1942

U. S. GOLF BALLS

Governmental restrictions against the use of rubber for Golf Balls have made it necessary for us to close down our Golf Ball manufacturing and confine our distribution to stocks on hand.

Every effort will be made to distribute these stocks among all Golf Professionals and Golf Clubs on a fair and equitable basis during 1942.

We want you to obtain a fair share of the U. S. ROYALS—with the now-famous Oil Cushioned Center—U. S. FAIRWAYS and U. S. NOBBYS now available.

If you have not yet placed your order with your U. S. Representative, we suggest that you write or telephone the nearest United States Rubber Company Branch immediately.

United States Rubber Company
