and in addition the most promising turf fungicides from past years' tests were tried under actual playing conditions at the Meadowbrook Golf Course, Wyoming, Rhode Is. Tables show fungicides and dosages used in developmental trials, performance of chemicals as fungicides, and performance of fungicides being sold for control of Brown Patch and Dollar Spot. A complete discussion of results and performance under playing conditions is given for those interested in the report.

PAR - INC.

1949 E. 75th Street
CHICAGO 49, ILLINOIS

at 5440 Northwest Highway, Chicago, on March 1 with a complete course equipment show and Open House.

Hundreds of golf course, park and cemetery officials from the surrounding states took advantage of the Open House to view the displays of course equipment and supplies and discuss their problems with manufacturers who were on hand for the show.

The new repair department and storage facilities provide adequate space for equipment display making it interesting and profitable for anyone interested in the industry to visit the showrooms at any time.

The organization will be 25 years old in the summer of 1950. During that time the company has had its ups and downs along with the fortunes of the golf business. Today 23 employees, some of whom have been with the company for 20 years, cater to the needs of the golf course and orna-

mental trade in the Chicago district.

Besides offering Davis Grass Seed and a number of other Davis items the company represents most of the prominent manufacturers of turf equipment and supplies including Toro, Milorganite, Buckner, Armour, Swift, Du Pont and others.

ANT CONTROL BULLETIN AVAILABLE

"Control of Ants in Turf and Soil" is the title of a bulletin written by John C. Schread and Gordon C. Chapman issued by the Connecticut Agri. Experiment Station, New Haven. The bulletin covers the experiments and tests made by the authors with Chlordane. Tables show results of treatment with various concentrations and the summary carries suggested methods of application for effective eradication. Copies of the bulletin (No. 515) may be obtained by writing the Experiment Station.

 The greatest variation is 0.26

PENNSYLVANIA

QUALITY LAWNMOWERS SINCE 1877

"Pennsylvania Quality" means better turf
on Fairways and Greens

● Good turf depends largely on proper mowing. And good grass cutting demands good mowers to do the job. "PENNSYLVANIA QUALITY" means good grass cutting—easy operation—long life—low maintenance cost. Both the FAIRWAY GANG, with unbreakable malleable iron construction and the aluminum-and-steel SUPER-ROLLER Greens Mower are typical of "PENNSYLVANIA QUALITY."

**PENNSYLVANIA
FAIRWAY GANG—**
3, 5, or 7, 30-inch units
—with pneumatic tires
optional

SUPER-ROLLER GREENS MOWER—
8 blades—18-inch swath
—geared for high speed

Other Pennsylvania Quality Mowers
