

has a safety reverse which stops the machine automatically and prevents injury to the operator. Depth of the hoe can be regulated from 1/4 in. to 8 inches. It'll work up to a 40 degree grade.

"FOOTEEZE," NEW CUSHION MAT

Melflex Products Co., 410 So. Broadway, Akron, Ohio, manufacturers of tee mats, aisle runners, shower stall mats, etc., have developed the "Footeeze" cushion mat, designed to bring comfort and ease to all workers who must stand. The 1/8" Mel-Flor slip resistant surface is welded to a sponge rubber base that makes the worker feel he is suspended on air. The mat has no discomforting ridges or corrugations, is black in color, and measures 18" x 30".

GOODYEAR'S LUG SOLES ON GREENS

Goodyear rubber lug soles for golf shoes got the strong O.K. from greenkeepers after the boys had examined the Goodyear lugs in an exhibit at the LA greenkeepers' convention and checked up on Fred Grau's tests. Regardless of what the greenkeepers might have said the members, though liking the firm hold of spikes on turf, also like

the safety of the lug soles in preventing a gent with a cargo aboard from skidding on the lockerroom steps or floor and breaking his neck, arms, legs or fanny.

HARDIE SPECIAL MODEL SPRAYER

Hardie special model sprayer designed for general use on golf course, combining both high and low pressure features which allow the golf course superintendent full latitude in spraying, depending on conditions and types of chemicals used. This sprayer mounted on rubber tires and with a hitch for use with tractor equipment is also provided with a specially designed folding boom for spraying fairways or greens.

WORTHINGTON'S FRONT-WHEELER

Worthington Mower Co., Stroudsburg, Pa., introduced its new front wheel drive tractor at National Greenkeeping Supts. Assn. exhibit and demonstration. The new equipment with 3, 5, 7 or 9 mowing units ahead of the tractor was received with intense interest. The new tractor has 75% of the weight over the front wheels giving maximum traction. It has 100% operating visibility and high maneuverability. The longer wheel base and seat location and construction make the tractor easy riding for the operator. The utility box on the rear is another practical feature. Greenkeepers commented very favorably on the arrangement of governor with a foot-throttle that over-rides the governor for

added power on hills. Especially impressive in the L.A. demonstration was the way it operated in wet dirt and grass without leaving particularly noticeable tracks.

NEW TYPE SPRAYER

Ideal for either the pro or maintenance shop is the Burgess Vibro Sprayer, distributed by Hagan Industrial Products, 3851 N. Hoyne, Chicago 18, Ill. Complete within itself, it needs no hose, compressor or motor of any kind. Simply plug into any AC outlet, adjusting spray screw for job requirements. This moderately priced sprayer handles enamel, lacquer, varnish, shellac, light oils, liquid wax, disinfectants and residual type insecticides with professional results.

INDOOR TRAINER FOR PUTTING PRACTICE

Parris-Dunn of Clarinda, Iowa, have come up with another indoor trainer for off season and inclement weather practice. The new "Putt-Trainer" is an interesting game as well as a means of analyzing putting strokes and enables one to get down to some really serious concentration for those three to eight footers that will be coming up at the club next summer. The illustration shows the complete "nine-hole golf game" including an 11½ foot green putting mat with the original Parris-Dunn metal Rol-Back as the target. The mat is laid out for nine different marked "holes" or putting distances with white directional lines to help perfect the follow-through. The Rol-Back's slope is adjustable so that the ball will always return to the player.

WASHINGTON STATE CONFERENCE

(continued from page 33)

The first afternoon started with a group of Kodachrome pictures by O. J. Noer showing turf problems throughout the country. Then followed a panel discussion of fertilizers. General principles as they relate to turf were covered by Noer. Prof. L. C. Wheeting discussed lime and fertilizer needs of the soil in the Pacific Northwest and Prof. W. K. Kennedy of the Station Staff reported on fertilizer trials conducted by him. The amount of clover in the turf was proportional to the amount of phosphate used. The balance of the afternoon was devoted to an interesting discussion of drainage and irrigation. Mr. Amsbury of Spokane was the final speaker. He talked about machinery maintenance.

The dinner meeting was well attended. The Toastmaster, H. A. Schoth called upon some of the notables before introducing Dr. Fred Grau, the principal speaker. Dr. Grau told about the work being done by the Green Section and showed pictures of things to come in turf. Steps

were taken to organize the Northwest Turf Improvement Association.

The Thursday morning session started with a discussion about grasses and practical aspects of their maintenance in the Pacific Northwest by H. A. Schoth. A panel discussion followed with Dr. Grau, Schoth and Donald Douglas participating. The time was devoted to a discussion of turf grasses for all purposes. Douglas of the Soil Conservation Service told about dry-land grasses. He mentioned standbys such as crested wheat grass, blue stem etc. He showed a good variety of sheep fescue, designated P .272 and talked about Volga wild rye grass, Sherman big blue grass, Sandbergs blue grass etc. Volga wild rye grass has been a good sand dune grass. It is propagated vegetatively.

In the afternoon H. T. Abbot, Supt. of Parks at Spokane had an excellent paper in Planning Design for Recreational Areas. He was followed by O. B. Howell of Spokane and Prof. J. W. Coddick of State College who discussed planting material. The session was brief so those in attendance could get started for home before roads were blocked by flood water.
