

# DON'T GET CAUGHT SHORT

## ON GOLF BALLS FOR NEXT SEASON'S PLAY

Let's face facts and ignore fiction.

Two things are vitally important in the manufacture of new golf balls—material and manpower.

Labor is very critical and all available manpower is principally engaged in the manufacture of essential war products.

Your supply of golf balls for

next season's play is chiefly dependent on reprocessed golf balls. Synthetic golf balls are still in the experimental stage.

Keep up the collection of used golf balls and ship them to "U.S." for reprocessing the selective grading way. "U.S." will test and brand them, according to playing qualities, with these well known brands—

**U. S. ROYAL • THREE STAR U. S. ROYAL  
U. S. FAIRWAY • U. S. NOBBY**

Used golf balls from New England, New York, New Jersey and Eastern Pennsylvania should be shipped to U.S. Rubber Co., Golf Ball Dept., Providence, Rhode Island. From all other points, ship to U.S. Rubber Co., Golf Ball Department, 440 West Washington Street, Chicago, Ill.
