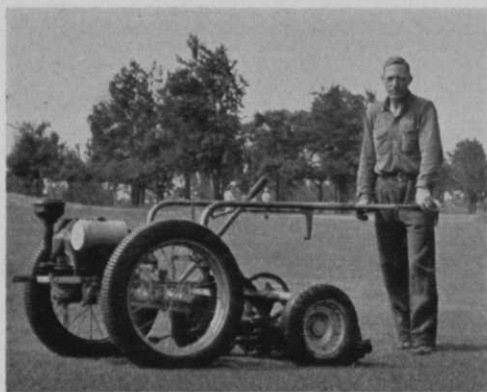

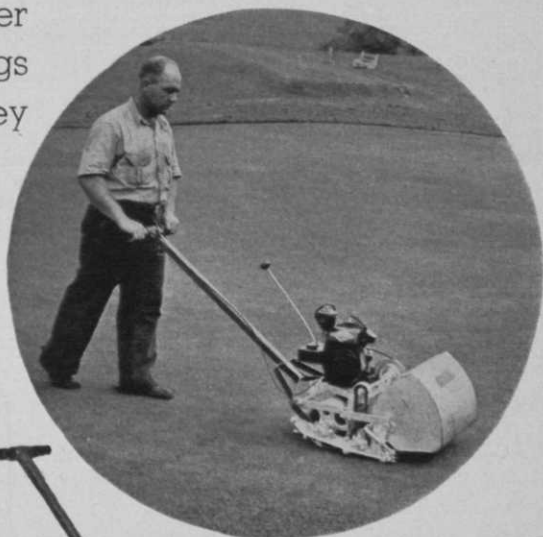

With the Worthington Golf Chief Tractor that "goes wherever anything on wheels can travel," you have the most efficient, most economical mowing combination on the market today.

# Worthington Putting Green Mowers

give your members better greens with great savings in man-power and money

The New Worthington Shawnee Clipper is powered by the well-known Briggs & Stratton motor which drives the fly-knife reel for easier, faster cutting. Because the cutting work is done by power, the Clipper may be controlled by hand with little effort.

The Worthington Scout Hand Putting Green Mower is standard hand equipment on many famous golf courses. Its light weight makes it easier to operate and its frequency of cut—the highest on the market—give you better putting surfaces.

The famous Worthington Overgreen, with one man, cuts the full 18 holes in 5 hours including travel time between greens—a tremendous saving in time and money.

The Cutting Units in all Worthington Putting Green Mowers are identical. This enables you at any time to convert the Scout into the Clipper with the addition of the motor—or into the Overgreen, should you decide to add this efficient piece of equipment at some future date.

*Tear out and mail this coupon, today, for illustrated catalogue of time, labor and money-saving Worthington golf course equipment.*

East Greenwich, R. I.

CC. The association is upon its toes and growing. Papa Edward Zwick (Colonial CC) is double-chesting over the arrival of a boy—John Paul Zwick. 1941 looks like a grand golf year in this section. *Riley E. Heckert, Secy.*

### Long Island Golf Course Supts. Assn.

Long Island greenkeepers are concerned over the loss of trained men through the draft. Latest news indicates Larry King, Jr., is following in the footsteps of his father; young King will be greenkeeper at the Oakland GC this season. Good luck, Larry.

At recent annual election meeting, the present officers were chosen to serve another year. They are: pres., Vincent Vigliotti, Garden City CC; vice-pres., Edwin Belwood, Garden City CC; secy.-treas., Homer Whitson, Bethpage State Park. *Homer Whitson, Secy.*

### Cincinnati Greenkeepers Assn.

Plans are now being completed for the meeting, and equipment and supply demonstration to be held at Kenwood CC, Cincinnati, May 5. There will be golf at 1 p.m., an equipment demonstration at 4, dinner at 6, and an educational program following the dinner. Speakers will include O. J. Noer, Milwaukee Sewerage Commission, and Jas. Fiddler, local weather forecaster, who will make his

usual evening forecast by radio from the club. Greenkeepers and green-chairmen from northern Ky., Cincinnati, Dayton, Troy, and all surrounding districts will be in attendance. Educational chairman for the event is Lou Langfeldt; assisting him will be Everitt Van Meter and Warren Bidwell. *Taylor Boyd.*

### Central Ohio Golf Course Supts. Assn.

Central Ohio section will be host to many tournaments this season—the state archery golf tournament at the University course April 5-6—the state publinox at the Dublin layout July 12-13, and the national inter-collegiate at the University course, June 3-8. Lawrence Huber's son, victim of an accidental shotgun discharge last October, is recovering very nicely. Two newcomers to the group are Mac Parsons and Bob Williams. Mac is stationed at the Brookside club in Linworth, after serving 13 years at the Wooster CC. Williams is assisting John McCoy at the University club, after serving three years at Medinah in the Chicago district.

The educational committee has set up a great feature. Each meeting carries a special theme, thus permitting more thorough discussion. Every effort is being made to have Columbus chosen as the '42 greens convention site. So, if work in this direction means anything, you can plan on visiting us at the '42 greens show.

# FUNGÖL

The  
YARDSTICK  
OF  
TURF  
FUNGICIDES  
AND  
VERMICIDES

THE  
LOW  
COST  
BROWN  
PATCH  
CONTROL

When you are using Fungöl for prevention of Large or Small Brown Patch you'll be getting dollars back faster in service than you paid them out in first cost. This multi-chemical product is really thrift itself because of its immense covering capacity and lasting soil retention qualities.

Fungöl is a combination of many chemicals, definitely different from other ordinary fungicides. As a general soil conditioner it has no equal.

From the standpoint of economy and safe chemical power for combatting fungous turf diseases, you'll discover a real performance in Fungöl.

Also in Fungöl are special extra chemicals, at no extra cost, for eradication of Earthworms, Sod Webworms, Cutworms, Grubs, etc. It is worth the price for this alone.

Write for literature, new low prices and free testing sample.

McClain Bros. Co. - Canton, O.

# LOCKER-SATISFIED MEMBERSHIP

● Hardened par-smashers and hopeful dubs are club-ward bound . . . ready to test out rusty muscles . . . eager to revenge old defeats . . . primed to razz the house committee that doesn't provide lockers with all the comforts of home.

Lyon Lockers are designed to promote locker room happiness, protect club income, and maintain a "locker-satisfied" membership. From the luxurious double door deluxe models to space-conserving single door units, all Lyon Golf Lockers embody these outstanding advantages: (1) Doors that will always remain true and easy to operate; (2) No sharp or exposed edges to injure hands or tear clothing; (3) Maximum protection of contents; (4) Lasting, attractive appearance; (5) Negligible upkeep cost. Helpful locker room planning service, if desired.

## LYON METAL PRODUCTS INCORPORATED

General Offices: 3404 MADISON AVE., AURORA, ILL.  
Branches and Distributors in All Principal Cities

Steelart Folding Furniture meets every club table and chair need. Highly acceptable as golf prizes. Both chairs and tables are strong and rigid and smart and luxurious. Eliminate hazards of pinched fingers and torn clothing. Most economical in the long run.

# LYON GOLF LOCKERS

Never a dull moment ahead this season. Labor crews will be under-manned, but we'll have to cope with more golfers due to better times—so there must be wise planning, buying, and working to carry us through. Officers for the year are: pres., Glenn Van Vorhiss, Mt. Vernon CC; vice-pres., John S. McCoy, University GCse; secy-treas., Robert Williams, University GCse; state delegate, Mac Parsons, Brookside CC; GSA delegate, Lawrence Huber, Wyandot CC. *Robert Williams, Secy.*

### Northwestern Penna. Golf Course Supts. Assn.

John C. Reed, secy. of the association, and greenkeeper at the Sylvan Heights GCse, New Castle, Pa., died in January. Chas. L. Martin replaces Mr. Reed at Sylvan Heights.

### Tri-State Golf Course Supts. Assn.

Officers for 1941 are: pres., David M. Bell, St. Clair CC, Bridgeville, Pa.; 1st vice-pres., Ralph C. Martin, Shannopin CC, Ben Avon, Pa. 2nd vice-pres., Robert M. Smith, Westmoreland CC, Verona, Pa.; secy-treas., Arthur A. Snyder, Alcoma GC, Wilkinsburg, Pa. All were re-elected unanimously. *Robert M. Smith.*

### A QUESTION COMMONLY ASKED US

"As Super Mineralite has a metallic mercury content of but 10.1%, to what do you attribute its remarkable effectiveness?"

### HERE IS OUR ANSWER

The formula of  
**SUPER MINERALITE**

is a delicately-balanced blending of a great many rare, little-understood elements together with several well-known elements—plus a 10.1% metallic mercury content. The blending of this formula required approximately 10 years of research and experimentation, and the only secrecy regarding the Super Mineralite formula is the exactness of this blending. It was determined through extensive, nationwide experiments that the Mineralite formula required but a 10.1% mercury content to control brownpatch. Even in the most severe, active attacks, the maximum application required for control proved to be no more than 4 ounces per 1,000 square feet. (In most cases 2 or 3 ounces are sufficient).

And so we say, the remarkable effectiveness of Super Mineralite on brownpatch, as well as disturbed or unbalanced nutritional conditions that encourage brownpatch attack, is not due alone to either the Mineralite formula or the very low and economical mercury content—but to an exactingly-balanced combination of the two.

Anyone anywhere interested in the maintenance of fine turf may obtain complete information on any question regarding Super Mineralite by writing, DON YOUNG, 68th and INDIAN LANE, KANSAS CITY, MO.
